Consumer Price Index (CPI) - June 2004

The Central Statistical Office through its monthly survey on consumer prices today announced that the annual rate of inflation stood at 18.6 percent as at June 2004. This rate is 1.2 percentage points higher than the May rate of 17.4 percent. Compared with June 2003, the annual rate of inflation declined by 3.3 percentage points, from 21.9 percent in May 2003 to 18.6 percent in June 2004.

Annual inflation rates for the Metropolitan Low, High Income and Non-Metropolitan Groups are recorded at 18.2, 17.9 and 19.3 percent respectively.

Between May and June 2004, the Consumer Price Index increased by 0.8 percent.

Of the total 18.6 percent annual inflation in June 2004, increases in food prices accounted for 9.8 percentage points while non-food items in the CPI accounted for 8.8 percentage points.

Contributions of different Groups to overall inflation

Group	Inflation	Contribution to overall inflation	
		Percentage Points	Percentage of Total Change
Food Beverages and Tobacco	18.7	9.8.	52.9
Clothing and Footwear	28.4	2.1	11.1
Rent , Fuel and Lighting	16.7	1.7	9.0
Furniture and Household Goods	27.6	2.5	13.3
Medical Care	16.9	0.1	0.8
Transport and Communication	4.7	0.5	2.6
Recreation and Education	20.6	1.4	7.5
Other Goods and Services	16.7	0.5	2.8
All Items		18.6	100

Annual food inflation was recorded at 18.7 percent gaining 1.8 percentage points on the May rate of 16.9 percent. From May to June 2004, the index for food increased by 0.2 percent.

Relatively lower prices were recorded for some food items, particularly maize meal, maize grain, other cereals, fresh meat, dressed chicken, sweet potatoes, dried beans and shelled groundnuts. These lower prices were however counteracted by increases in the prices for fish, dried kapenta, fresh vegetables, fresh fruits, salt and other processed food products.

Annual non-food inflation rate stood at 18.5 percent, increasing by 0.5 of a percentage point on the May rate of 18.0 percent. Between May and June 2004, the Non-Food index increased by 1.3 percent. Non-food inflation was largely due to increases in the cost of fuel, bus fares, airfares, household energy (charcoal, paraffin), house rent, furniture and household appliances, clothing and footwear.

Comparatively, the average price of a 25kg bag of Roller Meal declined by 1.8 percent, from K25,824 in May to K25,053 in June 2004, while the price of Maize Grain measured in a 20-litre tin decreased by 1.6 percent. The average price of 1kg of dried Mpulungu Kapenta showed an increase of 9.0 percent. Additionally, the average price of a 50 kg bag of Charcoal rose by 5.1 percent during the month.

These Consumer Price Indices cover three series, namely: -

- The Metropolitan Low Income Group; which covers Low Income households in the urban areas
- The Metropolitan High Income Group; which covers High Income households in the urban areas
- The Non-Metropolitan Group; covering households in rural areas.

The Metropolitan areas comprise the 10 major towns. These include Livingstone, Lusaka urban, Kabwe urban and all the Copperbelt towns. The Metropolitan areas were further classified into Low and High Income households. All the small towns and the rural parts form the Non-Metropolitan.

In addition, a Composite Consumer Price Index series combining the three groups is also compiled. The base period for the Consumer Price Index is 1994.

The Consumer Price Index is calculated based on mid-month prices.

Dr. Buleti G. Nsemukila
Director of Census and Statistics
