Consumer Price Index (CPI) - June 2005

The Central Statistical Office through its monthly survey on consumer prices today announced that the annual rate of inflation was recorded at 19.2 percent as at June 2005. This rate is 0.1 of a percentage point higher than the May rate of 19.1 percent. Compared with June 2004, the annual rate of inflation increased by 0.6 of a percentage point, from 18.6 percent in June 2004 to 19.2 percent in June 2005.

Annual inflation rates for the Metropolitan Low, High Income and Non-Metropolitan Groups are recorded at 17.4, 19.8 and 19.9 percent respectively.

Between May and June 2005, the Consumer Price Index increased by 0.8 percent.

Contributions of different Groups to overall inflation

The annual inflation rate for June 2005 is 0.1 of a percentage point higher than the May 2005 rate of 19.1 percent. This increase of 0.1 of a percentage point is accounted for by the increase in the cost of house rent and electricity. There were no significant shifts in the contribution of other groups to the increase in inflation between May and June 2005.

Furthermore, of the total 19.2 percent annual inflation in June 2005, increases in food prices accounted for 10.1 percentage points while non-food items in the CPI accounted for 9.1 percentage points.

Group	Percentage Points Contributions of different Groups to overall inflation	
	May 2005	June 2005
Food and Beverages	10.1	10.1
Clothing and Footwear	1.0	1.1
Rent, Fuel and Lighting	2.4	2.7
Furniture and Household Goods	1.9	1.9
Medical Care	0.1	0.1
Transport and Communication	2.1	1.8
Recreation and Education	0.9	0.9
Other Goods and Services	0.6	0.6
All Items	19.1	19.2

Marginal price increases were recorded for breakfast meal, maize grain, fresh meat, eggs, fresh vegetables, sweet potatoes, irish potatoes, cooking oil and other processed food items. Partially offsetting these increases were falls in the cost of roller meal, other cereals (millet, sorghum), dressed chicken, kapenta, dried beans and shelled groundnuts.

Annual food inflation was recorded at 19.3 percent, up by 0.2 of a percentage point on the May rate of 19.1 percent. From May to June 2005, the index for food increased by 0.3 percent.

Annual non-food inflation rate remained unchanged at 19.2 percent. Between May and June 2005, the non-food index increased by 1.4 percent. This increase was mainly due to the rise in the cost house rent and electricity.

A comparison of prices between May and June 2005, shows that the average price of a 25kg bag of roller meal fell by 1.5 percent from K28,393 in May to K27,966 in June 2005. The average price of 1kg of dressed chicken declined by 4.3 percent, while the average price of 1kg of dried kapenta (Mpulungu) went up by 1.4 percent.

However, the average price of maize grain measured in a 20litre tin recorded an increase of 2.9 percent.

These Consumer Price Indices cover three series, namely: -

- The Metropolitan Low Income Group; which covers Low Income households in the urban areas
- The Metropolitan High Income Group; which covers High Income households in the urban areas
- The Non-Metropolitan Group; covering households in rural areas.

The Metropolitan areas comprise the 10 major towns. These include Livingstone, Lusaka urban, Kabwe urban and all the Copperbelt towns. The Metropolitan areas were further classified into Low and High Income households. All the small towns and the rural parts form the Non-Metropolitan.

In addition, a Composite Consumer Price Index series combining the three groups is also compiled. The base period for the Consumer Price Index is 1994.

The Consumer Price Index is calculated based on mid-month prices.

Dr. Buleti G. Nsemukila
Director of Census and Statistics
