Consumer Price Index (CPI) – December 2008

The Central Statistical Office through its monthly survey on consumer prices today announced that the annual rate of inflation, as measured by the all items Consumer Price Index (CPI), increased by a record amount from 15.3 percent in November 2008 to 16.6 percent in December 2008.

The increase of 1.3 percentage points in the annual inflation rate in December 2008 was mainly due to increases in the cost of food and beverages. The increase in the costs of household energy (charcoal and candles), electrical appliances, kitchen and tableware, personal care products and hotel accommodation also contributed to the rise in inflation.

It should be noted that the recent price reductions on fuel and mealie meal that were effected during the latter part of December 2008 have not affected the December Inflation. This is because these price reductions were effected outside the Consumer Price index (CPI) data collection. However, these price reductions will be reflected in the January 2009 inflation figures.

Contributions of the different Items to overall Inflation

Of the total 16.6 percent annual inflation in November 2008, food products accounted for 9.9 percentage points, while non-food products in the Consumer Price Index (CPI) accounted for a total of 6.7 percentage points.

Item	Percentage Points Contributions of different Items to overall inflation	
	November 2008	December 2008
Food, Beverages and Tobacco	8.9	9.9
Clothing and Footwear	0.3	0.3
Rent and household energy	1.6	1.7
Furniture and Household Goods	1.8	2.0
Medical Care	0.1	0.1
Transport (fuel, air fares, new motor vehicles)	1.4	1.4
Recreation and Education	0.8	0.8
Other Goods and Services	0.4	0.8
All Items	15.3	16.6

The annual food inflation rate

The annual food inflation rate was recorded at 20.5 percent in December 2008, up from 18.5 percent in November 2008. Contributing most to food inflation were increases in the cost of maize meal, maize grain, other cereals and cereal products, kapenta, fish (bream), fresh vegetables, eggs, dried beans, shelled groundnuts, sweet potatoes and Irish potatoes cooking oil, alcoholic and non-alcoholic drinks, tea and coffee and other processed food products. Partially offsetting these increases were decreases in the cost of meat and fresh fruits.

The annual non-food inflation rate

The annual non-food inflation rate stood at 12.9 percent in December 2008, up from 12.4 percent in November 2008. Regarding disaggregated groups, the annual inflation rates increased for rent and household energy, furniture and household goods, other goods and services, and declined for clothing and footwear, medical care, transport and communication, recreation and education.

Retail prices of selected items

A comparison of retail prices between November 2008 and December 2008, shows that the national average price of a 25 kg bag of breakfast meal increased by 5.1 percent, from K57,486 to K60,442. The national average price of a 20 litre tin of maize grain increased by 13.5 percent, from K23,310 to K26,465. The national average price of 1kg of dried kapenta (Siavonga) rose by 8.4 percent, while the national average price of 1kg of tomatoes increased by 8.9 percent.

Dec 08 - Dec 07	16.6	20.5	12.9

These Consumer Price Indices cover three series, namely: -

- The Metropolitan Low Income Group; which covers Low Income households in the urban areas
- The Metropolitan High Income Group; which covers High Income households in the urban areas
- The Non-Metropolitan Group; covering households in rural areas.

The Metropolitan areas comprise the 10 major towns. These include Livingstone, Lusaka urban, Kabwe urban and all the Copperbelt towns. The Metropolitan areas are further classified into Low and High Income households. All the small towns and the rural parts form the Non-Metropolitan.

In addition, a Composite Consumer Price Index series combining the three groups is also compiled. The base period for the Consumer Price Index is 1994.

Efreda Chulu (Ms)
