August, 2012

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi

INFLATION

August Inflation increases to 6.4 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), increased to 6.4 percent in August 2012, from 6.2 percent in July 2012. This means

that on average prices increased by 6.4 percent between August 2011 and August 2012. The increase is attributed to increases in food prices.

Zambia's Major Export Destinations by Commodity in July 2012

Zambia's major export destination in July 2012 was Switzerland, which accounted for 40.8 percent. The major export products to Switzerland were Cathodes and Sections of Cathodes of refined Copper accounting for 83.6 percent.

China was the second major destination of Zambia's exports accounting for 18.4

percent. The major export product to China was Copper blister (78.2 percent).

Congo DR was the third major export destination accounting for 10.1 percent. The major export product to Congo DR was Sulphuric acid; Oleum in bulk which accounted for 23.8 percent.

The fourth major destination was South Africa, accounting for 8.1 percent. The major export products to South Africa were Cathodes and sections of cathodes of refined copper (22.2 percent).

The fifth major export destination was the United Arab Emirates, accounting for 5.4 percent. The major export products to

the United Arab Emirates were Cathodes & Sections of Cathodes of refined Copper, which accounted for 90.1 percent.

These five countries collectively accounted for 82.9 percent of Zambia's total export earnings in July 2012.

Zambia's Major Import Sources by Product, July 2012*

The major source of Zambia's imports in July 2012 was South Africa, accounting for 36.7 percent. The major import products from South Africa were Other Medicaments of mixed or unmixed products for retail sale, contributing 5.3 percent to imports from this country.

The second main source of Zambia's imports in July 2012 was Congo (DR), accounting for 12.0 percent of the total value of imports. The major import products from Congo (DR) were Copper

Ores and Concentrates, accounting for 60.9 percent.

The third largest source of Zambia's imports was Kuwait, which accounted for 10.1 percent. The dominant products from Kuwait were Petroleum oils and oils obtained from bituminous minerals.

Other notable sources were China and Japan which collectively accounted for 9.1 percent to Zambia's Imports.

Import Market Shares by Regional Groupings, July and June 2012

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 52.6 percent in July 2012. Within SADC, South Africa was the major source of Zambia's imports with 69.8 percent. Other notable markets were Congo (DR), Zimbabwe, Tanzania and Malawi.

Asia was the second largest source of Zambia's imports accounting for 27.8 percent in July 2012. Within Asia, Kuwait was the dominant source of Zambia's imports with 36.3 percent in July 2012. Other notable markets were China, Japan, India and The United Arab Emirates.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest source of Zambia's imports accounting for 17.4 percent in July 2012. Within COMESA, Congo (DR) was the main source of Zambia's imports, accounting for 69.2 percent. Other sources were Egypt, Zimbabwe, Kenya and Malawi.

The European Union was the fourth largest source of Zambia's imports, accounting for 10.1 percent. Within this grouping, the United Kingdom dominated with 26.7 percent. Other notable markets were Germany, Belgium, Sweden and Netherlands.

STATISTICAL ADVERTS

ENUMERATION PHASE OF THE ECONOMIC CENSUS UNDER WAY

The field work for the enumeration phase of the Economic Census started in August 2012. CSO staff are currently in the field collecting data from about 12,000 enterprises and establishments throughout the country for the financial year 2010. All firms that were in existence in 2010 are eligible for enumeration. The firms are stratified by turnover (obtained during the listing phase of the Economic Census) into large, medium and small scale businesses.

Large and medium enterprises and establishments are being covered on a 100 percent basis while the small enterprises and establishments are being covered on a sample basis. Firms with no financial records for the year 2010 are urged to provide their best estimates for this period.

The Economic Census will provide a comprehensive measure of economic activity at aggregate and industry level. The data being collected include the number of establishments, sales, wages and salaries, number of employees, size of the establishment, capital expenditures, as well as data on the legal form of organisation and the ownership structure.

These data will be used by small and large businesses to develop business plans, identify business opportunities, define markets, assess competition, attract investment, manage sales and evaluate efficiency.

Industry professionals and economic analysts will use the economic census statistics to assess industry growth and change, and prepare economic forecasts.

The Government will use the statistics to design economic development and regulatory programmes, evaluate programme effects and prepare revenue and spending plans. The Central Statistical Office will use the statistics to develop new estimates of Gross Domestic Product (GDP), while the Bank of Zambia will use the statistics to complement the compilation of Balance of Payments statistics.

CENTRAL STATISTICAL OFFICE, MINISTRY OF LABOUR AND SOCIAL SECURITY TO CONDUCT THE 2012 LABOUR FORCE SURVEY

The Central Statistical Office (CSO) in conjunction with the Ministry of Labour and Social Security will next month be in the field collecting data for the Labour force Survey.

The Labour Force Survey (LFS) is a survey designed to measure the labour market and provide key indicators of the labour market such as employment, unemployment, underemployment and hours of work. It also provides insight into a

variety of issues related to the labour market, including the level and pattern of unemployment; and the industrial and occupational structure of the labour market.

The survey therefore seeks to examine the relationships of socio-economic factors such as education, health, social security and employment within the labour force. The specific objectives of the survey are:-

- To produce comprehensive statistical data on the composition and distribution of the labour force (economically active population) in the country.
- To determine the growth rate of the labour force.
- To identify factors that influence composition change and distribution of the labour force in the country.
- To monitor the impact of government policies and donor support on the labour market Indicators in the country.
- To provide various users with a set of reliable labour market and socio-economic indicators against which to monitor development in the country

The data collection phase of the Labour Force will be between end of September and October 2012. During this exercise, Enumerators will visit households in selected areas countrywide to list households and administer the Labour Force questionnaire to selected households. After the data collection, the office will embark on data processing and analysis. The final results of the survey will be disseminated by June 2013.
