August, 2013

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi DIRECTOR OF CENSUS AND STATISTICS

29th August, 2013

Inside this Issue

- Inflation slows down to 7.1 percent
- July 2013 records Trade Surplus
- Total Fertility Rate Continues to Decline!
- 2013 Zambia Demographic and Health Survey (ZDHS): Data collection commences countrywide
- Selected Socio -Economic Indicators

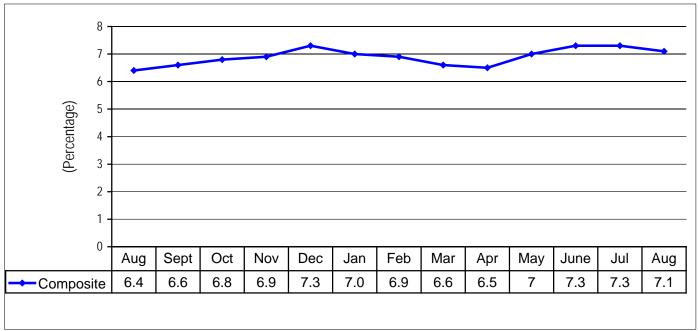

Inflation slows down to 7.1 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for August 2013 was recorded at 7.1 percent compared to the 7.3 percent recorded in July 2013. This means that on average, prices increased by 7.1 percent between August 2012 and August 2013.

The Consumer Price Index (CPI) measures changes over time in the general level of

prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 = 100).

The rate of inflation for August is the percentage change in the Consumer Price Index (CPI) over the twelve-month period from August 2012 (124.11) to August 2013 (132.87).

Annual Inflation Rate, August 2012 to August 2013

Zambia's Major Export Destinations by Commodity in July 2013

Zambia's major export destination in July 2013 was Switzerland, which accounted for 38.0 percent. The major export products were Cathodes & Sections of Cathodes of refined Copper accounting for 93.7 percent.

China was the second major destination of Zambia's exports accounting for 16.7

percent. The major export product was Copper blister (53.5 percent).

South Africa was the third major export destination accounting for 15.3 percent. The major export product to South Africa was Semi-manufactured gold, accounting for 30.1 percent. The fourth major export destination was Congo DR, accounting for 10.3 percent. The main export product was Sulphuric acid (27.8 percent).

Singapore was the fifth major export destination accounting for 4.2 percent.

The major export product was unworked Semi-precious stones, which accounted for 90.5 percent.

These five countries collectively accounted for 84.5 percent of Zambia's total export earnings in July 2013.

DEMOGRAPHIC CHARACTERISTICS

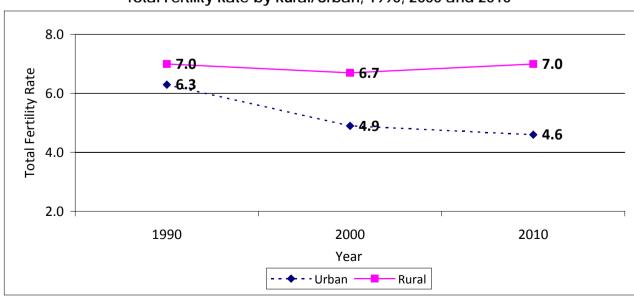

Total Fertility Rate Continues to Decline!

The 2010 Census of Population and Housing results show a decline in the average number of live births that a woman in the reproductive age group (12-49 years) would have in her life time. The total fertility rate as recoded in 2010 was 5.9. This means that the total fertility rate has dropped from 6.7 in 1990 to 5.9 in 2010.

Total Fertility Rate, All Zambia 1990, 2000 and 2010

Analysis by residence shows that the urban total fertility rate has been declining while the total fertility rate for rural areas has remained relatively the same but high. The total fertility rate in urban areas declined from 6.3 in 1990 to 4.6 in 2010.

2013 ZAMBIA DEMOGRAPHIC AND HEALTH SURVEY (ZDHS)

Data collection commences countrywide

The 2013 ZDHS is the fifth comprehensive survey to be undertaken in Zambia. The main purpose for undertaking this survey is to provide information necessary for programme managers, policymakers and implementers of various health programmes to monitor and evaluate the impact of existing programmes and to design new initiatives for health policies in the country.

This is a nationwide survey undertaken in selected areas in all the ten provinces of Zambia, namely Central, Copperbelt, Eastern, Luapula, Lusaka, Muchinga, Northern, North-Western, Southern and Western. This is a complex survey whose main phases include the following: Planning; Instrument design and development; pretest, Household Listing; Interviews main training; Data collection; Data processing; Analysis & Report Writing and Dissemination.

The six-month data collection exercise for the 2013 Zambia Demographic and Health Survey (ZDHS) commenced on 20th August 2013 in most parts of the country. This is a major milestone for the whole survey process. The data collection provides an opportunity for *data collectors* to interact with the *data suppliers* at household level. The trained data collectors are mainly staff from the Ministry of Health and Central Statistical Office.

The *data suppliers* are a major component of any survey undertaking as they provide all the information as required through the standard data collection instruments that include Household, Woman and Man questionnaires. The 2013 ZDHS questionnaires are carefully designed to collect information on: fertility, family planning, Maternal and child health, gender based violence and HIV, amongst others. While the questionnaires remain the <u>main</u> instruments for data collection, other complimentary processes in the field are:

- Testing of salt for iodine;
- Measurement of weight and height of women (15-49 years);
- Measurement of weight and height of children (under 5 years);
- Collection of dry blood samples for measurement of HIV Prevalence;
- Collection of blood samples for HIV Incidence; and
- Measurement of CD4 count.

Reasons for collecting blood during the survey

The collection of blood is being facilitated by trained HIV counselors who are observing the national VCT guidelines. All the field teams have two HIV counselors whose main role is to provide pre and post- test counseling to all participants who require to know their HIV status and their CD4 count.

The government of Zambia through the Ministry of Health and the Central Statistical Office, therefore requests all participating households and communities to cooperate with the field teams and give them the needed information freely.

Surveys/Activities being undertaken

- Population Projection based on the 2010 Census of Population and Housing
- 2010/2011 Zambia Economic Census Data Analysis
- 2013 Labour Force Survey Final Report Writing
- Data collection of the 2013 Zambia Demographic and Health Survey (ZDHS)

Available Reports

Notes:

1/Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1stMay2013.

2/Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the privates Sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
