January, 2014

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi

INFLATION

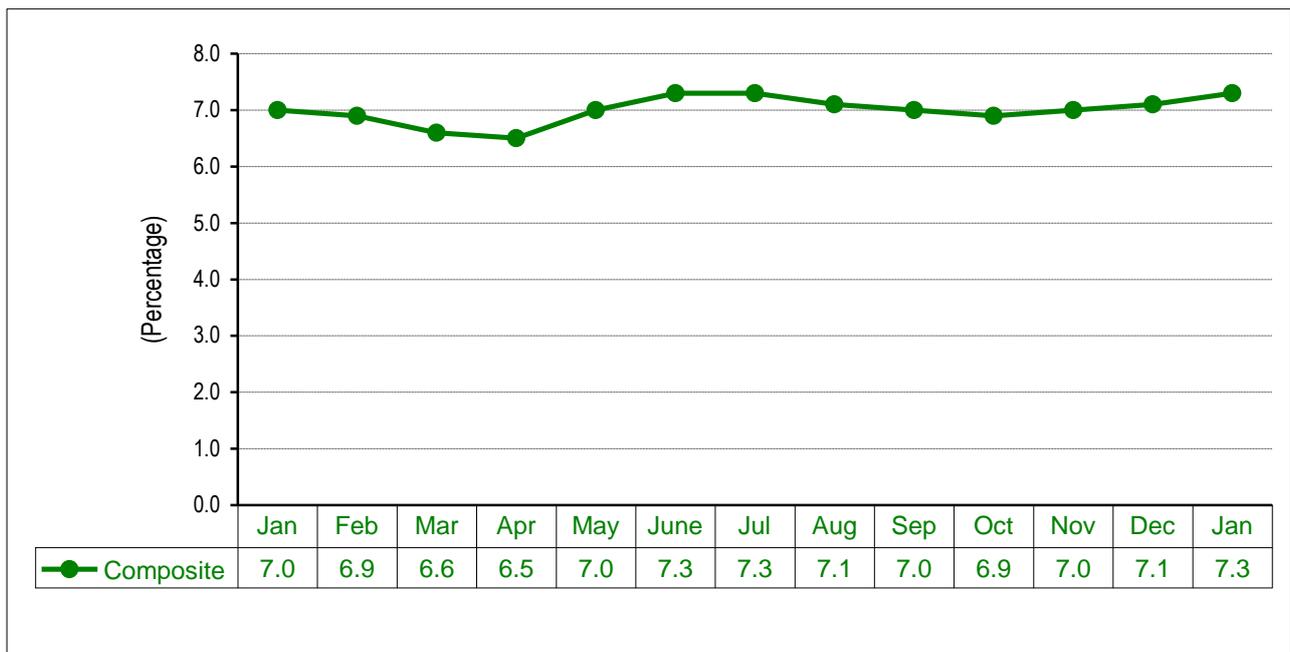

Inflation increases to 7.3 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for January 2014 was recorded at 7.3 percent compared to the 7.1 percent recorded in December 2013. This means that on average, prices increased by 7.3 percent between January 2013 and January 2014.

The overall index went up to 136.32 in January, 2014 from 127.08 in January, 2013.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

INTERNATIONAL MERCHANDISE TRADE

December 2013 records Trade Surplus

Zambia recorded a trade surplus valued at K 161 Million in December 2013 from a trade surplus of K 6 Million recorded in November 2013. This means that the country exported more in December 2013 than it imported in nominal terms.

The highest trade surplus was recorded in April 2013 at K 364 Million and the lowest was in November 2013, valued at K 6 Million.

Zambia's Major Export Destinations by Commodity in December 2013

Zambia's major export destination in December 2013 was Switzerland, which accounted for 35.7 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 95.1 percent.

China was the second major destination of Zambia's exports accounting for 21.9 percent. The major export product to China was Copper blister (63.4 percent).

The third major export destination was Congo DR, accounting for 15.4 percent. The major export product to Congo DR

was Electrical energy, accounting for 46.7 percent.

Zimbabwe was the fourth major export destination accounting for 6.3 percent. The major export products to Zimbabwe were Electrical energy (52.4 percent).

South Arica was the fifth major export destination accounting for 4.7 percent. The major export product to South Arica was Semi-manufactured gold (incl. Gold plated with platinum), non-monetary which accounted for 21.6 percent.

These five countries collectively accounted for 84.0 percent of Zambia's total export earnings in December 2013.

Zambia's Major Import Sources by Commodity in December 2013

The major source of Zambia's imports in December 2013 was South Africa, accounting for 38.1 percent. The major import products from South Africa were Structures and parts of structures, nes of iron or steel, contributing 9.4 percent. The second main source of Zambia's imports was Congo (DR), which accounted for 20.9 percent. The major import products from Congo (DR) were

Copper ores and concentrates, which accounted for 98.3 percent.

China was the third main source of Zambia's imports accounting for 9.2 percent. The major import products from China were Structures and parts of structures, nes, of iron or steel - minlead frames & super strs, accounting for 12.1 percent.

Other sources of Zambia's imports were India and Kenya, which collectively

accounted for 6.8 percent of Zambia's Imports.

Population Projections

Zambia's Population Estimated to double by 2035!

In 2010, the population of Zambia was recorded at 13,092,666 from 9,885,591 recorded in 2000. However, the population is expected to double to 26,923,658 by the year 2035.

Data shows that both male and female populations are expected to increase from 6,454,647 and 6,638,019 in 2010 to 13,319,362 and 13,604,296 in 2035, respectively.

Rural areas are expected to continue having a larger population compared to

urban areas. The population for rural areas is estimated to increase to 14,498,429 in 2035 while that of urban areas is estimated to increase to 12,425,229 in the same year.

At provincial level, Lusaka is expected to continue having the largest population of 5,465,775 by the year 2035. It will be followed by Copperbelt Province with an expected population of 3,823,642. North Western Province is expected to have the lowest population at 1,397,137.

Estimated Mid-Year Population by Province, Zambia 2011-2035.

Population Growth Rate

The population of Zambia is expected to continue growing at an average annual rate of growth of 2.8 percent during the projection period 2011-2035. In rural

areas, the population is expected to grow at an average rate of 2.4 percent per annum while in urban areas the population is expected to grow at a

declining average rate of about 3.5 percent per annum during the same period.

Annual Rate of Population Growth by Rural and Urban, Zambia 2011-2035

Source: CSO, Population and Demographic Projections, 2011-2035

The population of Zambia is expected to grow at an average rate of 2.7 percent per annum in the period 2011-2020. The population is expected to grow at an average rate of 3.4 percent per annum

in urban areas and 2.2 percent per annum in rural areas. At provincial level, Muchinga Province is expected to be the fastest growing province while Western Province is expected to be the least.

Life Expectancy at Birth

Life expectancy at birth is the number of years that a newly born baby is expected to live if the prevailing mortality conditions were to remain the same over time. In 2010, the life expectancy at birth was recorded at 51.2 years.

The life expectancy at birth is expected to increase by 8.6 years during the projection period from 52.6 years in 2011 to 61.2 years in 2035.

At provincial level, life expectancy at birth is projected to be highest in Southern Province at 64.6 years and the

lowest in Luapula Province at 57.7 years by the year 2035.

Females in Central, Copperbelt, Luapula, Lusaka and Western provinces are projected to gain 9 years or more in life expectancy at birth during the projection period. The least gain among females is projected to occur in Southern Province at 4.7 years. Males on the Copperbelt, Eastern, Luapula and Western provinces are projected to gain 9 years or more in life expectancy at birth during the same period. The least gain among males is projected to occur in North Western province at 6.0 years

Provisional

National Food Balance Sheet for Zambia for the 2013/2014 Agricultural Marketing Season Based on the 2012/2013 MAL/CSO Crop Forecasting Survey and MAL/Private Sector Utilization Estimates

(Metric Tonnes)

	Maize	Paddy Rice	Wheat	Sorghum & Millet	Sweet and Irish potatoes	Cassava flour	Total (maize equivalent)
A. Availability:							
(i) Opening stocks (1st May 2013) 1/	455,221	2,737	168,255	6,036	0	0	629,556
(ii) Total production (2012/13) 2/	2,532,800	44,747	273,584	38,914	210,392	1,114,583	3,984,553
Total availability	2,988,021	47,484	441,839	44,950	210,392	1,114,583	4,614,109
B. Requirements:							
(i) Staple food requirements:							
Human consumption 3/	1,429,739	55,769	281,321	40,540	199,872	721,901	2,533,816
Strategic Reserve Stocks (net) 4/	500,000	0	0	0	0	0	500,000
(ii) Industrial requirements:							
Stock feed 5/	223,300	0	0	0	0	0	223,300
Breweries 6/	100,000	0	0	0	0	0	100,000
Grain retained for other uses 7/	34,347	4,478	0	2,464	0	0	41,088
(iii) Losses 8/	126,640	2,237	13,679	1,946	10,520	55,729	199,228
(iv) Structural cross-border trade 9/	120,000						120,000
Total requirements	2,534,026	62,484	295,000	44,950	210,392	777,630	3,717,432
C. Surplus/deficit(A-B) 10/	453,995	-15,000	146,839	0	0	336,953	896,677
D. Potential Commercial exports 11/	-453,995	15,000	-146,839	0	0	0	0
E. Food aid import requirements 12/	0	0	0	0	0	0	0

Source: Crop Forecasting Survey (CFS) 2012/13

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2013.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private Sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
