February, 2015

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

Inflation decreases to 7.4 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for February 2015 was recorded at 7.4 percent compared to 7.7 percent recorded in January, 2015. This means that on average, prices increased by 7.4 percent between February 2014 and February 2015.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Exports by Major Product Categories, January 2015 and December 2014

Zambia's major export products in January 2015 were from the intermediate goods category (mainly comprising copper cathodes and sections of refined copper) accounting for 84.6 percent. Other exports were from the Consumer goods; Raw materials; and Capital goods categories, which collectively

accounted for 15.4 percent of total exports in January 2015. This implies that between January 2015 and December 2014, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, which on average accounted for 86.2 percent of the total exports.

Zambia's Top 25 Non-Traditional Exports (NTEs), January 2015 and December 2014

Zambia's major Non-Traditional Exports (NTEs) for the month of January 2015, were Sulphuric acid; oleum in bulk which accounted for 26.8 percent. Maize (excl. seed) was the second largest NTE in January 2015, accounting for 11.2 percent.

Other notable NTEs, in January 2015 were Semi-manufactured gold (incl. gold plated with platinum), non-monetary (4.1percent), Wire of refined copper, maximum cross-sectional dimension >6mm (3.0 percent) and other raw cane sugar (2.9 percent).

Zambia's Major Export Destinations by Commodity in January 2015

The major export destination in January 2015 was Switzerland, which accounted for 34.6 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 90.6 percent.

China was the second major destination of Zambia's exports accounting for 17.6 percent. The major export product to China was Copper blisters (74.8 percent).

The third major export destination was Congo (DR) accounting for 13.8 percent. The major export product to Congo (DR) was Sulphuric acid; oleum in bulk accounting for 55.7 percent.

Singapore was the fourth major export destination accounting for 10.3 percent. The major export products to Singapore were Cathodes & Sections of Cathodes of refined Copper (100.0 percent).

South Africa was the fifth major export destination accounting for 7.8 percent. The major export product to South Africa was Cathodes & Sections of Cathodes of refined Copper accounting for 31.2 percent.

These five countries collectively accounted for 84.2 percent of Zambia's total export earnings in January 2015.

Export Market Shares by Regional Groupings, January 2015 and December 2014

Asia was the largest market for Zambia's total exports, accounting for 31.2 percent in January 2015. Within Asia, China dominated the export market, accounting for 56.3 percent. Other notable markets in Asia were Singapore, Japan, Hong Kong and South Korea.

The Southern African Development Community (SADC) regional grouping was the second market for Zambia's total exports, accounting for 28.5 percent in January 2015. Within SADC, Congo (DR) was the dominant market with 48.4 percent. Other notable markets in SADC were South Africa, Zimbabwe, Malawi and Tanzania.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 20.4 percent in January 2015. Within COMESA, Congo (DR) was the dominant market with 67.7 percent. Other notable markets in COMESA were Zimbabwe, Kenya, Malawi, and Angola.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 1.3 percent in January 2015. Within the EU, Luxembourg was the dominant market with 38.1 percent. Other notable markets were The United Kingdom, Netherlands, Germany and Denmark.

Zambia's Major Import Sources by Commodity in January 2015

The major source of imports in January 2015 was South Africa, accounting for 29.4 percent. The major import product from South Africa was Structures and parts of structures, nes, of iron or steel - minlead frames & super strs, contributing 7.1 percent.

The second main source of Zambia's imports was China which accounted for 17.9 percent. The major import products from China were Ceramic electrical insulators, which accounted for 8.0 percent.

Congo DR was the third main source of Zambia's imports accounting for 8.8percent. The major import products from Congo DR were Copper ores and concentrates, accounting for 71.6percent.

Other sources of Zambia's imports were Kenya and India, which collectively accounted for 10.6percent of Zambia's Imports.

Import Market Shares by Regional Groupings, January 2015 and December 2014

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 43.6 percent in January 2015. Within SADC, South Africa was the major source of Zambia's imports with 67.3 percent. Other notable markets were Congo DR, Zimbabwe, Mauritius, and Namibia

Asia was the second largest source of Zambia's imports accounting for 36.4 percent in January 2015. Within Asia, China was the main source of Zambia's imports with 49.2 percent. Other notable markets were India, United Arab Emirates, Singapore and Japan.

The Common Market for Eastern and Southern Africa (COMESA) regional grouping was the second largest source of imports accounting for 17.8 percent. Within COMESA, Congo DR was the main source of Zambia's imports, accounting for 49.1percent. Other notable markets were Kenya, Zimbabwe, Mauritius and Egypt.

The European Union was the fourth largest source of Zambia's imports accounting for 9.5 percent. Within this grouping, the United Kingdom was the main source of Zambia's imports with 22.7percent. Other notable markets were France, Finland, Germany and Belgium.

Where Does Zambia's Copper Go?

There have been media reports during the month of February 2015, on Zambia's Copper Exports destinations. The following article provides an insight on how CSO compiles imports and exports data.

CSO's brief on Copper Exports

Composition of Zambia's Exports

The structure of Zambia's exports is mainly in two parts; Traditional Exports (*mainly metals*) and Non Traditional Exports. Metals (*i.e. Copper and Cobalt*) account for about 78 percent of total exports annually with the remaining 22 percent attributed to NTEs.

Since metals are the main revenue earners, it is important to monitor their performance on a regular basis. At CSO, this is done on monthly basis through the Survey of Major Exporters and Importers of selected goods of economic importance.

Note: Mines are surveyed on 100% basis; most of them actually indicate on our questionnaires that Switzerland and China are the main destinations of copper exports.

❖ This survey data validates data declared to ZRA by traders.

Data Collection, Processing and Compilation

Data collection and compilation is guided by the United Nations Statistics Division compilers manual on International Merchandise Trade Statistics (IMTS) 2010.

Sources of Trade Statistics

Customs (major source): The Zambia Revenue Authority (ZRA) through the Customs Exercise Division.

Non-Customs: (not subjected to customs surveillance), like in the case of electricity exports data for electricity exports are obtained from Zambia Electricity Supplying Company (ZESCO)

Enterprise Surveys (*Survey of Major Importers and Exporters*): During the survey process, traders (exporters/importers) provide data through a structured questionnaire provided by CSO; and key variables answered to are:

- (i). Exporter Name,
- (ii). Main items Traded in,
- (iii). Trading Partners (Source and final destination)
- (iv). Values of Imports/Exports,
- (v). Unit of Measure
- (vi). Quantities Traded in,
- (vii). Net Weight/Gross Weight
- (viii). Type of Packaging.

Data Processing:

1. Data is initially captured and processed at Zambia Revenue Authority (ZRA) using (ASYCUDA++) and (ASYCUDA WORLD), and then an electronic dataset is submitted to Central Statistical Office (CSO) for further processing using the EUROTRACE software which is compatible with Asycuda++ and Asycuda World, to process data received every month.
2. During the trade data management process the structure of ASYCUDA remains unchanged; only statistical procedures are implemented. Data from the Survey of Mines is incorporated in the master trade file and arranged by trader (exporter/importer) and partner country (Country of origin/Country of Last Known Destination) among others.

Partner Country Attribution:

- (i). **Exports** are classified by ***the country of final destination***, i.e. the country to which goods are actually dispatched, with or without breaking bulk in the course of transport, *without commercial transaction in any intermediate country*. Goods exported **over land frontiers** are classified, where possible, to the country of consignment; but where this cannot be ascertained, they are classified, where possible, to the country of immediate shipment.
- (ii). **Imports** are classified to the country of origin.

Valuation of Exports and Imports

Exports: Exports are valued on free on board basis (fob); meaning the transaction value is the value at which the exports are sold by the exporter, including the cost of transportation up to the border/frontier of exporting country.

Imports: Imports are valued on cost insurance freight basis (c.i.f), meaning the transaction value is the value at which goods were purchased by the importer

plus the cost of transportation and insurance to the frontier of the importing country

Beyond the Borders – What Happens after Copper Exports?

Zambia's exports are reported as free on board (fob) up to the port of exit. This means that Zambia has no further control on the goods once they cross the frontier. For example, copper en-route to the Asian market or Europe while on the high seas can be SOLD (RE-EXPORTED) by the importer/trader to a different destination. Zambia will have no record of such a transaction for as long as the initial importer does not declare it.

In addition, middle men based in a different country/territory tend to report their country of residence as the country of final destination when in actual fact they **re-export** the commodity directly to other markets.

Trends in Exports of Copper, 2010 to 2014

The top four major buyers of Zambia's copper in order of ranking were Switzerland (61.1%), China (25.6%), United Kingdom (2.8%) and South Africa (2.6%) share of total copper export earnings annually.

Zambia's Major Copper Destinations, (2010 - 2014)

Period	2010		2011		2012		2013		2014		Period Average

Saudi Arabia	23,877,068	0.5	11,493,616	0.2	3,621,473	0.1	5,059,754	0.1	0	0	0.18
Other	188,650,783	3.8	137,552,685	2.1	126,628,760	2	295,954,787	4.3	830,297,852	11.6	4.76
Total Copper	4,959,338,190	100	6,670,589,393	100	6,287,829,051	100	6,822,028,872	100	7,160,848,519	100	100

Conclusion

It is important to note that since Zambia's exports are valued at free on board (fob), the country has no further control on the copper beyond its economic frontiers.

Other players like middle men/merchants come into play and the commodity could be traded/sold while on the high seas, to a different destination, meaning information related to this transaction will be LOST as long as the importer does not declare it.

LAYMAN & STATISTICS

Domestic Exports: These are goods originating from the exporting countries.

Re-exports: This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

Trade Surplus: this is a situation where a country is exporting more than it is importing in value terms.

Trade Deficit: It is a situation where a country is importing more than it is exporting in value terms.

SITC: Stands for Standard International Trade Classification. It is a trade statistical nomenclature mainly used in trade statistical analysis.

D. Potential Commercial exports 11/	-453,995	15,000	-146,839	0	0	0	0
E. Food aid import requirements 12/	0	0	0	0	0	0	0

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket). The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private Sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
