## Central Statistical Office

Volume 144

Website: [www.zamstats.gov.zm](http://www.zamstats.gov.zm)

April, 2015

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

# INFLATION

## Inflation remains at 7.2 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for April 2015 was recorded at 7.2 percent. This means that on average, prices increased by 7.2 percent between April 2014 and April 2015.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

### Annual Inflation Rate, April 2014 to April 2015

### Exports by Major Product Categories, March and February 2015

Zambia's major export products in March 2015 were from the intermediate goods category (mainly comprising copper cathodes and sections of refined copper) accounting for 82.2 percent. Other exports were from the Consumer goods, Raw materials and Capital goods, which collectively accounted for 17.8

percent of total exports in March 2015. This implies that between March and February 2015, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, which on average accounted for 81.1 percent of the total exports.

### Zambia's Major Export Destinations by Commodity in March 2015

The major export destination in March 2015 was Switzerland, which accounted for 31.5 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 91.3 percent.

China was the second major destination of Zambia's exports accounting for 15.5 percent. The major export product to China was Copper blisters (77.2 percent).

South Africa was the third major export destination accounting for 13.1 percent. The major export products to South Africa were Cathodes & Sections of Cathodes of refined Copper (43.8 percent).

The fourth major export destination was Congo DR accounting for 12.2 percent. The major export product to Congo DR was Sulphuric acid; oleum in bulk accounting for 43.1 percent.

Singapore was the fifth major export destination accounting for 11.2 percent. The major export product to Singapore was Cathodes & Sections of Cathodes of refined Copper accounting for 77.8 percent.

These five countries collectively accounted for 83.6 percent of Zambia's total export earnings in March 2015.

### Export Market Shares by Regional Groupings, March and February 2015

Southern African Development Community (SADC) regional grouping was the largest market for Zambia's total exports, accounting for 32.0 percent in March 2015. Within SADC, South Africa was the dominant market with 41.1 percent. Other notable markets in SADC were Congo DR, Zimbabwe, Namibia and Malawi.

Asia was the second largest market for Zambia's total exports, accounting for 30.3 percent in March 2015. Within Asia, China dominated the export market, accounting for 51.3 percent. Other notable markets in Asia were Singapore, Hong Kong, Japan and Korea Republic.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 17.1 percent in March 2015. Within COMESA, Congo DR was the dominant market with 71.3 percent. Other notable markets in COMESA were Zimbabwe, Malawi, Kenya and Mauritius.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 0.8 percent in March 2015. Within the EU, United Kingdom was the dominant market with 47.3 percent. Other notable markets were Netherlands, Germany, Belgium and Sweden.

## Import Market Shares by Regional Groupings, March and February 2015

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 50.2 percent in March 2015. Within SADC, South Africa was the major source of Zambia's imports with 71.6 percent. Other notable markets were Congo DR, Zimbabwe, Namibia and Mauritius.

Asia was the second largest source of Zambia's imports accounting for 34.9 percent in March 2015. Within Asia, China was the main source of Zambia's imports with 34.9 percent. Other notable markets were India, Kuwait, United Arab Emirates and Japan.

The Common Market for Eastern and Southern Africa (COMESA) regional grouping was the third largest source of imports accounting for 13.1 percent. Within COMESA, Congo (DR) was the main source of Zambia's imports, accounting for 67.7 percent. Other notable markets were Zimbabwe, Mauritius, Kenya, and Egypt.

The European Union was the fourth largest source of Zambia's imports accounting for 8.2 percent. Within this grouping, the United Kingdom was the main source of Zambia's imports with 29.6 percent. Other notable markets were France, Sweden, Denmark, and Finland.

# THE 2013-14 ZAMBIA DEMOGRAPHIC AND HEALTH SURVEY RESULTS RELEASED!

The 2013-14 Zambia Demographic and Health Survey (ZDHS) results were officially released on 30<sup>th</sup> March 2015 during a National Dissemination Seminar held in Lusaka. The ZDHS is designed to provide data for monitoring the population and health situation in Zambia.

This is the fifth demographic and Health Survey conducted in Zambia since 1992. The objective of the survey is to provide information on levels and trends in fertility,

childhood mortality, use of family planning methods and maternal and child health indicators including HIV/AIDS that can be used by programme managers and policymakers to evaluate and improve existing programmes and health policies in Zambia.

For the purpose of measuring the above objectives, the ZDHS questionnaire covered the following topics:

- *Housing Characteristics and Household Population*
- *Characteristics of Respondents*
- *Marriage and Sexual Activity*
- *Fertility*
- *Fertility Preferences*
- *Family planning*
- *Instant and Child Mortality*
- *Maternal Health*
- *Child Health*
- *Nutrition of Children and Women*
- *Malaria*
- *HIV/AIDS Related Knowledge, Attitudes and Behaviour*
- *HIV Prevalence*
- *Adult and Maternal Mortality*
- *Women's Empowerment and Demographic and health Outcomes*
- *Domestic Violence*

The ZDHS report is available in both hard and soft copy. Both Hard and soft copies of the ZDHS can be accessed from the CSO Dissemination Office and the soft

copy can also be accessed online on [www.zamstats.gov.zm](http://www.zamstats.gov.zm) and <http://dhsprogram.com/data/available-datasets.cfm>.

## UPDATE ON THE 2014 LABOUR FORCE SURVEY

In 2014, the Central Statistical Office (CSO) conducted the fifth Labour Force Survey (LFS) to provide an update on the labour statistics compiled in the previous LFS's of 1986, 2005, 2008 and 2012. The final 2014 LFS report would be disseminated to the public by June 2015.

The CSO has advanced in its implementation of the 2014 LFS having concluded the data collection, data cleaning and tabulation in April 2015. The office has now embarked on the analysis of the data which will lead to the production of statistics on the current status of the labour market.

The Labour Force Survey provides key indicators of the labour market such as

the unemployment, employment, participation rate and underemployment. It is also used to measure and estimate social and economic indicators such as population size and distribution, education, literacy, income and wages. The LFS data also allows the office to produce detailed reports on various topics such as child labour, formal and informal sector employment and income distribution in the economy etc.

In addition, the LFS is an important tool in the monitoring and evaluation of labour market policies and other related policies.

## LAYMAN & STATISTICS

**Domestic Exports:** These are goods originating from the exporting countries.

**Re-exports:** This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

**Trade Surplus:** this is a situation where a country is exporting more than it is importing in value terms.

**Trade Deficit:** It is a situation where a country is importing more than it is exporting in value terms.

**SITC:** Stands for Standard International Trade Classification. It is a trade statistical nomenclature mainly used in trade statistical analysis.

**Notes:**

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket). The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
