Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INTERNATIONAL MERCHANDIZE TRADE STATISTICS

The Central Statistical Office through the External Trade Statistics Branch have for some time now been collaborating with the Mineral Value Chain Project; which is housed at the New CSO building in the area of improving the quality of mineral production and trade statistics. It is in this light that this time around, international trade highlights will not be presented for the month of March 2017 in order to allow for on-going quality improvements to be effected for the period January 2017 to date. This entails that revisions on mineral production and trade statistics will be made from January 2017 onwards.

Nonetheless, International Merchandize Trade Statistics highlights will be presented next month covering the period January to April 2017, after effecting the necessary quality improvements.

PRELIMINARY 2016 ANNUAL AND QUARTERLY GROSS DOMESTIC PRODUCT ESTIMATES

The **Preliminary** Annual Gross Domestic Product at constant 2010 prices for the year 2016 was estimated at K129,273.7 million compared to K125,003.4 million in 2015. This shows that the economy grew by 3.4 percent in the year 2016 compared to 2.9 percent recorded in 2015. Industries with significant growth rates were; Information and communication industry (18.7 percent), Public Administration & Defence (9.9 percent), Construction (9.3 percent) and Mining & quarrying (7.0 percent).

In terms of contribution to the total growth of 3.4 percent, Construction industry had the highest contribution accounting for 0.9 percentage points. This was followed by Mining & quarrying industry (0.7 percentage points) and Information and communication industry (0.6 percentage points). However, Electricity generation, Transport & storage and Financial & insurance Industries contributed negatively to the total growth in the period under review.

2014 PROVINCIAL GROSS DOMESTIC PRODUCT

In 2010, CSO conducted the Economic Census and one of the objectives was to produce Provincial Gross Domestic Product (GDP) estimates. Provincial GDP requires that data is collected at establishment level (branches/agents). However, during the Economic Census the Office encountered a lot of challenges in accessing financial accounts at establishment level as reliable data could only be obtained at enterprise level through consolidated accounts.

Meanwhile, the demand for provincial GDP estimates has continued to increase, hence the need for the office to disaggregate national level GDP estimates using available provincial indicators to come up with provincial GDP estimates. In doing so, CSO used practical guidelines from the 2008 System of National Accounts (SNA2008) and 2013 Eurostat manual on Regional Accounts Methods. This is the first **official** release of Provincial GDP by production at **current prices** only.

2014 PROVINCIAL GDP SHARES

Of the total 2014 GDP estimate of K167,052.5 million, Copperbelt province had the highest percentage share at 29.3 percent, followed by Lusaka province with 27.2 percent. These

two provinces collectively accounted for 56.5 percent of the total GDP. Luapula Province had the least share of the total GDP accounting for 2.7 percent.

PERCENTAGE DISTRIBUTION OF INDUSTRIAL ACTIVITIES ACROSS PROVINCES, 2014.

Results show that Copperbelt and Lusaka provinces dominated in most of the industrial activities. Agriculture, Forestry & Fishing industry was largely dominated by Central, Eastern, Southern and Copperbelt Provinces

contributing 20.9, 16.9, 16.9 and 15.3 percent, respectively. The Mining industry was driven by Copperbelt and North-Western Provinces contributing 59.0 and 38.6 percent, respectively.

PERCENTAGE DISTRIBUTION OF INDUSTRIAL ACTIVITIES WITHIN EACH PROVINCE, 2014.

The data shows industry value added percentage shares to the total provincial GDP at current prices. In most provinces, Wholesale & retail trade industry was the major industry contributing more than 20 percent to the respective Provincial GDPs except for Copperbelt, North-Western

and Southern provinces. It is worth noting that Copperbelt and North-western provinces were dominated by Mining and quarrying at 29.4 and 69.4 percent, respectively. Southern Province was dominated by Electricity generation at 22.8 percent.

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2016

2/ Production estimates by MoA/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470 kCal/person/day, CSO) of total diet (2,100 kCal/person/day, National Food and Nutrition Commission), for the national population of 14.58 million people (based on CSO Census projections with 2016 and 2017 average population used). The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA.(this amount of 500,000 Mt includes equivalent quantity that is already budgeted for)

5/Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post-harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2015/16 marketing season. It does not include Formal trade.

10/Expected surpluses' or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

11/Commercial imports/exports represent expected regional and international trade by the private sector. been harvested

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested

12/Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
