FOREWORD

Welcome to the Monthly presentation organised by the Dissemination Branch of the Zambia Statistics Agency. The Agency embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The Agency produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of development programmes.

This Monthly publication is an attempt to provide highlights of the work of the Agency and how it can help media institutions and the general public to make use of data and information for decision-making and sustainable national development.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

CONSUMER PRICE INDEX

Year on Year Inflation Rate for July 2020 slows down to 15.8 Percent

The year- on- year (Annual)inflationrate as measured by the all items Consumer Price Index (CPI) for July 2020 decreased to 15.8 percent from 15.9 percent recorded in June 2020 (**see Figure 1**). This means that on average, prices of

goods and services increased by 15.8 percent between July 2019 and July 2020.

The decrease in the annual rate of inflation was attributed to price decreases in food items.

Figure 1: Annual Inflation Rates (%), July 2019 - July 2020

Source: ZamStats Prices Statistics, 2020

Note: 2009=100

Year to-Date Inflation Rate, July 2020

The Year- to- Date inflation was recorded at 9.7 percent in July 2020; higher than that of the corresponding period in 2019 of 5.8 percent. This means that, the average prices of goods and

services increased at a faster rate in 2020 compared to the same period in 2019 (**see Figure 2**).

Figure 2: Year to Date Inflation Rates, July 2019 and 2020

(December 2018, 2019 =100)

Year on Year Food and Non-Food Inflation Rate

The year-on-year food inflation rate for July 2020 was recorded at 16.1 percent compared to 16.3 percent recorded in June 2020, indicating a decrease of 0.2 percentage points. This development was mainly attributed to reductions in prices of food items such as cereals (Breakfast mealie meal, Roller mealie meal, Maize grain, Samp) and Vegetables (Rape, Tomatoes, Cabbage, Onion) (see Figure 3).

The year-on-year non-food inflation rate for July 2020 was recorded at 15.4 percent compared to 15.5 percent recorded in June 2020, indicating a decrease of 0.1 percentage points. This means that on average, prices of non-food items increased by 15.4 percent between July 2019 and July 2020. The slowing down in the year-on-year non-food inflation rate was attributed to price movements of Purchase of Motor Vehicles. (see Figure 3).

Annual Inflation Rate by CPI Main Groups

The Annual Rate of Inflation for July 2020 increased for the following CPI Main Groups

1. Alcoholic Beverages and Tobacco

The CPI for the Alcoholic Beverages and Tobacco main group increased by 11.5 percent between July 2019 and July 2020. This means that prices of items in this group increased by 11.5 percent in July 2020 compared to 6.7 percent in the same month of 2019.

A comparison of the annual inflation rates for June 2020 and July 2020 for this group showed an increase from 10.8 percent to 11.5 percent. (see Table 1).

2. Clothing and Footwear

The CPI for the Clothing and Footwear main group increased by 8.8 percent between July 2019 and July 2020. This means that prices of items in this group increased by 8.8 percent in July 2020 compared to 6.4 percent in the same month of 2019.

A comparison of the annual inflation rates for June 2020 and July 2020 for this group showed an increase from 8.2 percent to 8.8 percent.

3. Housing, Water, Electricity, Gas, & Other Fuels

The CPI for the Housing, Water, Electricity, Gas, & Other Fuels group increased by 18.4 percent between July 2019 and July 2020. This means prices of items in this group increased by 18.4 percent in July 2020 compared to 5.9 percent in July 2019.

Furthermore, a comparison of the annual inflation rates for June 2020 and July 2020 for this group showed an increase from 18.2 percent to 18.4 percent (see Table 1).

4. Health

The CPI for the Health main group increased by 12.4 percent between July 2019 and July 2020. This means that on average, prices of items in this group increased by 12.4 percent in July 2020

compared to 7.1 percent in the same month of 2019.

Furthermore, a comparison of the annual inflation rates for June 2020 and July 2020 for this

group showed an increase from 11.9 percent to 12.4 percent **(see Table 1)**.

The Annual Rate of Inflation for July 2020 slowed down for:

1. Food and Non-alcoholic Beverages

The CPI for the Food and Non-alcoholic beverages main group increased by 16.1 percent between July 2019 and July 2020. This means that prices of items in this group increased by 16.1 percent in July 2020 compared to 9.3 percent in the same month of 2019.

Furthermore, a comparison of the annual inflation rates for June 2020 and July 2020 for this group showed a decrease from 16.3 percent to 16.1 percent **(see Table 1)**.

2. Transport

The CPI for the Transport main group increased by 34.1 percent between July 2019 and July 2020. This means that prices of items in this group increased by 34.1 percent in July 2020 compared to 21.5 percent in the same month of 2019.

A comparison of the annual inflation rates for June 2020 and July 2020 for this group showed a decrease from 35.3 percent to 34.1 percent **(see Table 1)**.

3. Communication

The CPI for the Communication main group increased by 1.6 percent between July 2019 and July 2020. This means that on average

prices of items in this group increased by 1.6 percent in July 2020 compared to 0.9 percent in the same month of 2019.

Furthermore, a comparison of the annual inflation rates for June 2020 and July 2020 for this group showed a decrease from 2.3 percent to 1.6 percent **(see Table 1)**.

4. Recreation and Culture

The CPI for the Recreation and Culture main group increased by 8.0 percent between July 2019 and July 2020. This means that on average prices of items in this group increased by 8.0 percent in July 2020 compared to 7.6 percent in the same month of 2019.

A comparison of the annual inflation rates for June 2020 and July 2020 for this group showed a decrease from 8.8 percent to 8.0 percent.

5. Miscellaneous Goods and Services

The CPI for the Miscellaneous goods and services main group increased by 10.2 percent between July 2019 and July 2020.

A comparison of the annual inflation rates for June 2020 and July 2020 for this group showed a decrease from 10.6 percent to 10.2 percent **(see Table 1)**.

The Annual Rate of Inflation for July remained the same for;

1. Furnishing, Household Equipment and Household Maintenance

The CPI for the Furnishing, Household Equipment and Household Maintenance main group Increased by 12.3 percent between July 2019 and July 2020. This means that prices of items in this group increased by 12.3 percent in July 2020 compared to 6.2 percent in the same month of 2019.

The annual inflation rate for this group remained the same in July 2020 as in June 2020 at 12.3 percent (see Table 1).

2. Education

The CPI for the Education main group increased by 1.7 percent between July 2019 and July 2020. This means that on average prices of items in this group increased by 1.7 percent in July 2020 compared to 5.5 percent in the same month of 2019.

The annual inflation rate for this group remained unchanged in July 2020 as in June 2020 at 1.7 percent (see Table 1).

3. Restaurant & Hotel

The CPI for the Restaurant & Hotel CPI main group increased by 8.9 percent between July 2019 and July 2020. This means prices of items in this group increased by 8.9 percent in July 2020 compared to 7.6 percent in the same month of 2019.

The annual inflation rate for this group remained the same in July 2020 as in June 2020 at 8.9 percent (see Table 1).

Contribution of Main Groups to Overall Inflation

Of the overall 15.8 percent annual inflation rate recorded in July 2020, the Food and Non-alcoholic beverages group accounted for 8.6 percentage points, while Non-food items accounted for 7.2 percentage points. Of the 7.2 percentage points, the Transport group

contributed the highest at 2.4 followed by Housing, Water, Electricity, Gas and other fuels which contributed 2.3 percentage points. The rest Non Food groups accounted for the 2.5 percentage points (**see Table 2**).

Provincial Annual Inflation Rates

A disaggregation of the annual inflation rate by province shows that the annual inflation rate for July 2020 increased for Central, Eastern, Luapula, and Southern provinces.

Annual inflation decreased for Copperbelt, Lusaka, Northern and Northwestern provinces.

The annual rate of inflation remained the same for Western province.

Provincial changes in annual inflation rate show that between July 2019 and July 2020, Northern province had the highest rate of annual inflation at 19.8 percent, followed by Central at 18.1 percent.

Eastern province recorded the lowest annual rate of inflation at 12.3 percent (**see Table 3**).

Provincial Contribution to Overall Inflation

At provincial level, Lusaka province made the highest contribution of 5.0 percentage points to the overall annual inflation rate of 15.8 percent recorded in July 2020. This implies that the price movements in Lusaka Province had the highest influence to the overall annual rate of inflation.

Copperbelt province had the second highest contribution of 3.0 percentage points while North Western province had the lowest contribution of 0.5 percentage points (see Table 4).

Table 4: Provincial Contribution to Overall Inflation, July 2019 - July 2020 (%)

*Note: Figures may not add up due to rounding off

July 2020 Month on Month Inflation Rate Increases to 0.3 Percent

The month on month (monthly) inflation rate for July 2020, was recorded at 0.3 percent indicating an increase of 0.1 percentage points from 0.2 percent recorded in June 2020 (**see Figure 4**). This means that on average, prices of

goods and services increased by 0.3 percent between June 2020 and July 2020.

The increase in the monthly inflation rate was attributed to general price movements of food items.

Figure 4: Month on Month Inflation Rate, July 2019 - July 2020(%)

Source: ZamStats, Prices Statistics, 2020

Month on Month Inflation Rates for Food and Non-Food Items, July 2019 - July 2020

The monthly food inflation rate for July 2020 was recorded at 0.2 percent indicating an increase of 0.8 percentage points from -0.6 percent recorded in June 2020. This means that on average, prices of food items increased by 0.2 percent between June 2020 and July 2020. This development was mainly attributed to increases in prices of food items such as Fish (Frozen fish, Bukabuka, Fresh kapenta, Dried Bream, Dried kapenta), Eggs, Fresh milk, Sugar and Jam.

Non-Food inflation rate for July 2020 was recorded at 0.5 percent, indicating a decrease of 0.6 percentage points from the 1.1 percent recorded in June 2020. This development was mainly attributed to price movements of Purchase of Motor Vehicles (**see Table 5**).

INTERNATIONAL MERCHANDIZE TRADE

June 2020 records a Trade Surplus

Zambia recorded a trade surplus valued at K1,561.8 million in June 2020 from K3,843.4 million recorded in May 2020, indicating a 59.4 percent decrease. This trade surplus means that the country exported more than it imported in nominal terms.

Exports which mainly comprise of domestically produced goods, decreased by 11.5 percent from K10,524.5 million in May 2020 to K9,317.2 million in June 2020 (see Table 8). This decrease was mainly on account of an 18.6 percent decrease in export earnings from Intermediate goods.

Imports increased by 16.1 percent from K6,681.1 million in May 2020 to K7,755.4 million in June 2020 (see Table 8). This increase in imports was mainly as a result of a 29.1 percent and 54.3 percent increase in imports of Capital goods and Raw materials, respectively.

The Total trade for the period January to June 2020 increased by 5.4 percent to K96,864.8 million from K 91,888.2 million recorded in the same period of 2019 (see Figure 4).

Performance of Traditional and Non-Traditional Exports, June 2020 and May 2020

The Traditional Exports (TE's) earnings decreased by 17.7 percent from K8,261.2 million in May 2020 to K6,797.5 million in June 2020. In terms of share in total exports, TE's accounted for 73.0 percent revenue earnings in June 2020. NTEs

earnings increased by 11.3 percent from K2,263.3 million in May 2020 to K2,519.7 million in June 2020. In terms of share in total exports, NTEs recorded a 27.0 percent in June 2020 (**see Table 9**).

Exports of Copper by Volume and LME Prices, June 2020 and May 2020

The volume of Refined Copper exported in June 2020 decreased by 25.8 percent from 82,287.5 metric tonnes in May to 61,052.6 metric tonnes.

The Copper prices on LME market for the corresponding months increased by 9.7 percent from US\$5,233.8 per metric tonne in May 2020 to US\$5,742.4 per metric tonne in June 2020 (see Figure 5).

Zambia's Major Non-Traditional Exports, June 2020 and May 2020

For the purpose of this analysis, Non-Traditional Exports are divided into Agricultural and Non-Agricultural products.

Agricultural Products

Agricultural products accounted for a share of 34.6 percent of Zambia's Non-Traditional Exports (NTEs) in June 2020 compared to 22.8 percent recorded in May 2020.

The export earnings from Agricultural products increased by 68.8 percent from K515.7million in May 2020 to K870.6 million in June 2020. The major export commodities were 'Other raw cane sugar' accounting for 21.8 percent, 'Tobacco, not stemmed/stripped' (17.1 percent) and 'Groats and meal of maize corn' (6.0 percent).

Non-Agricultural Products

Non-Agricultural products accounted for a share of 65.4 percent of Zambia's Non-Traditional Exports (NTEs) in June 2020 compared to 77.2 percent recorded in May 2020.

The export earnings from Non-Agricultural products recorded a decrease of 5.6 percent from K1,747.7 million in May 2020 to K1,649.1 million in June 2020. The major export commodities were 'Bullion semi-manufactured forms (Gold)' accounting for 6.8 percent, 'Portland cement (excl. white)' (6.0 percent) and 'Other non-alcoholic beverages' (5.9 percent) (see Table 10).

Exports by Major Product Categories, June 2020 and May 2020

Zambia's major export products in June 2020 were from the intermediate goods category (mainly comprising Copper anodes for electrolytic refining and Copper blister) accounting for 75.6 percent.

Exports from the Consumer goods, Raw Materials and Capital goods categories, collectively accounted for 24.4 percent of Total exports in June 2020 (see Figure 6).

Zambia's Major Export Destinations by Commodity in June 2020

The major export destination in June 2020 was Switzerland, which accounted for 47.5 percent of the total export earnings. The main export commodity to Switzerland was Copper anodes for electrolytic refining, accounting for 62.9 percent of total export earnings from that country.

Congo DR was the second main export destination accounting for 18.0 percent of the total export earnings. The major export commodity was Copper concentrate sulphide, accounting for 26.9 percent of total export earnings from that country.

Singapore was the third main destination of Zambia's exports accounting for 12.0 percent of the total export earnings. The major export commodity to Singapore was Copper anodes for electrolytic refining, accounting for 68.6 percent of total export earnings from that Country.

China was the fourth main export destination accounting for 7.9 percent of the total export earnings. The major export commodity was Electro-won copper cathodes (High Purity), accounting for 37.1 percent of total export earnings from that country.

South Africa was the fifth main export destination accounting for 4.2 percent of the total export earnings. The major export products were Bullion semi-manufactured forms (Gold), accounting for 28.7 percent of total export earnings from that country.

These five countries collectively accounted for 89.7 percent of Zambia's total export earnings in June 2020 (see Table 11).

Zambia's Top Five Non-Traditional Export Destinations by Product in June 2020

The major NTEs destination in June 2020 was Congo DR, which accounted for 48.7 percent of the total Non-Traditional Export earnings. The main NTE product to Congo DR was, Other raw cane sugar, accounting for 8.5 percent of total NTEs earnings from that country.

South Africa was the second main destination of Zambia's NTEs accounting for 11.1 percent of the total NTEs earnings. The major NTE product to South Africa was Bullion semi-manufactured forms (Gold) accounting for 40.2 percent of total NTEs earnings from that Country.

Malawi was the third main NTEs destination accounting for 10.4 percent of the total NTEs earnings. The major NTE products was Tobacco, not stemmed/stripped accounting for 56.9 percent of total NTEs earnings from that country.

Switzerland was the fourth main NTEs destination accounting for 6.2 percent of the total NTEs earnings. The major NTE products were Nickel ores and concentrates accounting for 48.3 percent of total NTEs earnings from that country.

The fifth main NTEs destination was Kenya which accounted for 3.4 percent of the total NTEs earnings. The major NTE product was Other raw cane sugar accounting for 82.0 percent of total NTEs earnings from that country.

These five countries collectively accounted for 79.8 percent of Zambia's total Non-Traditional Exports earnings in June 2020 **(see Table 12).**

Export Market Shares by selected Regional Groupings and Major Trading Partners, June 2020 and May 2020

Switzerland was the largest market for Zambia's total exports in June 2020, accounting for 47.5 percent.

The DUAL- SADC & COMESA grouping was the second largest market for Zambia's total exports, accounting for 21.9 percent in June 2020. Within this grouping, Congo DR was the dominant export market, accounting for 82.1 percent. Other notable markets in this grouping were Malawi, Zimbabwe, Mauritius and Swaziland.

Asia was the third largest market for Zambia's total exports, accounting for 20.9 percent in June 2020. Within this grouping, Singapore was the dominant market with 57.6 percent. Other notable markets in this grouping were China, Hong Kong, United Arab Emirates and India

The SADC Exclusive grouping was the fourth largest market for Zambia's total exports,

accounting for 5.4 percent in June 2020. Within this grouping, South Africa was the dominant market with 77.5 percent. Other notable markets within this grouping were Tanzania, Botswana Namibia and Mozambique.

The COMESA exclusive grouping was the fifth largest market for Zambia's total exports, accounting for 1.7 percent in June 2020. Within this grouping, Kenya was the dominant market with 55.4 percent. Other notable markets were Burundi, Uganda, Rwanda and Egypt.

The European Union was the sixth largest market for Zambia's total exports, accounting for 1.6 percent in June 2020. Within this grouping, Luxembourg was the dominant market with 51.0 percent. Other notable markets in this grouping were Germany, Italy, Netherlands and Belgium (**see Table 13**).

Zambia's Major Import Sources by Product in June 2020

The major source of imports in June 2020 was South Africa, accounting for 34.5 percent. The main import product was Other medicaments of mixed or unmixed products, for retail sale, nes accounting for 2.5 percent of the import bill from that country.

China was the second main source of Zambia's imports, accounting for 16.6 percent. The major import products were 'vehicles (diesel engine) for the transport of

goods GVW upto 5 tonnes' accounting for 6.5 percent of the import bill from that country. The third main source was Congo DR accounting for 6.1 percent. The major import products were 'Other copper ores' which accounted for 76.7 percent of the import bill from that country.

Other major sources of Zambia's imports were India and Mauritius, which collectively accounted for 6.7 percent of Zambia's imports (see Table 14).

Import Market Shares by Selected Regional Groupings and Major Trading Partners June 2020 and May 2020

The SADC Exclusive grouping was the main source of Zambia's imports, accounting for 38.6 percent in June 2020. Within this regional grouping, South Africa was the major source of Zambia's imports accounting for 89.5 percent. Other notable markets were Namibia, Mozambique, Tanzania and Botswana.

Asia was the second main source of Zambia's imports accounting for 33.2 percent in June 2020. Within this grouping, China was the main source of Zambia's imports accounting for 49.9 percent. Other notable markets were India, United Arab Emirates, Saudi Arabia and Japan.

The Dual SADC & COMESA grouping was the third main source of Zambia's imports, accounting for 11.0 percent in June 2020. Within this grouping, Congo DR was the

dominant market with 54.8 percent. Other notable markets were Mauritius, Zimbabwe, Seychelles and Malawi.

The European Union (EU) was the fourth main source of Zambia's imports accounting for 10.7 percent in June 2020. Within this grouping, United Kingdom was the main source of Zambia's imports accounting for 16.8 percent. Other notable markets were Ireland, Germany, Finland and Netherlands.

The COMESA exclusive grouping was the fifth largest source for Zambia's imports accounting for 2.1 percent in June 2020. Within this grouping, Kenya was the dominant market with 55.0 percent. Other notable markets were Egypt, Ethiopia Uganda and Burundu (see Table 15).

HAND HYGIENE PRACTICES IN ZAMBIA, AS CAPTURED BY 2018 ZDHS

World over, countries are battling with the effects of the vicious COVID-19. The coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus. The COVID-19 virus spreads primarily through droplets of an infected person.

The disease which was first discovered in China, has not spared our beloved Zambia. The first 2 cases were recorded in Zambia on 18th March 2020. As of 29th July, 2020 the country had recorded 5,249 cumulative positive cases, 40 COVID-19 deaths, 98 COVID-19 associated deaths and 1,818 active COVID-19 cases. A total of 3, 285 recoveries had been reported.

It is important to note that there are no specific vaccines or treatments for COVID-19 yet. However, there are many on-going clinical trials evaluating potential treatments globally.

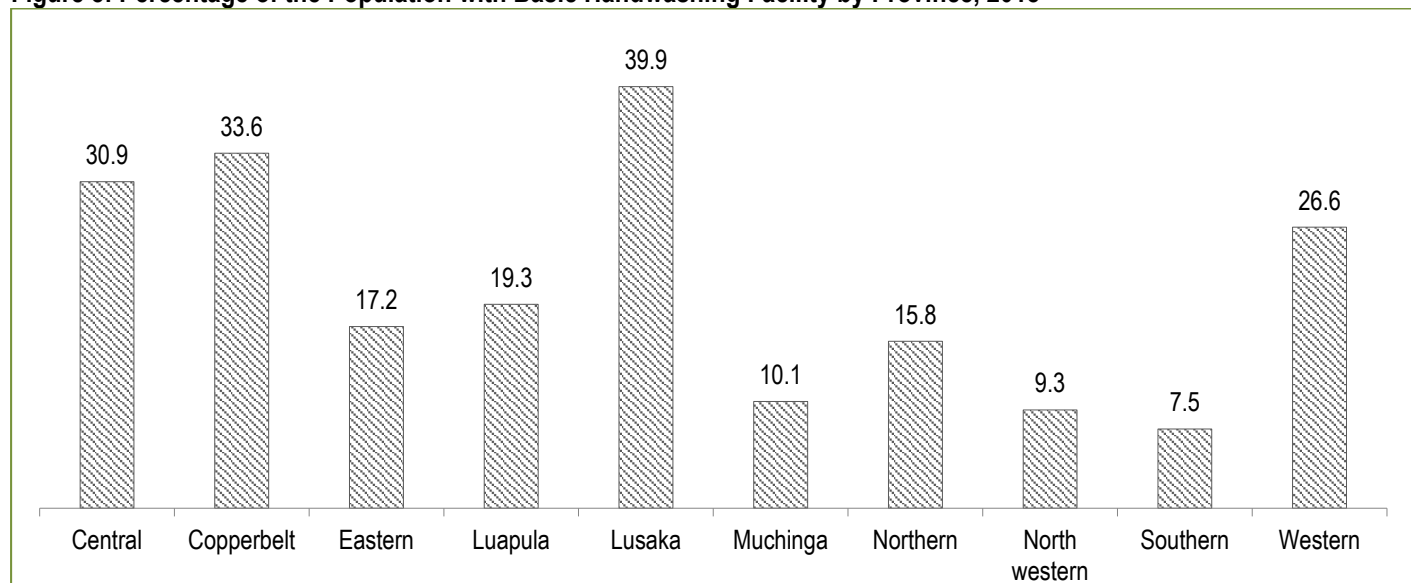

As a way of mitigating the spread of COVID-19, the Government has been implementing a multi-sectoral response plan with the main emphasis being on basic hygiene, social distancing and avoiding unnecessary movements and, social gatherings. Practicing

hand hygiene through effective washing of hands or using an alcohol based hand rub (or sanitiser) frequently is one of the key interventions being implemented.

The 2018 Zambia Demographic and Health Survey (ZDHS) included some questions to determine the places that households use to wash their hands. Specifically, households were asked: "Can you please show me where members of your household most often wash their hands?", and the interviewer was instructed to then (a) Observe presence of water at the place for hand washing, and (b) observe presence of soap, detergent or other cleansing agent at the place for hand washing.

The results show that 65.5 percent of the observed places for handwashing had water available, 42.1 percent had soap available, and 4.2 percent had a cleansing agent other than soap available. Results also show that less than a quarter (24 percent) of the population had a handwashing facility on their premises with soap and water (i.e. basic hand washing facility). On the other hand, 39.4 percent of the population had a handwashing facility on their premises without soap and/or water (i.e. limited hand washing facility).

Figure 8: Percentage of the Population with Basic Handwashing Facility by Province, 2018

Source: Zambia Demographic and Health Survey 2018 (ZDHS)

At provincial level, Lusaka Province has the highest percent of the population with basic hand washing facilities (39.9 percent), followed by Copperbelt Province (33.6 percent). Southern Province recorded the lowest proportion of the population with basic hand washing facilities at 7.5 percent.

It is important that more households provide basic hand washing facilities within their premises (i.e. water and soap) to reduce the spread of this deadly pandemic. This would go a long way in supporting the “new normal” to safeguard our precious lives.

Series 3: GET TO KNOW YOUR NEW STATISTICS ACT of 2018

A warm welcome to the Statistics Act Corner, dedicated to help our readers, including all data producers and users to gain some insight on the law governing statistics production and dissemination in Zambia. These awareness articles will continue to run in the coming months. The Agency will be happy to receive feedback on the usefulness of these articles.

In our previous bulletin, we highlighted a number of functions for the recently established statistical corporate body- the Zambia Statistics Agency (ZamStats), under the Ministry of National Development Planning. Our readers were urged to look up the rest of its functions in the new Statistics Act (available on www.zamstats.gov.zm).

- With this understanding, we begin to elaborate on some of the Agency's functions, in the next few series. This Month's bulletin will focus on what it means to "develop and coordinate an integrated National Statistical System (NSS)".

The first point is to understand what the NSS is. A NSS is defined to comprise a legal framework, institutional and organizational arrangements for collection, management and dissemination of official statistics.

The NSS has four main components, namely **data users, data producers, data suppliers, and researchers and training institutions**. This is a good time to put it correctly that as opposed to concentrating on one component of data producers, "it is important that initiatives to improve the performance of the NSS address issues and concerns of all the four components of the NSS".

The second point we look at is what are the key issues in developing an integrated NSS?

The development of a national statistical system requires paying attention to a number of vital issues that include:

- The policy relevance of statistical data to underpin major government policies and plans;
- Coherence and consistency;
- Cost effectiveness of data-collection methods;
- Adequacy of official statistics and the case for use of statistics (by government and other users); and
- The need to resource the NSS.

The new Statistics Act goes beyond calling for the establishment of a mere NSS, but rather an integrated one. This means that the planned integrated NSS should be strong, effective and efficient in delivery of statistical data and information especially for public policy and decision making at every level. As such, it will be prudent to ensure identification and prioritisation of data needs of government and non-governmental actors in development (including the private sector, non-governmental organisations, researchers, academia, etc).

Finally, below we present some of the key prerequisites for an effective NSS:

- User focus
- Enabling infrastructure
- Statistical capacity
- Statistical coordination
- National statistical development plan
- Effective governance
- Government commitment.

This month's article is supported by writings of an African Statistical guru, Professor Ben Kiregyera from his book "[The Emerging Data Revolution in Africa](#)": Strengthening the Statistics, Policy and Decision-making Chain.

[Don't Miss out on subsequent articles](#), in which we will elaborate more on some aspects of this key function as well as explain other key functions of ZamStats.

Don't forget to get your own copy of the New Statistics Act, on our website: www.zamstats.gov.zm
