## Foreword

**W**elcome to our monthly dissemination of selected official statistics. The Zambia Statistics Agency (ZamStats), embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to promote understanding and use of official statistics both within and outside Zambia. The Agency produces a number of statistical products in the Economic, Social, Agricultural and Environmental theme areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of development programmes.

This monthly publication is an attempt to provide highlights of the work of the Agency and how it can help media institutions and the general public to improve understanding and uptake of statistical information for decision-making and sustainable national development.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

## Inflation

### Consumer Price Index

#### Year-on-Year Inflation for November 2021 slows down to 19.3 Percent

The annual inflation for November, 2021 decreased to 19.3 percent from 21.1 percent recorded in October 2021. This means that on average, prices of goods and services increased by 19.3 percent between November 2020 and November 2021 (see Figure 1).

The slowdown in annual inflation was mainly attributed to favourable price movements in both food and non-food items.

**Figure 1: Annual Inflation Rate, November 2020 – November 2021 (%)**

Source: ZamStats Prices Statistics, 2021  
Note: 2009=100

### Annual Food and Non-Food Inflation

Annual food inflation for November, 2021 was recorded at 25.4 percent compared to 28.1 percent in October 2021, a decrease of 2.7 percentage points (see Figure 2).

This was mainly attributed to price movements of food items such as Cereals (Breakfast Mealie Meal, Roller Mealie Meal, Maize grain, Wheat Plain Household Flour, Bread Flour Imported Sorghum, Millet meal); Meats (Offals, Pork Chops, Chicken live); Fish (Frozen Fish, Buka buka, Dried

Kapenta) Vegetables (Sweet potato leaves, Okra, Cabbage, Maize cob, Onion, Carrot, Dried beans) and Sugar.

Annual non-food inflation for November 2021 was recorded at 12.2 percent from 13.2 percent in October 2021. This was mainly driven by price movements of major household appliances (Refrigerator, Stove); Purchase of vehicles, Charcoal, Iron sheets and Floor tiles.

**Figure 2: Annual Food and Non Food Inflation, Nov 2020 - Nov 2021 (%)**

### Annual Inflation by CPI Main Groups

### November 2021 Overall Monthly Inflation Rate Increases to 0.6 Percent

The monthly inflation for November, 2021 was recorded at 0.6 percent, an increase of 0.2 percentage points from 0.4 percent the previous month (see Figure 3).

The increase in the monthly inflation rate was attributed to general price movements in food items.

**Figure 3: Overall Monthly Inflation Rate, Nov 2020 - Nov 2021 (%)**

Source: ZamStats, Prices Statistics, 2021

### Monthly Inflation Rates for Food and Non-Food Items, November 2020 - November 2021

Monthly food inflation for November 2021 was recorded at 0.9 percent, an increase of 0.5 percentage points from 0.4 percent recorded in October 2021. This development was mainly attributed to the increase in the inflation for items such as Meats (Fillet steak, rump stake, brisket, Mixed-cut, T-bone, Ox-liver), Fruits (Oranges, Lemons, Avocados) Vegetables (Rape, Chinese cabbage, Cassava leaves, Egg plants).

Monthly non-food inflation for November, 2021 was recorded at 0.3 percent down from 0.5 percent recorded in October, 2021. This outturn was mainly attributed to decreases in inflation of non-food items such as Clothing (Ladies Sweater, Means sweater local, Men's polyester tie, Belt leather), Furniture and furnishings (3 piece lounge suit, Coffee table, Wardrobe), Charcoal and Firewood, (see Table 5).

### October 2021 records a Trade Surplus

Zambia recorded a trade surplus of K5.3 billion in October 2021 compared to a surplus of K4.8 billion in September 2021 indicating an 11.0 percent increase (see Table 10).

materials and Intermediate goods also recorded decreases by 2.5 and 0.1 percent, respectively (see Table 2.2 in Annex).

Exports mainly comprising domestically produced goods, declined by 1.6 percent to K16.0 billion in October 2021 from K16.2 billion in September 2021. This was mainly on account of a 49.8 percent fall in export earnings from Capital goods. Raw

Imports decreased by 6.9 percent to K10.6 billion in October 2021 from K11.4 billion in September 2021. This was mainly as a result of a 15.8, 20.7 and 7.0 percent decrease in import bills of Consumer goods, Raw materials and Capital goods, respectively (see Table 2.5 in Annex).

## Layman and Statistics

### Demographic Statistics

**Census:** The count of a given population (or other phenomena of interest) and record its characteristics, done at a specific point in time and usually at regular intervals by a government entity (or any other entity) for the geographic area or subareas under its domain. Examples include Population Census, Housing Census, Census of Business establishments, Agriculture Census etc.

**Census Coverage:** An estimate of how complete a census was of a given population.

**Census Night:** The night preceding the Population Census.

### Geographical and Mapping

**Boundary:** A line which defines the extent of an aerial unit or the locations where two areas meet. A boundary is represented in a GIS as a line feature which may define a side of a polygon. The boundary may or may not be visible on the ground, i.e., it can follow real world features, such as roads and rivers or it can be defined solely by geographic coordinates.

**Geographical Information System (GIS):** A computer system capable of capturing, storing, editing, integrating, manipulating, analysing and displaying data related to positions on Earth's surface.

**Global Positioning System (GPS):** The Global Positioning System (GPS) is a space-based navigation system that provides location and time information in all weather conditions, anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites.

**Constituency:** An electoral boundary segmented for the purpose of electing a member of the National Assembly.

**Constituency Boundary:** A Constituency Boundary is a representation of a constituency on an election thematic map and is symbolized as a polygon feature. A collection of wards forms a Constituency.

**Province:** An area with defined boundaries either by counties, districts, countries or any other specificity, which can clearly differentiate boundaries and is normally named according to the compass direction with respect to the surrounding areas. It can be administrative or statistical.

**Ward:** A Ward is an electoral boundary segmented for the purpose of electing a councillor.

**Rural Area:** An area that lacks most if not all the facilities/amenities found in the urban areas. The population tends to be scattered.

**Urban:** is a place-based characteristic that incorporates elements of population density, social and economic organization, and the transformation of the natural environment into a built environment.

**Urbanization:** The process by which there is an increase in the proportion of people living in urban areas. The common indices used to describe urbanization are: population size, population density and level of administration.

**Urbanization:** refers to a broad-based rural to urban transition involving population, land use, economic activity and culture, or any of these.

## Consumer Price Index (CPI):

**Consumer Price Index (CPI):** measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption. The basket relates to a selection of goods and services that is representative of the consumption habits of most households in the country.

**Inflation:** **Inflation** is defined as a sustained increase in the general level of prices for goods and services over a period of time.

**Annual Inflation:** The annual Inflation Rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage.

**Consumption:** any activity in which households use goods and/or services to satisfy their needs and wants but not for business purposes nor for the acquisition of wealth. Thus investment in all forms of assets is excluded.

## International Merchandise Trade and Balance of Payment Statistics

**Balance of Payments (BOP):** These are the summaries of all transactions that a country's individuals, companies and government bodies complete with individuals, companies and government bodies outside the country.

**Bill of Entry:** This is a document against which goods are entered to obtain customs clearance and with which any duties thereon are paid.

**Capital goods;** these are physical assets that are used in the production process to manufacture products and services.

**Certificate of Origin:** This is an important international document that certifies that goods in a particular export shipment are wholly obtained, produced, manufactured or processed in a particular country. They also serve as a declaration by the exporters.

**Consumer goods;** these are goods designed for use by final consumers.

**Cost Insurance and Freight (CIF):** The type of values including the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country.

**Free On Board (FOB):** The type of values including the transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country.

**Goods in Transit:** This refers to goods simply being transported through a country.

**Intermediate goods;** these are products which are not final but are used as inputs for production.

**Raw Material;** these are materials in unprocessed or minimally processed states, used to produce finished or intermediate goods.

## Statistics Act, No.13 of 2018

**National Statistical System:** The National Statistical System (NSS) comprises data producers, data users, data suppliers and research and training institutions. The National Statistical Office (NSO), which in this case the Zambia Statistics Agency (ZamStats) is the hub of the system, reflecting its coordination and harmonisation role.

**Agency:** The Zambia Statistics Agency established under section 5;

**Metadata:** The range of information, generally textual, that fosters understanding of the context in which statistical data has been collected, processed and analysed with the objective of creating statistical information;

**Official Statistics:** Statistics describing, on a representative basis, the economic, demographic, social or environmental phenomena of the Republic in the statistical work programmes of statistical agencies. The Agency may designate, as official statistics, any statistics or class of statistics produced from collections of statistics by the National Statistical System.

**Spatial Data:** Information that identifies the geographic location and characteristics of natural or constructed features and boundaries on the earth, derived from remote sensing, global positioning systems, geographic information systems, cartographic;

**Statistics:** Any official or unofficial aggregated numerical information relating to demographic, economic, financial, environmental, social or other matters, available in digital or other applicable format, collected at national, regional or local level, which is compiled and analysed according to relevant scientific and statistical methodologies, and which is connected with, or incidental to, any census or survey of all or any of the matters specified in the Third Schedule, and includes information derived from records of administration kept by statistical agencies;

**Statistical agency:** A public body that has the power to collect, compile or disseminate statistics under a written law;

**User:** In relation to statistics includes a public body, private body, researcher, research institution, higher education institution, international or regional organisation or any other user;

**Dissemination:** The direct or indirect publication, sale or provision of official or other statistics, spatial data or related documentation in any form.
