# Foreword

**W**elcome to our monthly dissemination of selected official statistics. The Zambia Statistics Agency (ZamStats), embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to promote understanding and use of official statistics both within and outside Zambia. The Agency produces a number of statistical products in the Economic, Social, Agricultural and Environmental theme areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of development programmes.

This Monthly publication is an attempt to provide highlights of the work of the Agency and how it can help media institutions and the general public to improve understanding and uptake of statistical information for decision-making and sustainable national development.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

# INFLATION

## Consumer Price Index

### Year-on-Year Inflation for August 2022 slows down to 9.8 Percent

Annual inflation for August 2022 decreased to 9.8 percent from 9.9 percent recorded in July 2022. This means that on average, prices of goods and services increased by 9.8 percent between August 2021 and August 2022 (see Figure 1). The slowdown in annual inflation was mainly attributed to price movements in food items.

**Figure 1: Annual Inflation Rate, August 2021-August 2022 (%)**

Source: ZamStats  
Note: 2009=100

### Annual Food and Non-Food Inflation

Annual food inflation for August 2022 was recorded at 11.3 percent from 12.0 percent in July 2022 (see Figure 2). This development was mainly attributed to price movements in food items such as Meats (Brisket, Mixed Cut, T-bone, Beef Sausages, Mince Meat, Ox-liver, Chicken live); Fruits (Oranges, Lemons, Bananas, Apples, Water melons, Pineapples, Avocadoes), Rice local and Eggs.

The annual non-food inflation for August 2022 was recorded at 7.8 percent from 7.2 percent in July 2022. This outturn was mainly on account of price movements in non-food items due to the base effect in Transport.

## Aug 2022 Overall Monthly Inflation decreased to 0.3 Percent

Overall monthly inflation for August 2022 was recorded at 0.3 percent compared with 0.4 percent the previous month (see Figure 3). This outturn was mainly attributed to price decreases in some non-food items.

**Figure 3: Overall Monthly Inflation, August 2021-August 2022 (%)**

Source: ZamStats, 2022

Monthly food inflation for August 2022 was 0.4 percent, an increase of 0.1 percentage points from 0.3 percent in July 2022. This development was mainly attributed to the general decrease in prices of items such as Vegetables (Rape, Sweet potato leaves, lumanda, Cabbage, Tomatoes), Dried bream.

Monthly non-food inflation for August 2022 was recorded at 0.1 percent from 0.7 percent in July 2022. This outturn was mainly attributed to a slow down in price increases of non-food items such as Fuels & lubricants (Diesel, Petrol, Engine oil) and; Passenger transport by road (Mini bus fare, Coach fare,) (see Table 5).

### July 2022 records a Trade Surplus

The country recorded a trade surplus of K3.7 billion in July 2022 compared to a surplus of K2.1 billion in June 2022 (see Table 10), indicating a 73.0 percent increase in the surplus.

Exports mainly comprising domestically produced goods, decreased by 1.7 percent to K15.9 billion in July 2022 from K16.2 billion in June 2022. This was mainly on account of a 3.5 percent decrease in export earnings from Intermediate goods (see Table 2.2 in Annex).

Imports decreased by 13.1 percent to K12.2 billion in July 2022 from K14.1 billion in June 2022. This was mainly as a result of decreases in import bills of Consumer goods, Capital goods and Intermediate goods of 25.2, 22.5 and 7.1 percent, respectively (see Table 2.5 in Annex).

# Layman and Statistics

## Demographic Statistics

**Census:** The count of a given population (or other phenomena of interest) and record its characteristics, done at a specific point in time and usually at regular intervals by a government entity (or any other entity) for the geographic area or subareas under its domain. Examples include Population Census, Housing Census, Census of Business establishments, Agriculture Census etc.

**Census Coverage:** An estimate of how complete a census was of a given population.

**Census Night:** The night preceding the Population Census.

## Geographical and Mapping

**Boundary:** A line which defines the extent of an aerial unit or the locations where two areas meet. A boundary is represented in a GIS as a line feature which may define a side of a polygon. The boundary may or may not be visible on the ground, i.e., it can follow real world features, such as roads and rivers or it can be defined solely by geographic coordinates.

**Geographical Information System (GIS):** A computer system capable of capturing, storing, editing, integrating, manipulating, analysing and displaying data related to positions on Earth's surface.

**Global Positioning System (GPS):** The Global Positioning System (GPS) is a space-based navigation system that provides location and time information in all weather conditions, anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites.

**Constituency:** An electoral boundary segmented for the purpose of electing a member of the National Assembly.

**Constituency Boundary:** A Constituency Boundary is a representation of a constituency on an election thematic map and is symbolized as a polygon feature. A collection of wards forms a Constituency.

**Province:** An area with defined boundaries either by counties, districts, countries or any other specificity, which can clearly differentiate boundaries and is normally named according to the compass direction with respect to the surrounding areas. It can be administrative or statistical.

**Ward:** A Ward is an electoral boundary segmented for the purpose of electing a councillor.

**Rural Area:** An area that lacks most if not all the facilities/amenities found in the urban areas. The population tends to be scattered.

**Urban:** is a place-based characteristic that incorporate elements of population density, social and economic organization, and the transformation of the natural environment into a built environment.

**Urbanization:** The process by which there is an increase in the proportion of people living in urban areas. The common indices used to describe urbanization are: population size, population density and level of administration.

**Urbanization:** refers to a broad- based rural to urban transition involving population, land use, economic activity and culture, or any of these.

## Consumer Price Index (CPI):

**Consumer Price Index (CPI):** measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption. The basket relates to a selection of goods and services that is representative of the consumption habits of most households in the country.

**Inflation:** Inflation is defined as a sustained increase in the general level of prices for goods and services over a period of time.

**Annual Inflation:** The annual Inflation Rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage.

**Consumption:** any activity in which households use goods and/or services to satisfy their needs and wants but not for business purposes nor for the acquisition of wealth. Thus investment in all forms of assets is excluded.

## International Merchandise Trade and Balance of Payment Statistics

**Balance of Payments (BOP):** These are the summaries of all transactions that a country's individuals, companies and government bodies complete with individuals, companies and government bodies outside the country.

**Bill of Entry:** This is a document against which goods are entered to obtain customs clearance and with which any duties thereon are paid.

**Capital goods;** these are physical assets that are used in the production process to manufacture products and services.

**Certificate of Origin:** This is an important international document that certifies that goods in a particular export shipment are wholly obtained, produced, manufactured or processed in a particular country. They also serve as a declaration by the exporters.

**Consumer goods;** these are goods designed for use by final consumers.

**Cost Insurance and Freight (CIF):** The type of values including the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country.

**Free On Board (FOB):** The type of values including the transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country.

**Goods in Transit:** This refers to goods simply being transported through a country.

**Intermediate goods;** these are products which are not final but are used as inputs for production.

**Raw Material;** these are materials in unprocessed or minimally processed states, used to produce finished or intermediate goods.

## Statistics Act, No.13 of 2018

**National Statistical System:** The National Statistical System (NSS) comprises data producers, data users, data suppliers and research and training institutions. The National Statistical Office (NSO), which in this case the Zambia Statistics Agency (ZamStats) is the hub of the system, reflecting its coordination and harmonisation role.

**Agency:** The Zambia Statistics Agency established under section 5.

**Metadata:** The range of information, generally textual, that fosters understanding of the context in which statistical data has been collected, processed and analysed with the objective of creating statistical information.

**Official Statistics:** Statistics describing, on a representative basis, the economic, demographic, social or environmental phenomena of the Republic in the statistical work programmes of statistical agencies. The Agency may designate, as official statistics, any statistics or class of statistics produced from collections of statistics by the National Statistical System.

**Spatial Data:** Information that identifies the geographic location and characteristics of natural or constructed features and boundaries on the earth, derived from remote sensing, global positioning systems, geographic information systems, cartographic.

**Statistics:** Any official or unofficial aggregated numerical information relating to demographic, economic, financial, environmental, social or other matters, available in digital or other applicable format, collected at national, regional or local level, which is compiled and analysed according to relevant scientific and statistical methodologies, and which is connected with, or incidental to, any census or survey of all or any of the matters specified in the Third Schedule, and includes information derived from records of administration kept by statistical agencies.

**Statistical agency:** A public body that has the power to collect, compile or disseminate statistics under a written law.

**User:** In relation to statistics includes a public body, private body, researcher, research institution, higher education institution, international or regional organisation or any other user.

**Dissemination:** The direct or indirect publication, sale or provision of official or other statistics, spatial data or related documentation in any form.
