The Monthly

Central Statistical Office

Volume 87 | Website: www.zamstats.gov.zm | June, 2010

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Ms. Efreda Chulu
Director of Census and Statistics

1st July, 2010

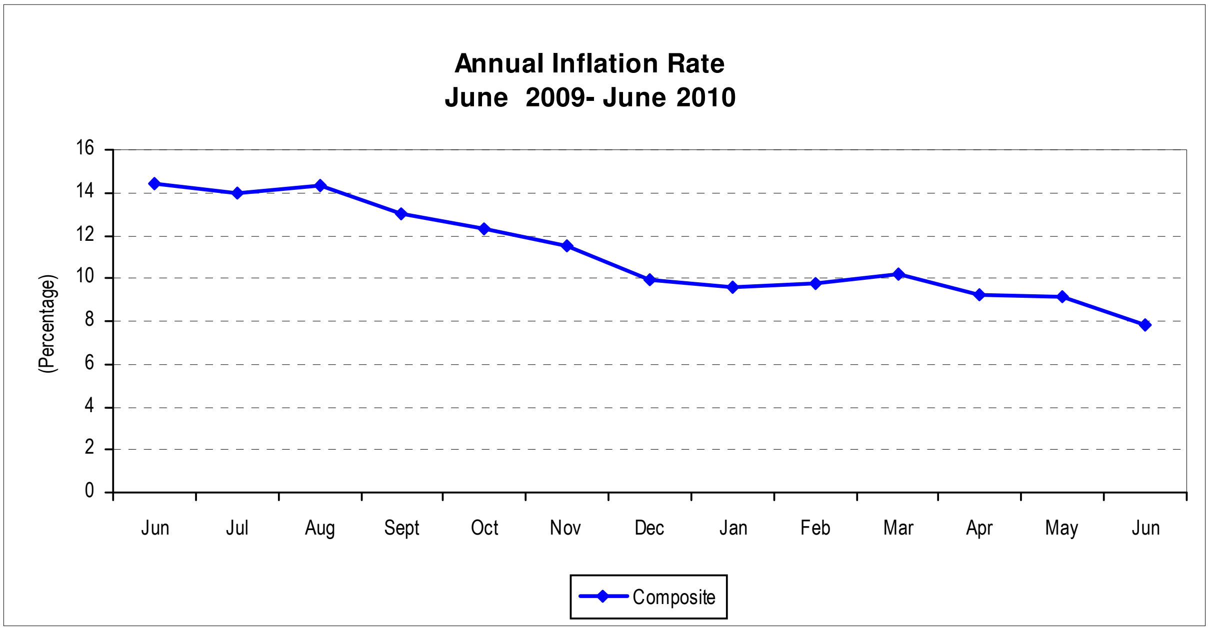
INFLATION

Inflation declines to 7.8 percent in June 2010 from 9.1 percent in May 2010

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), reduced to 7.8 percent in June 2010 from 9.1 percent in May, 2010. The decline is attributed to the decrease in some food prices such as mealie meal, maize grain, fresh vegetables and dried kapenta.



Changes in annual inflation rates for CPI Main Groups

Between May 2010 and June 2010, annual inflation rates declined for food, beverages and tobacco; clothing and footwear; furniture and household goods; medical care, recreation and education; and other goods and services. The annual inflation rates increased for rent, fuel and lighting; and transport and communication.

Exports by major product categories May 2010 and April 2010

Zambia's major export products in May 2010 were from the intermediate goods category accounting for 80.5 percent comprising mainly copper cathodes & sections of refined copper and copper blister. The Raw materials category was second with 8.4 percent comprising mainly cobalt ores & concentrates; and copper ores & concentrates. Other exports were consumer goods and capital goods which collectively accounting for 11.1 percent of total exports for May 2010.

Zambia's Metal Exports and Non-Traditional Exports (NTEs) May 2010 and April 2010

There has been a reduction in the total value of exports between May and April 2010. The country's ever dominant metal products recorded a lower value in revenue growth of -8.3 percent in nominal terms, between May and April 2010. The overall contribution of metal products to the total exports earnings was 78.0 and 88.0 percent in May and April 2010, respectively.

In terms of percentage contribution to the total export earnings, NTEs recorded 22.0 and 12.0 percent in May and April 2010, respectively.

Zambia's Major Exports Classified by Harmonized Coding System (HS), May 2010

Zambia's major export products in May 2010 were copper related including copper and articles thereof; and ores, slag & ash collectively accounting for 80.2 percent of total export earnings. Other export products were, other base metals; cermets and articles thereof (2.7 percent); Boilers, machinery & mechanical appliances (2.5 percent); and Edible fruit and nuts (2.4 percent). These five product categories collectively accounted for 87.8 percent of Zambia's total export earnings for May 2010.

Zambia's Major Export Destinations by Product in May 2010

The five major destinations of Zambia's exports in May 2010 were Switzerland (51.3 percent), China (16.3 percent), South Africa (12.7 percent), Democratic Republic of Congo (6.6 percent) and United Arab Emirates (3.6 percent). These five countries collectively accounted for 90.4 percent of Zambia's total export earnings.

Zambia's major export destination was Switzerland accounting for 51.3 percent. The major export products to Switzerland were, Cathodes & sections of cathode of refined copper (69.2 percent); Plates, sheets and strip, of refined copper uncoiled (12.3 percent); Copper blister (10.1); Cobalt ores and concentrates (3.5 percent) and Copper ores and concentrates (2.5 percent).

China was the second largest destination of Zambia's total exports accounting for 16.3 percent. The major export products were Copper blister (46.2 percent); Cathodes & section of cathode of refined copper (40.1 percent); Copper (excl. Master) alloys, nes, unwrought (9.1 percent) and Manganese ores/concentrates (1.1 percent).

Zambia's third major export destination was South Africa with 12.7 percent. The major export products to South Africa were, Wire of refined copper, maximum cross-sectional dimension >6mm (16.7 percent); Other articles of cobalt, nes (16.0 percent); Cathodes and sections of cathodes of refined copper (11.8 percent); Machines having individual functions, nes (11.5 percent); and Semi-manufactured gold (incl. gold plated with platinum) with 9.4 percent.

The Democratic Republic of Congo was the fourth largest destination of Zambia's total exports accounting for 6.6 percent. The major export products were, Raw cane sugar, in solid form (9.2 percent); Portland cement (excl. white) with 5.0 percent; Sulphuric acid, oleum in bulk (4.9 percent); Wheat or meslin flour (3.9 percent); and Other mixtures with basis of odoriferous subst.inc (3.4 percent).

The United Arab Emirates was the fifth largest destination of Zambia's total exports accounting for 3.6 percent. The major export products were, Cathodes and sections of cathodes of refined copper (51.8 percent); and Plates, sheets and strip, of refined copper, uncoiled (48.1 percent).

Export Market Shares by Regional Groupings, May 2010 and April 2010

Southern African Development Community (SADAC) regional grouping was the largest market for Zambia's total exports, accounting for 23.2 and 11.5 percent in May and April 2010, respectively. Within SADC, South Africa was the dominant market in both months with 54.6 and 48.1 percent, in May and April 2010, respectively. Congo DR was the second dominant market with 28.3 and 29.9 percent in May and April 2010, respectively. Malawi was the third largest market with 7.1percent in May 2010, while Zimbabwe was third with 7.4 percent in April 2010. Other notable markets were Tanzania and Namibia.

Asia was the second largest market for Zambia's total exports accounting for 21.0 and 26.7 percent in May and April 2010, respectively. Within Asia, China was the dominant market in May and April 2010 with 77.4 and 76.7 percent, respectively. The United Arab Emirates was the second dominant market with 17.3 and 22.3 percent in May and April 2010, respectively. The Republic of Korea was the third largest market with 3.4 percent in May and 0.6 percent in April 2010. Other key markets were India, The Philippines and Hong Kong.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest market for Zambia's total exports accounting for 11.4 and 7.0 percent, in May and April 2010, respectively. Within COMESA, Congo DR was the dominant market in both months with 57.6 and 49.5 percent in May and April 2010, respectively. Malawi was the second dominant market in May 2010 with 14.5 percent, while Egypt was second in April 2010 with 14.8 percent. The third largest market was Zimbabwe with 10.2 and 12.3 percent in May and April 2010, respectively. Other notable markets were Burundi and Kenya.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 2.6 and 4.1 percent in May and April 2010, respectively. Within the EU market, the United Kingdom was the dominant market with 64.6 and 53.9 percent in May and April 2010, respectively. The Netherlands was the second largest market in May 2010 with 18.2 percent, while Luxembourg was second in April 2010 with 12.3 percent. Other notable markets were Belgium, Germany, Denmark and Sweden.

Total Exports by Major Ports of Exit, May and April 2010 (K' million)

Zambia's six major ports of exit for exports from various sources during the month of May 2010, were Ndola, Chirundu, Kitwe, Livingstone, Kapiri-Mposhi and Kasumbalesa port offices. Ndola port was the major port of exit with 28.2 and 30.4 percent of Zambia's total exports in May and April 2010, respectively. This is attributed to the copper and cobalt that are mainly exported through the Ndola port office. Chirundu was the second major port of exit with 19.9 and 23.4 in the month of May and April 2010, respectively.

Kitwe port office was third with 17.8 and 14.0 percent in the month of May and April 2010, respectively. It was followed by Livingstone (9.6 percent); Kapiri-Mposhi (8.4 percent); and Kasumbalesa (5.1 percent). The six ports collectively accounted for 89.0 percent.

Zambia's Major Import Sources by Product, May 2010

The major source of Zambia's imports in May 2010 was South Africa accounting for 32.9 percent. The major import products from South Africa were, Other fertilizers, nes (3.4 percent); Self-propelled bulldozers, excavators, nes (2.6 percent) and Parts of machinery of 84.26, 84.29 & 84.30, nes (2.3 percent). Other notable import products were Parts of machinery of 84.74 and Dumpers for off-highway use.

The second main source of Zambia's imports in May 2010 was Congo DR accounting for 18.7 percent of the total value of imports. The major import products from Congo DR were: Cobalt ores and concentrates (65.6 percent); Cobalt oxides and hydroxides; Commercial cobalt oxides (18.2 percent); and Copper ores and concentrates (14.1 percent).

Other notable sources of Zambia's imports were Belgium, Kuwait and India, collectively accounting for 24.4 percent of Zambia's total imports in May 2010.

Import Market Shares by Regional Groupings, May 2010 and April 2010

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 55.4 and 64.5 percent in May and April 2010, respectively. Within the SADC region, South Africa was the major source of Zambia's imports in May 2010 accounting for 59.3 percent while Congo (DR) was the major source of Zambia's imports in April 2010 with 47.3 percent. However, Congo (DR) was the second major source of Zambia's imports with 33.8 percent in May 2010, while South Africa was second in April 2010 with 46.7 percent. Other key market sources were Zimbabwe, Tanzania, Mozambique and Malawi.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the second largest source of Zambia's imports accounting for 22.0 and 34.1 percent in May and April 2010, respectively. Within COMESA, Congo (DR) was the main source of Zambia's imports with 85.1 and 89.6 percent in May and April 2010, respectively. Zimbabwe was the second major source with 6.6 and 4.5 percent in May and April 2010, respectively. Other notable sources were Kenya, Malawi and Egypt.

The European Union (EU) was the third largest source of Zambia's imports with 21.3 percent in May 2010 while it was the fourth largest source of Zambia's imports in April 2010. Within the EU, Belgium was the major source of Zambia's imports accounting for 66.5 percent in May 2010, while the United Kingdom was the major source in April 2010 with 23.7 percent. Other key markets were Sweden, Ireland and Finland.

Asia was the fourth largest market for Zambia's imports accounting for 19.2 percent in May 2010 while it was the third largest market in April 2010. Within Asia, Kuwait was the dominant market in May and April 2010 with 35.2 and 43.7 percent, respectively. India was the second largest market with 18.2 percent in May 2010, while China was second with 15.0 percent in April 2010. Other notable markets were the United Arab Emirates and Japan.

NATIONAL ACCOUNTS

Economy Grows by 6.4 percent in 2009

The revised estimates of Gross Domestic Product based on data for all the four quarters of 2009 show that the economy grew by 6.4 percent in 2009 compared to 5.7 percent recorded in 2008. This is 0.1 percentage-points higher than the 6.3 percent preliminary estimate which was mostly based on data for the first three quarters.

This growth was spurred by increased output in Metal Mining, Construction, Agriculture and Communications. However, the Hotels, Bars and Restaurants, Rail and Air Transport and the Textiles and Leather industries recorded declines.

Percentage Changes in GDP by Kind of Economic Activity, 2005-2009

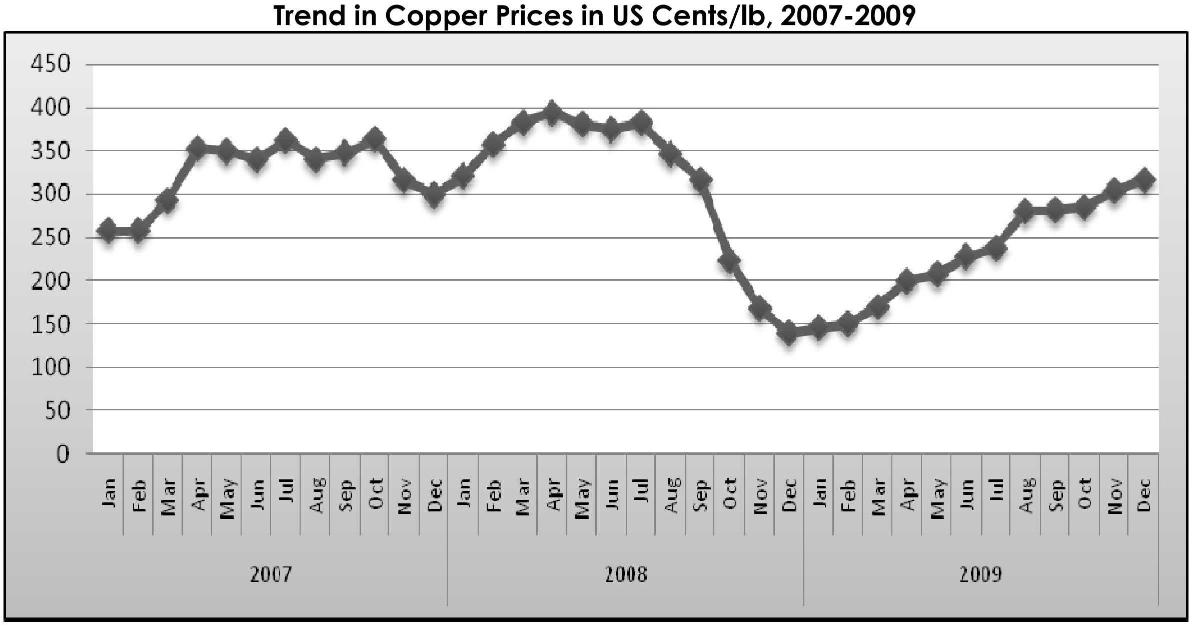
***Preliminary*
***Revised*

The Mining and Quarrying industry grew by 20.3 percent in 2009, up from only 2.5 percent in 2008. This is mainly due to an increase in copper output, which increased by 21.1 percent from 575, 036.8 metric tonnes produced in 2008 to 696, 411.1 metric tonnes in 2009. This is despite the price of copper declining from an average of 315.39 US Cents per pound in 2008 to 233.71 US Cents per pound in 2009.

Trend in Copper Prices in US Cents/lb, 2007-2009

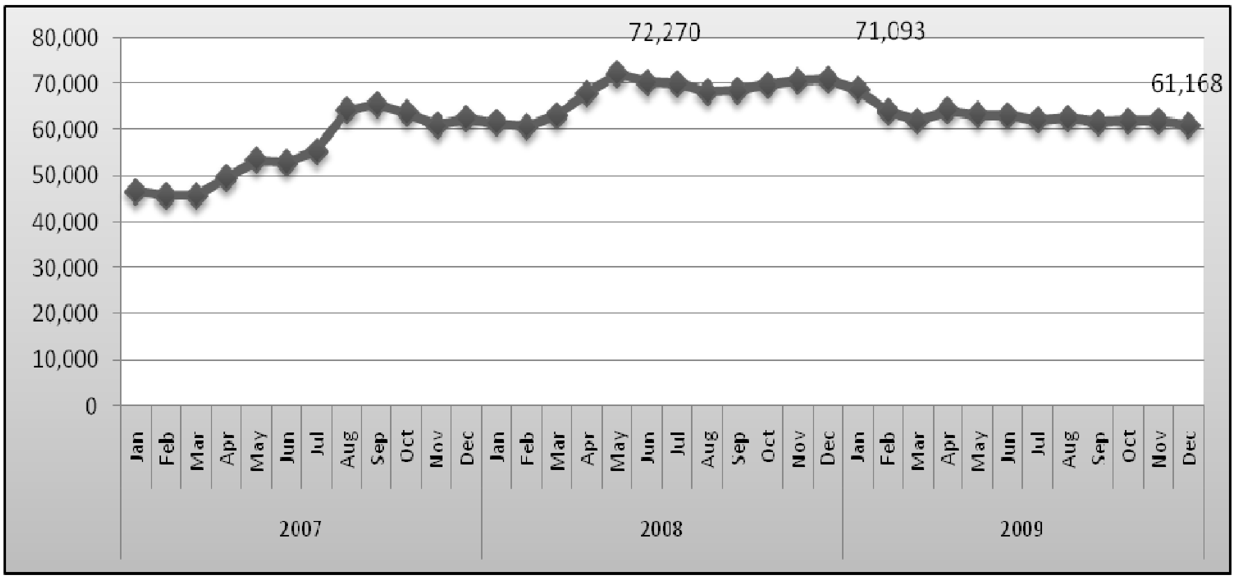


Source: *Statistics Fortnightly, Bank of Zambia*

The Agriculture, forestry and fishing industry registered a growth of 7.2 percent in 2009 from 2.6 percent in 2008. Maize production is estimated to have increased by 30.7 percent from 1.4 million metric tonnes in the 2007/2008 agriculture season to 1.9 million metric tonnes in the 2008/2009 agriculture season.

The Construction industry is estimated to have grown by 9.5 percent in 2009 compared to a growth of 8.7 percent in 2008. With increased production and the general decline in the price of cement, domestic cement sales increased by 38.1 percent in 2009. The average price of a 50 kg bag of Portland cement declined from K71, 093 in December 2008 to K61, 168 in December 2009.

Decline in the Price of Cement in 2009



Source: *Prices Statistics, CSO*

While the primary and secondary sectors registered strong growth, the tertiary (or services) sector registered relatively modest growth. All industries in this sector recorded lower growths in 2009 compared to 2008, with noticeable declines in the Hotels, bars and restaurants, Rail and the Air transport industries.

Industry Percentage Point Contribution to GDP Growth Rate

The Agriculture, forestry and fishing, Mining and quarrying and the Construction industries collectively accounted for nearly three-fifths of the overall growth rate of 6.4 percent.

Mining and quarrying regained its dominant position as the main contributor to the total economy. Of the 6.4 percent GDP growth rate, the Mining and Quarrying industry contributed 1.7 percentage points, followed by Construction (1.1 percentage points) and Agriculture, forestry and fishing (0.9 percentage points). This was followed by Transport and Communications as well as Community, social and personal services, each accounting for 0.7 percentage points.

Percentage Point Contribution of the Industries to the 6.4 Percent Overall Growth

INDUSTRIAL PRODUCTION

Industrial Output increases in 2009

The total volume index of industrial production increased by 8.7 percent in 2009 compared to an increase of 4.9 percent in 2008. The increase was mainly attributed to the growth in mining and electricity generation sectors.

Copper and coal output up, cobalt output down

The mining and quarrying sector recorded an increase of 14.0 percent in 2009 compared to an increase of 9.3 percent in 2008. The growth in output was due to increased production of copper and coal.

Quarterly Production of Copper, Cobalt and Coal in metric tonnes for 2008 and 2009

PERIOD	2008					2009					%Change
	Q1	Q2	Q3	Q4	Total	Q1	Q2	Q3	Q4	Total	
COPPER	139,287.5	136,523.0	144,186.4	155,039.9	575,036.8	164,810.0	169,935.0	191,859.3	169,807	696,411.1	21.1

Source: *2008 and 2009 Index of industrial production, CSO*

The coal mining industry increased its output by a colossal 1648.9 percent in 2009 compared to a decline of 77.4 percent in 2008. The resumption of production at one of the major coal mines was the main reason for the increase in production. The actual production of coal increased by 1,502.7 percent from 3493.0 metric tonnes in 2008 to 55,983.0 metric tonnes in 2009.

The Non-ferrous mining sectors, which include copper and cobalt mining, increased output by 19.7 percent in 2009 compared to a growth of 2.4 percent in 2008. The increase in production is mainly attributed to increased production of copper.

The actual copper production increased by 21.1percent from 575,036.8 metric tonnes in 2008 to 696,411.1 metric tonnes in 2009. However, the actual cobalt production declined by 9.7 percent from 4,053.4 metric tonnes in 2008 to **3,659.9** metric tonnes in 2009.

Manufacturing goes up marginally

The manufacturing industry showed an increase of 2.6 percent in 2009 compared to an increase of 2.2 percent in 2008. The increase is mainly attributed to growth in the food, beverages and tobacco sector. A notable growth was also registered in the Non-metallic mineral products sector.

Food, beverages & tobacco, Non-metallic mineral products, Wood and Paper output increases. Textiles, Basic mineral products, Fabricated mineral products and Chemical products output decreases

There was a 4.9 percent growth in output for the food, beverages and tobacco industry in 2009 compared with a growth of 3.0 percent in 2008. Increased production of grain mill products, sugar, carbonated soft drinks and clear beer were the main reason for the increase in output.

Output for the non-metallic mineral products industry went up by 11.7 percent in 2009 compared to a growth of 5.0 percent in 2008. This is mainly due to increased production of cement. Re-capitalization of the industry was cited as one of the major reason to the increase in production.

The output in Textile, clothing and leather products further reduced by 20.0 percent in 2009 compared with a reduction of 23.4 percent in 2008. The sector has been experiencing negative growth since 2004.

Output in chemicals, rubber and plastic products declined marginally by about 0.3 percent in 2009 compared to that of the year 2008. The negative growth was attributed to decreases in the production of chemical fertilizers, detergents, soaps, cosmetics and rubber lining.

Production of basic metals reduced by 4.8 percent in 2009 in comparison with a significant growth of 23.0 percent in 2008. The decline is mainly due to reduced production of iron and steel castings.

Electricity generation increases

Electricity generation index has shown an increase of 8.4 percent in the period under review. This was mainly because of increased electricity output at Kafue Gorge Power Station. The Main-hydropower stations, that account for about 99 percent of the total generation of electricity, increased generation by 8.2 percent from 9.4 million kwh in 2008 to 10.2 million kwh in 2009. In the same period, an increase of 8.8 percent in generation was registered by the mini-hydropower stations. Diesel power generation also increased output by 8.6 percent.

Quarterly Generation of Electricity for 2008 and 2009 (KWh)

	2008					2009					
Generation	Q1	Q2	Q3	Q4	Total	Q1	Q2	Q3	Q4	Total	% Change

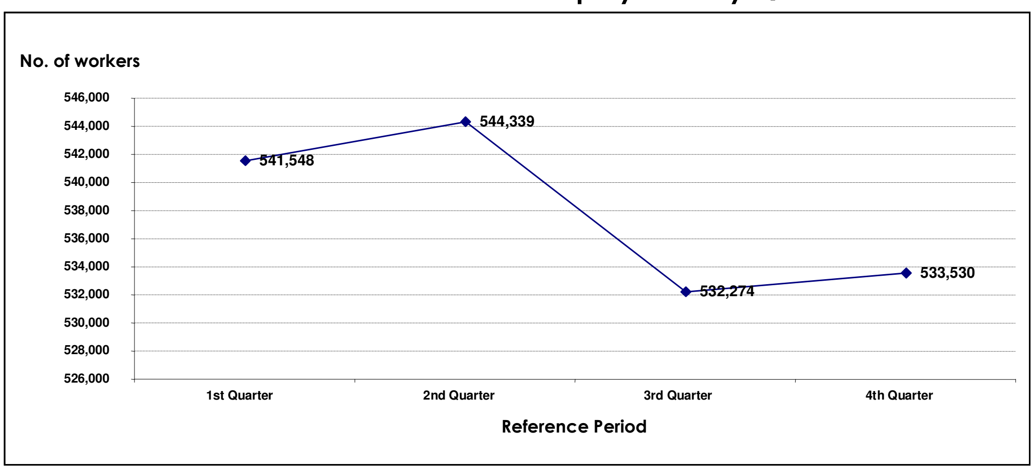
LABOURFORCE

Formal Sector Employment reduces in 2008

The 2008 Employment and Earnings Inquiry Report reveals that the estimated number of workers in the formal sector reduced as the year progressed. Though the number of workers increased from 541,548 in the first quarter to 544,339 in the second quarter, it reduced to 532,274 and 533,530 in the third and fourth quarters, respectively.

Formal Sector Employment by Quarter



Source: 2008 Employment and Earnings Inquiry Report

The Community, social and personal services industry continued to have the highest percentage share of workers in all the quarters in the formal sector while the Electricity, Gas and Water industry had the lowest. Wholesale and retail trade industry accounted for the second largest percentage share of workers in the formal sector. For instance in the fourth quarter, Community, social and personal services industry accounted for 37 percent, followed by Wholesale and retail trade which had 16 percent and Electricity, Gas and water had 2 percent.

Formal Sector Employment by Quarter and Industry

Industry	2008 Formal sector Employment: 1st Quarter Number	1st Quarter %	2nd Quarter Number	2nd Quarter %	3rd Quarter Number	3rd Quarter %	4th Quarter Number	4th Quarter %
Agriculture, Forestry and Fishing	72,246	13.3	60,265	11.1	71,619	13.5	59,684	11.2
Mining and Quarrying	53,610	9.9	47,910	8.8	52,477	9.9	46,829	8.8
Manufacturing	46,884	8.7	45,287	8.3	45,471	8.5	43,594	8.2

Total	**541,548**	**100**	**544,339**	**100**	**532,274**	**100**	**533,530**	**100**

Source: *CSO, 2008 Employment and Earnings Inquiry Report*

The results also show that the general decline in the number of workers between first and fourth quarters was due to reductions in the number of workers mainly in the Agriculture, Forestry and Fishing; Mining and Quarrying; Manufacturing; and Financial, Insurance and Real estate industries. The number of workers in the Agriculture, Forestry and Fishing industry reduced from 72,246 in the first quarter to 59,684 in the fourth quarter. Similarly, those in the Mining and Quarrying industry also reduced from 53,610 in the first quarter to 46,829 in the fourth quarter while those in the Manufacturing industry declined from 46,884 to 43,594 over the same period.

However, other industries like Construction; Wholesale and Retail trade; Transportation and Storage; and Community, Social and Personal services registered increases in the number of workers.

In terms of quarterly percentage changes, industries like Agriculture, Forestry and Fishing, and the Mining and Quarrying experienced major declines in the number of workers of 17 percent and 11 percent, respectively, during the first and second quarter period. During the second and third quarter period, major declines were observed in the Transportation and Storage industry (21 percent) and Construction industry (18 percent).

DEMOGRAPHY

Knowledge on HIV/AIDS medication increases

The 2009 Sexual Behavior survey results show that knowledge on anti-retroviral medication for the treatment of HIV/AIDS has increased over the years. The results show that the proportion of persons with knowledge of special medications for the treatment of HIV/AIDS increased from 55.2 percent in 2005 to 94.0 percent in 2009.

Analysis by residence shows that the increase in knowledge of HIV/AIDS medication was more in rural areas than in urban areas. The results indicate that knowledge of HIV/AIDS medication in rural areas increased from 46.2 percent in 2005 to 92.3 percent in 2009. In urban areas, Knowledge of HIV/AIDS medication increased from 71.8 percent in 2005 to 96.7 percent in 2009.

Analysis by sex shows that in 2005, knowledge of HIV/AIDS medication was higher among males (57.4 percent) than females (53.1 percent). However, in 2009, knowledge on HIV/AIDS was widespread for both males and females with 93.8 percent and 94.2 percent, respectively.

Percent of respondents with knowledge of special medications for the treatment of HIV/AIDS and of where to obtain these medications by sex and residence, 2005 and 2009

Background Characteristics	Knows about anti-retroviral medications for treating HIV/AIDS (%)		Knows where to obtain anti-retroviral medications (%)	
	2005	2009	2005	2009

Source: *2005 and 2009 Zambia Sexual Behavior Survey*

The results further show that the proportion of persons who know where to obtain medications for treating HIV/AIDS has also increased over the years. The proportion of persons who know where to obtain medications for treating HIV/AIDS has increased from 49.7 percent in 2005 to 90.3 percent in 2009. In rural areas, the proportion of persons with knowledge of where to get medication increased from 40.3 percent in 2005 to 88.5 percent in 2009. In urban areas the increase was from 67.2 percent to 93.2 percent during the same period.

LAYMAN AND STATISTICS

An index of industrial production (IIP) measures changes over time in the volume of work done in various sectors of industry, limited to the production of commodities, excluding agriculture and services. More precisely, it is defined as the ratio of the volume of commodities produced within a specified group of industries in a given time period to the volume produced in the same group of industries in a specified base period.

Note that the IIP only covers mining and quarrying, manufacturing, and electricity.

IIP growth rate
The growth rate in the IIP refers to the change between the current and the previous period indices expressed as a percentage. This is a measure of the increase/decrease in output (production) from one period to another.

CENSUS SCHEDULED FOR OCTOBER 2010!

The Census of Population and Housing is carried out under the provisions of the Census and Statistics ACT Chapter 127 of the laws of Zambia. Under this ACT the Central Statistical Office is mandated to carry out a Census of Population and Housing every ten years. The first comprehensive census was carried out in 1969. Since then, three more censuses have been carried out, in 1980, 1990 and 2000. The next census will be carried out this year (2010).

Under this ACT, all persons residing in Zambia, except foreign diplomats accredited to Zambia are required to provide the necessary information.

WHAT IS A CENSUS?

A Census of Population and Housing is defined as the total process of collecting, compiling, evaluating, analyzing and publishing demographic, economic and social data pertaining, at a specified time or times, to all persons in a designated area or the whole country. It is the primary source of information about the population of a country. It is undertaken at regular intervals, usually after ten years.

WHY HOLD A CENSUS?

The main objective of conducting a Population Census is to enumerate all the people in the country in order to provide the Government, private organizations, individuals, and other stakeholders with the number of persons in each district, township, locality, village, etc., according to age, sex, and other characteristics. For every aspect of planning, it is essential to know the size, structure and distribution of the population of a country. For instance, to plan for education, the country needs to have numbers of the school going population by sex and age.

CENSUS ACTIVITIES

Being a huge undertaking, the census encompasses various activities for its success. These include pre census, census and post census activities. Pre census activities include census *mapping, pilot census, formation of committees to coordinate all aspects of the census, publicity, stakeholder consultations, recruitment and procurement.*

The pilot census is carried out on sample basis to test the methodology of the census including questionnaire suitability, logistical arrangements, mapping, staffing and other resource requirements. The main census involves collection of data on all persons in the country. The post census activities include Post Enumeration Survey, data processing and analysis, report writing and dissemination.

CENSUS MAPPING

One of the most important activities that the office carries out before a census is the census mapping exercise. The objective of this exercise is to delineate the country into enumeration areas (EAS) to ensure that there is no duplication or omission of persons or households during the Census.

A census mapping is also undertaken in order to:

- *Determine the location of the population in advance of the census enumeration in order to make possible the recruitment, training and allocation of a sufficient number of enumerators to ensure that census enumeration is completed in time without omissions or duplications;*

- *Establish the framework for sample surveys prior to, during or after census enumeration;*

- *Enable the Central Statistical Office to provide results of the census for areas whose locations are known.*

The 2010 census mapping strategy has involved the use of the Global Positioning System (GPS) in rural areas and satellite imagery in major and small urban areas to delineate enumeration areas. The GPS is a modern tool that enables collection of precise geo codes. So far, 69.4 percent of wards in the county have been mapped.

PILOT CENSUS

The Pilot Census was conducted in February, 2010. Two districts were selected from each of the provinces except for Central, Copperbelt and Lusaka where three districts were selected from each. Both rural and urban districts were selected in each province. In each of the selected districts, mapped and unmapped areas were selected. This was done in order to have a "feel" of enumeration in rural and urban areas; and in mapped and unmapped areas, even when it is anticipated that mapping will be completed at the time of enumeration.
