August, 2010

## Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

### John Kalumbi Acting Director of Census and Statistics

26<sup>th</sup> August, 2010

- August 2010 Inflation records a slight decline
- July 2010 Records Trade Surplus
- Census scheduled for Ocłober 2010!
- Selected Socio-Economic Indicators

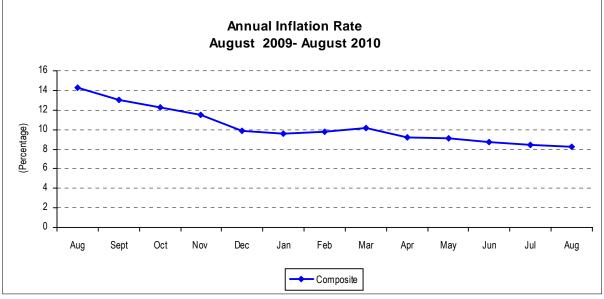

Central Statistical Office, Nationalist Road, P.O. Box 31908, Lusaka • Telefax: 260-1-253468 • E-mail: info@zamstats.gov.zm

## INFLATION

## August 2010 Inflation records a slight decline

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), slightly reduced to 8.2 percent in August 2010 from 8.4 percent in July, 2010. The decrease is largely attributed to declines in some food prices.

## Changes in annual inflation rates for CPI Main Groups

Between July 2010 and August 2010, annual inflation rates increased for clothing and footwear; household fuel and lighting; furniture and household goods; medical care; and other goods and services. The annual inflation rates reduced for food, beverages and tobacco; transport and communication; and recreation and education.

## Export Market Shares by Regional Groupings, July 2010 and June 2010

Asia was the largest market for Zambia's total exports, accounting for 23.4 and 17.9 percent in July and June 2010, respectively. Within Asia, China was the dominant market in both months with 85.5 percent in July and 84.4 percent in June 2010. The United Arab Emirates was the second dominant market with 13.4 and 6.5 percent in July and June 2010, respectively. Other notable markets were India, Saudi Arabia, Singapore, Hong Kong and Pakistan.

Southern African The Development Community (SADC) regional grouping was the second largest market for Zambia's exports, accounting for 18.2 and 23.2 percent in July and June 2010, respectively. Within SADC, South Africa was the dominant market in both months with 40.4 and 51.6 percent in July and June 2010, respectively. Congo (DR) was second with 29.5 percent in July and 22.8 percent in June 2010. Malawi was the third largest market with 12.0 and 10.4 percent in July and June 2010, respectively. Other notable markets were Zimbabwe, Mauritius and Tanzania.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest market for Zambia's total exports accounting for 12.1 and 12.4 percent, in July and June 2010, respectively. Within COMESA, Congo (DR) was the dominant market in both months with 44.4 and 42.7 percent in July and June 2010, respectively. Malawi was the second dominant market with 18.0 percent in July and 19.4 percent in June 2010. The third largest market was Zimbabwe with 12.7 and 17.1 percent in July and June 2010, respectively. Other notable markets were Kenya and Egypt.

The European Union (EU) was the fourth largest market for Zambia's exports accounting for 3.6 and 5.1 percent in July and June 2010, respectively. Within the EU, the dominant market in both months was The United Kingdom with 36.9 and 34.2 percent in July and June 2010, respectively. Belgium was second in July 2010 with 26.4 percent, while in June 2010 Portugal was the dominant market with 20.3 percent. Other notable markets were Netherlands, Luxembourg and France.

## **CENSUS SCHEDULED FOR OCTOBER 2010!**

The Census of Population and Housing is carried out under the provisions of the Census and Statistics ACT Chapter 127 of the laws of Zambia. Under this ACT the Central Statistical Office is mandated to carry out a Census of Population and Housing every ten years. The first comprehensive census was carried out in 1969. Since then, three more censuses have been carried out, in 1980, 1990 and 2000. The next census will be carried out this year (2010).

Under this ACT, all persons residing in Zambia, except foreign diplomats accredited to Zambia are required to provide the necessary information.

### WHAT IS A CENSUS?

A Census of Population and Housing is defined as the total process of collecting, compiling, evaluating, analyzing and publishing demographic, economic and social data pertaining, at a specified time or times, to all persons in a designated area or the whole country. It is the primary source of information about the population of a country. It is undertaken at regular intervals, usually after ten years.

### WHY HOLD A CENSUS?

The main objective of conducting a Population Census is to enumerate all the people in the country in order to provide the Government, private organizations, individuals, and other stakeholders with the number of persons in each district, township, locality, village, etc., according to age, sex, and other characteristics. For every aspect of planning, it is essential to know the size, structure and distribution of the population of a country. For instance, to plan for education, the country needs to have numbers of the school going population by sex and age.

### **CENSUS ACTIVITIES**

Being a huge undertaking, the census encompasses various activities for its success. These include pre census, census and post census activities. Pre census activities include census mapping, pilot census, formation of committees to coordinate all aspects of the census, publicity, stakeholder consultations, recruitment and procurement.

The pilot census is carried out on sample basis to test the methodology of the census including questionnaire suitability, logistical arrangements, mapping, staffing and other resource requirements. The main census involves collection of data on all persons in the country. The post census activities include Post Enumeration Survey, data processing and analysis, report writing and dissemination.

### **CENSUS MAPPING**

One of the most important activities that the office carries out before a census is the census mapping exercise. The objective of this exercise is to delineate the country into enumeration areas (EAS) to ensure that there is no duplication or omission of persons or households during the Census.

A census mapping is also undertaken in order to:

- Determine the location of the population in advance of the census enumeration in order to make possible the recruitment, training and allocation of a sufficient number of enumerators to ensure that census enumeration is completed in time without omissions or duplications;
- Establish the framework for sample surveys prior to, during or after census enumeration;
- Enable the Central Statistical Office to provide results of the census for areas whose locations are known.

The 2010 census mapping strategy has involved the use of the Global Positioning System (GPS) in rural areas and satellite imagery in major and small urban areas to delineate enumeration areas. The GPS is a modern tool that enables collection of precise geographic coordinates. By 19<sup>th</sup> August 2010, 95 percent of the country had been mapped using a combination of GPS and Satellite imagery.

### PILOT CENSUS

The Pilot Census was conducted in February, 2010. Two districts were selected from each of the provinces except for Central, Copperbelt and Lusaka where three districts were selected from each. Both rural and urban districts were selected in each province. In each of the selected districts, mapped and unmapped areas were selected. This was done in order to have a "feel" of enumeration in rural and urban areas; and in mapped and unmapped areas, even when it is anticipated that mapping will be completed at the time of enumeration.
