PREFACE

Zambia in Figures- 2018 features statistical information on various themes pertaining to Social, Economic and Agriculture statistics. Data in this publication are current as of their publishing date or in some cases-projected date. It is a statistical abstract providing summary official statistics on a broad range of conditions and activities in Zambia. Dissemination of statistics remains the centre stage and a fundamental part of all our survey processes during which products are made available in a format appropriate for users.

Therefore, priority is given to ensuring that this publication is easy to read and understand in order to foster communication of statistics. It is my hope that the publication size, format and above all-contents make it easy to use for quick reference purposes.

The official statistics in this publication may be used freely and this publication quoted as the source. Sources of the specific data in this publication are available in various platforms and at CSO offices. Visit us on our website (www.zamstats.gov.zm) and data portal (<http://zambia.zambia.opendataforafrica.org>) for more details and all your other data needs.

I would like to thank all our esteemed data users for their interest in statistics and valuable feedback.

Goodson Sinyenga

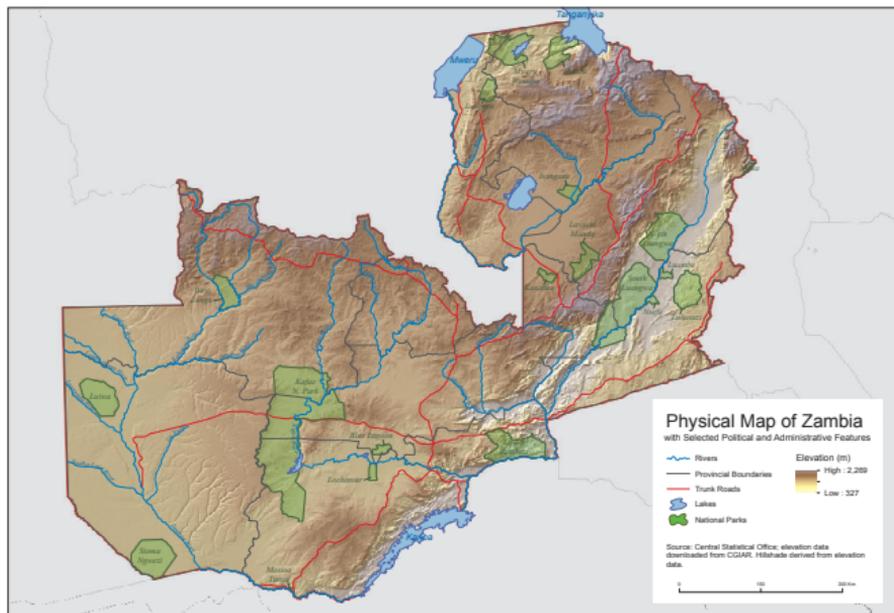

Acting Director of Census and Statistics

ABOUT ZAMBIA

Introduction

Zambia is a landlocked Sub-Saharan country sharing boundaries with Malawi, Mozambique, Zimbabwe, Botswana, Namibia, Angola, Democratic Republic of Congo and Tanzania. It has a total surface area of 752,614 square kilometers, thus ranking among the smaller countries in South Central Africa. It lies between 8 and 18 south latitudes and longitudes 22 and 34 east.

Administration

Zambia gained independence from Britain on the 24th October, 1964. It has experienced three major phases of governance, the multi party system from 1964 to 1972, one party system from 1972 to 1991 and multi party system again since 1991.

Administratively, the country is divided into ten (10) provinces namely; Central, Copperbelt, Eastern, Luapula, Lusaka, Muchinga, Northern, North Western, Southern and Western. These provinces are further subdivided into districts. There are a total of 105 districts. Lusaka is the capital city of Zambia and seat of government. The government comprises of Central and Local government.

Natural Resources

Zambia is situated on the great plateau of Central Africa. Its vegetation is mainly made up of Savannah woodlands and grassland. It has a tropical climate with three distinct seasons; the cool and dry season, the hot and dry season and the hot and wet season.

The country has abundant natural resources. It has five main rivers namely; Zambezi, Kafue, Luangwa, Luapula and Chambeshi rivers. In addition to these rivers, the country also has major lakes such as Tanganyika, Mweru, Mweru Wa Ntipa, Bangweulu and the man-made lakes Kariba and Itezhi Tezhi. A major tourist feature in the southern part of the country is the Victoria Falls which is one of the seven wonders of the world.

Zambia has some of the nature's best wildlife and game reserves affording the country with abundant tourism potential for earning foreign exchange. The magnificent Luangwa and Kafue National Parks have one of the most prolific animal population in Africa. The country is also endowed with various minerals and precious stones such as copper, emeralds, zinc, lead and cobalt.

CONCEPTS AND DEFINITIONS

Total Fertility Rates

Average number of live births a woman would have by age 50 if she were subject, throughout her life, to the age specific fertility rates observed in a given year. The calculation assumes there is no mortality and is expressed as number of children per woman.

Life Expectancy at Birth

Average number of years expected to be lived by a birth cohort, based on prevailing age specific mortality rates. In other words, it is the number of years a child born today is expected to live taking into account the current mortality conditions.

Gross Domestic Product (GDP)

Total value of economic activities taking place in the nation (Zambian territory) in a period usually a year.

Per Capita GDP

This is the GDP over the total population of a nation. It gives the share of the total GDP to an individual in a nation.

Traditional Export (TEs)

This category comprises mainly metals (i.e. copper and cobalt).

Non- Traditional Export (NTEs)

Non- tradition exports include all such merchandize than copper and cobalt.

Labour force

The sum total of the employed and the unemployed persons at a given point in time.

Potential Labour Force

The 19th ICLS resolution defines the potential labour force as all persons of working age who, during the short reference period, were neither in employment nor in unemployment and: (a) carried out activities to “seek employment”, were not “currently available” but would become available within a short subsequent period established in the light of national circumstances (i.e. unavailable jobseekers); or (b) did not carry out activities to “seek employment”, but wanted employment and were “currently available” (i.e. available potential jobseekers).

Employment

All persons of working age who, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit.

Unemployment

All persons of working age who were not in employment, carried out activities to seek employment during a specified recent period and were currently available to take up employment given a job opportunity.
