REVISED POPULATION SUMMARY REPORT

Volume Two

February, 2025

FOREWORD

The Zambia 2022 Census of Population and Housing was conducted between 18th August and 21st September 2022, guided by the 3rd edition of the United Nations Principles and Recommendations for the 2020 round of censuses. This census marked Zambia's sixth national population census since independence in 1964. The theme "**Everyone Counts**" is aligned with the United Nations 2030 Agenda, emphasizing the importance of inclusivity and ensuring that no one is left behind.

This revised report includes corrected texts and introduces new tables specifically detailing various age categories, including children, youth, those eligible for obtaining National Identity Cards and those eligible for voting. Additionally, the report presents final population figures captured from households in permanent residences, homeless households and institutionalised populations.

Information is disaggregated by age and sex across all administrative levels; National, Provincial, District, Constituency and Ward. The report provides insights into the number of households, household headship by sex, average household size, land area, population density, annual population growth rates, sex ratios and age dependency ratios.

The analysis by administrative boundaries is in accordance with the definition and narrative outlined in Statutory Instrument (SI) No. 114 of 2021, which outlines the current administrative boundaries. It is important to note that figures from the previous census have also been revised to reflect these boundaries and caution should be exercised when referencing them.

I would like to express my deep appreciation to the Government of the Republic of Zambia for its unwavering financial and logistical support, which extended from the highest levels of governance down to the sub-national structures. Special acknowledgement goes to the Ministry of Finance and National Planning for their immense support to this important national exercise.

I also want to extend my sincere gratitude for the invaluable support we received from various organizations. The United Kingdom Assistance for International Development (UKAID) through the United Nations Population Fund (UNFPA) generously provided 15,000 of the 45,000 tablets required for data collection. The United States Agency for International Development (USAID), through the United States Census Bureau (USB), was instrumental in providing essential technical support for key census processes. The United Nations (UN), through the UNFPA, has been a steadfast partner, offering continuous technical and financial support since the inception of the Census planning process in 2016. UNFPA's contributions such as capacity development support, engagement of international technical advisors, procurement of hardware and software for census activities and assistance with resource mobilization efforts were pivotal to our success.

Additionally, I would like to express my gratitude to the United Nations International Children's Fund (UNICEF) for their invaluable support in questionnaire development and pre-testing, and to the United Nations Development Programme (UNDP) for their crucial assistance with geospatial data cleaning activities. I also appreciate the support from the United Nations Economic Commission for Africa (UNECA)- African Regional Office for their valuable technical contributions in tablet provisioning, National Census Monitoring Dashboard, the Executive Monitor as a dissemination tool and technical assistance for the Post Enumeration Survey.

Furthermore, the World Bank, through the Zambia Integrated Forest Landscape Project (ZIFLP), played a crucial role by providing both financial and technical support during mapping and listing activities in the Eastern Province in 2020.

I would also like to acknowledge the contributions of the private sector; New Horizon Printing Press Ltd., Pro-Print Ltd., ECOBANK Zambia Ltd., Zambia National Commercial Bank (ZANACO), First National Bank (FNB), and CHOPPIES Supermarket Ltd. Their financial, material, and technical assistance was invaluable in enabling us to conduct the census successfully. We would further like to recognise the support we received from Zambia National Broadcasting Corporation (ZNBC) in sensitizing the public about the 2022 Census of Population and Housing.

Finally, I extend my sincere thanks to the people of Zambia for their cooperation in providing essential information to the census officers at all levels. Your contributions were crucial in collecting, processing, and compiling this valuable data, and we are truly grateful for your participation.

Sheila S. Mudenda

Revision Note:

Population Summary Report, Volume Two

Overview

This document serves as a revision note for the **Population Summary Report, Volume Two**. The revision includes additional data on special age group populations.

It is also important to note that the **Preliminary Report** was released prior to the release of the **Population Summary Report, Volume Two, and Revised Population Summary Report, Volume Two**. Preliminary results were released within three months of the census and were based on early data processing and unreconciled administrative boundaries. The preliminary results provided an initial snapshot of population counts and basic demographic characteristics, which is useful for understanding emerging trends and facilitating immediate planning efforts.

The final population and demographic data results were published in the **Population Summary Report, Volume Two**, after a more comprehensive and meticulous data processing phase. These results incorporated complete data from all respondents, that is, households in permanent residences, homeless households and institutionalised populations. In addition, the report took care of all administrative boundary changes that were not reconciled during preliminary data processing.

It is worth noting that the **Population Summary Report, Volume Two**, has also been revised to a new edition called **Revised Population Summary Report, Volume Two**, to include additional demographic analysis. The **Revised Population Summary Report, Volume Two** presents the final results, which should be used as the official reference for planning and decision-making by government and other key stakeholders.

1.0 INTRODUCTION

A Census of Population and Housing reflects the facts as they exist in a country about its people, their housing, religion, culture, geographical movements, language, education, health, socio-economic status among other characteristics.

Zambia conducted her sixth National Census of Population and Housing in 2022. So far, the country has conducted censuses in 1969, 1980, 1990, 2000 and 2010. The 2022 Census of Population and Housing was carried out from 18th August to 21st September, 2022.

Persons who were present at any time at the household during the reference period (18th August to 7th September, 2022) were counted directly as Usual Household Members present at the Housing Unit/Dwelling. Those that visited the household and stayed throughout the reference period were counted as Visitors of the Household. Those who were absent the entire enumeration period were enumerated by proxy, that is, as Usual Household Members Absent from the Housing Unit/Dwelling.

Detailed personal information was only collected for Usual Household Members present and Visitors found at the Housing Unit/Dwelling during

the reference period. For Usual Household Members Absent, only Age, Sex, Relationship to Household Head and Residence Status were collected by proxy from the main respondent of the household. The Census also collected information for individuals residing in collective living quarters (institutions such as prisons and orphanages) as well as information on individuals in homeless households.

The main objectives of the 2022 Population Census were:

- To provide accurate and reliable information on the size, composition and distribution of the population of Zambia at Provincial, District, Constituency and Ward levels;
- To provide information on the demographic and socio-economic characteristics of the population of Zambia;
- To provide an accurate sampling frame for future inter-censal household and population-based surveys;
- To generate statistics on small areas and small population groups; and
- To provide a benchmark for research and analysis, particularly for population projections.

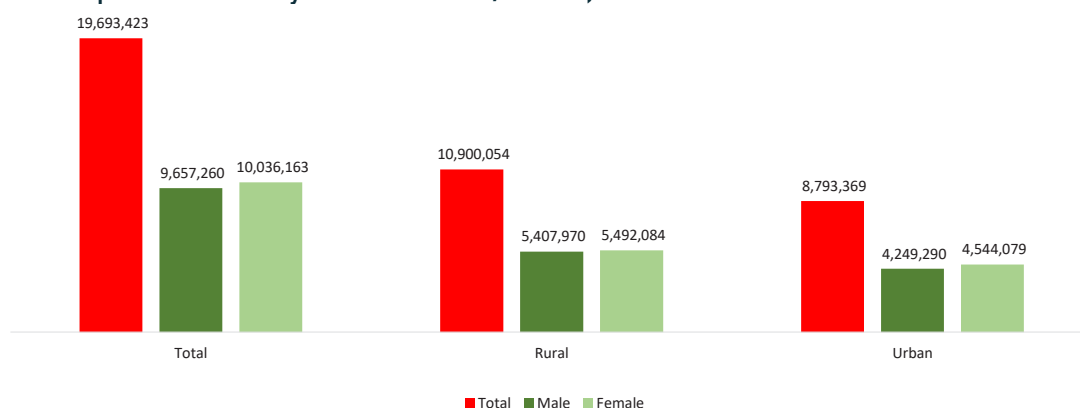

2.0 POPULATION SIZE, COMPOSITION, DISTRIBUTION AND GROWTH

2.1: Population by Sex and Rural/Urban

The total population as at 8th September, 2022 was 19,693,423. There were more females (10,036,163) than males (9,657,260). The rural areas had more people at 10,900,054 compared with the urban areas at 8,793,369. The female

population was more than the male population in both rural and urban areas. The total population for the 2022 Census of Population and Housing included the population from usual households, the homeless and the institutionalised population.

Figure 2.1: Population Size by Sex and Rural/Urban, Zambia 2022

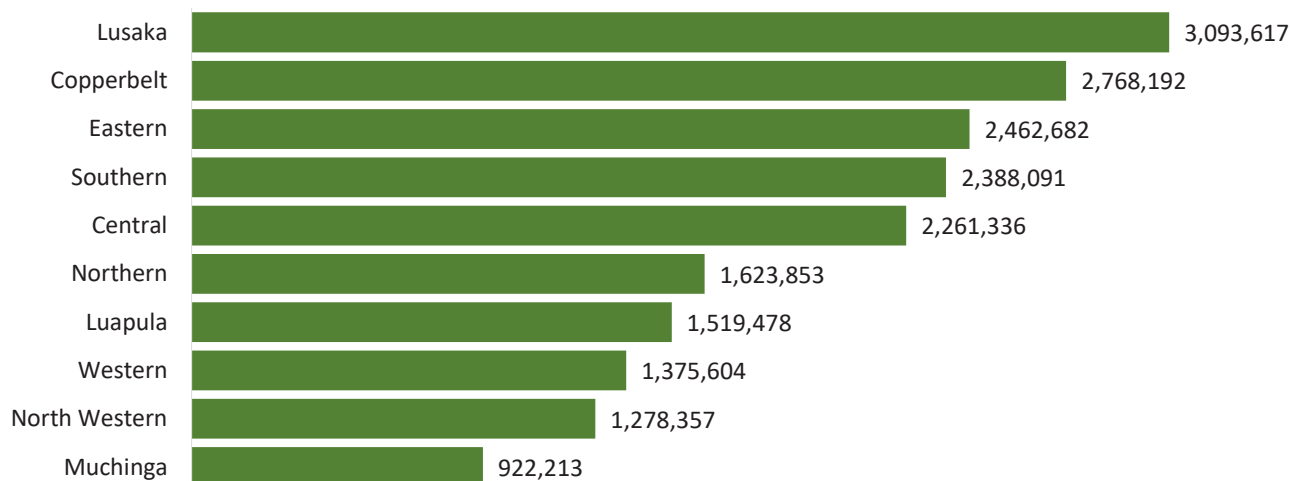

Source: 2022 Census of Population and Housing

2.2: Population by Province

Figure 2.2 shows the Population size by Province. Lusaka Province had the largest population at 3,093,617 followed by Copperbelt Province at 2,768,192. Muchinga Province had the smallest population at 922,213.

Figure 2.2: Population Size by Province, Zambia 2022

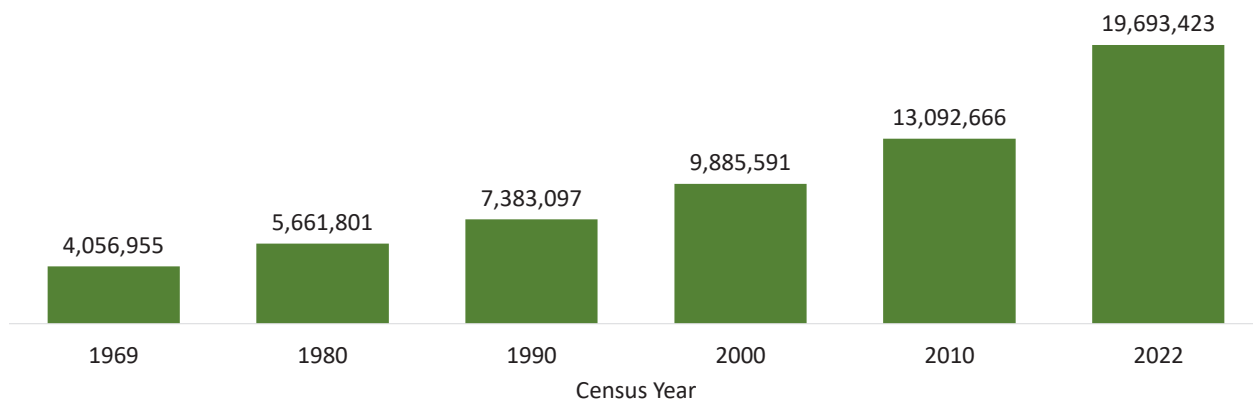

Source: 2022 Census of Population and Housing

2.3 Trends in Population Size

The population of Zambia has been increasing over the years as shown in **Figure 2.3**. The

population has more than quadrupled from 4,056,955 in 1969 to 19,693,423 in 2022.

Figure 2.3: Trends in Population Size, Zambia 1969-2022

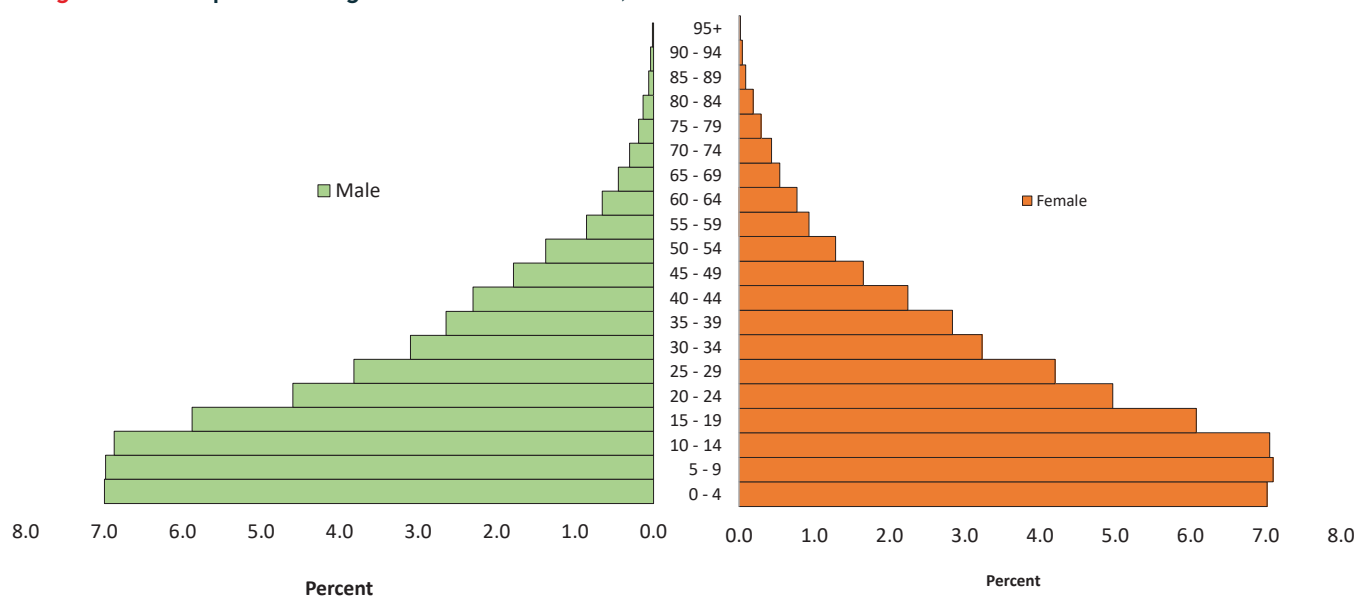

Sources: 1969, 1980, 1990, 2000, 2010 and 2022 Censuses of Population and Housing

2.4: Age and Sex Composition of the Population

Figure 2.4 shows the age and sex composition of Zambia's population in 2022. Horizontal bars in the pyramid show the percent of total population for each sex. The pyramid shows that the population is predominantly young as

reflected by its broad base, particularly for the population aged below 15 years. In comparison, the segment of the population 64 years and older is relatively small.

Figure 2.4: Population Age and Sex Structure, Zambia 2022

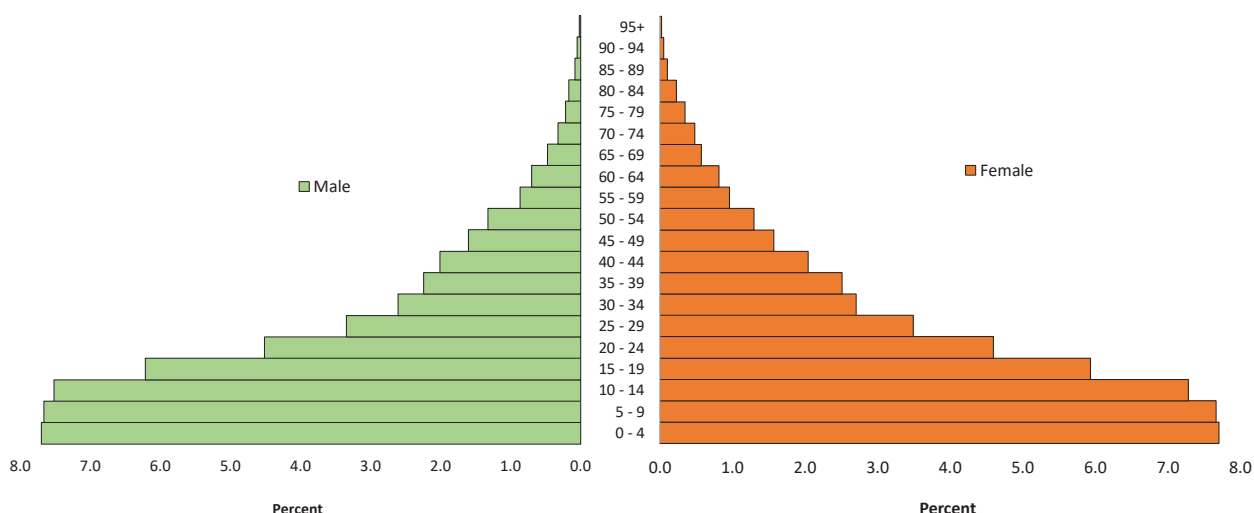

Source: 2022 Census of Population and Housing

Figure 2.5 shows the age and sex composition of Zambia in 2022 in the rural areas. The broad base of the pyramid indicates more persons

aged 0-14 years. It gets narrower in ages 15 years and older indicating a reduction in the population with increase in age.

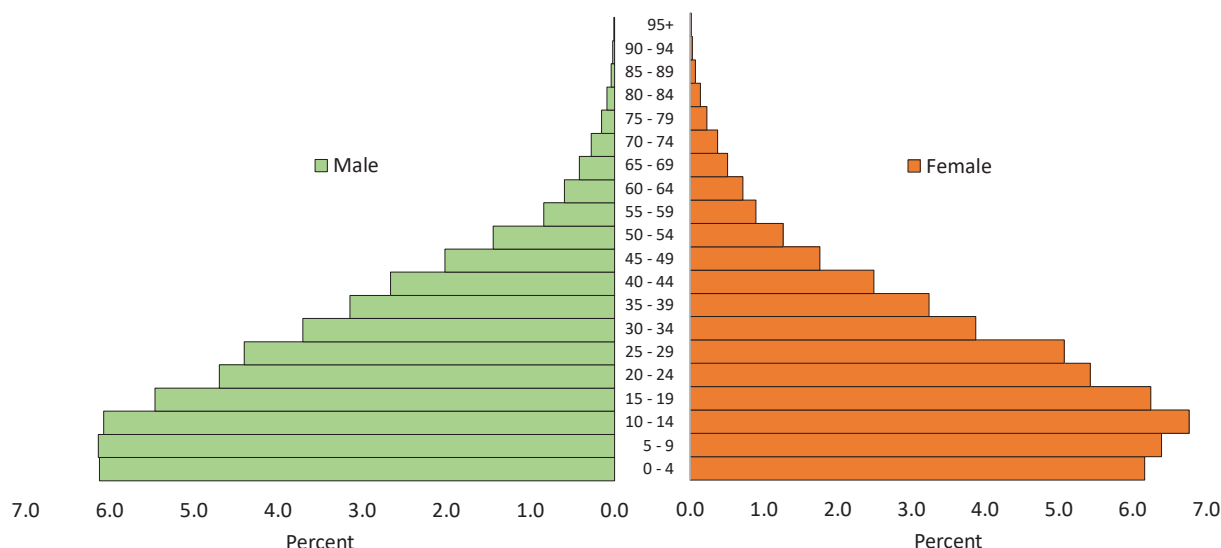

Figure 2.5: Population Age and Sex Structure, Zambia Rural 2022

Source: 2022 Census of Population and Housing

In the urban areas, the pyramid is broadest in the age group 10-14 for females and in the age group 5-9 for males (Figure 2.6).

Figure 2.6: Population Age and Sex Structure, Zambia Urban 2022

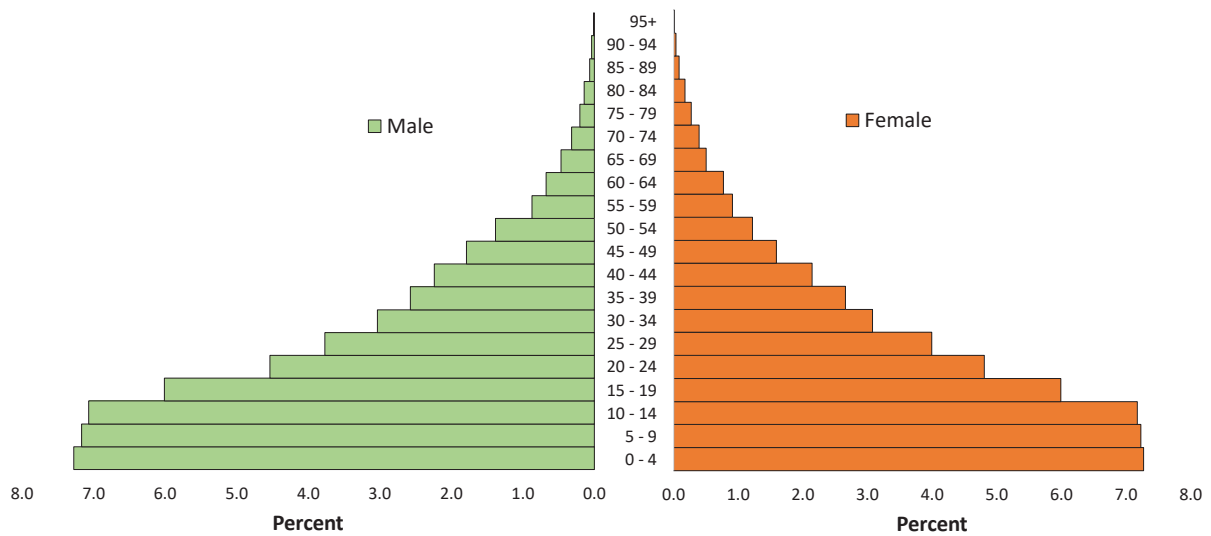

Source: 2022 Census of Population and Housing

Figures 2.7-2.16 show the age and sex structure for the ten provinces. The age structure for all the provinces depicts a young population, with small populations in the ages 65 years and

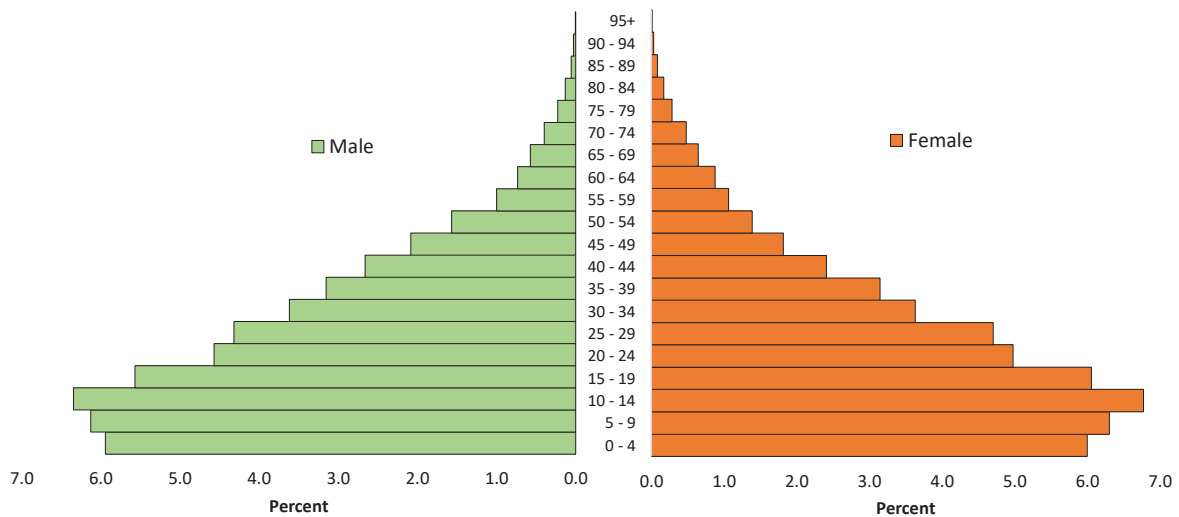

older. The age structure for Central, Eastern and Northern provinces follows a typical pyramid shape where its broadest at the base (0-4 years) and gets narrower with increase in age.

2.5: Selected Special Population Groups

Some interventions implemented by various stakeholders target specific age groups. Table 2.1 shows the population proportions by selected specific age groups. Included in the table is the age group for children under five which is key for child health interventions and programming. The population aged 16 years and above represents the population that have attained the age at which one can obtain a National Registration Card (NRC) in Zambia, while the population aged 0-18 years represents

the population of children below the age of 19. The population aged 19-34 years represents the youth population while the population aged 18 years and above represents the population who have attained the voting age.

Table 2.1 shows that the proportions for population aged 0-4, 0-18 and those aged below 15 years reduced in 2022 compared to 2010. The rest of the age groups have increased in 2022 compared to 2010.

Table 2.1: Population Proportion by Selected Age Groups, Zambia 2010 & 2022

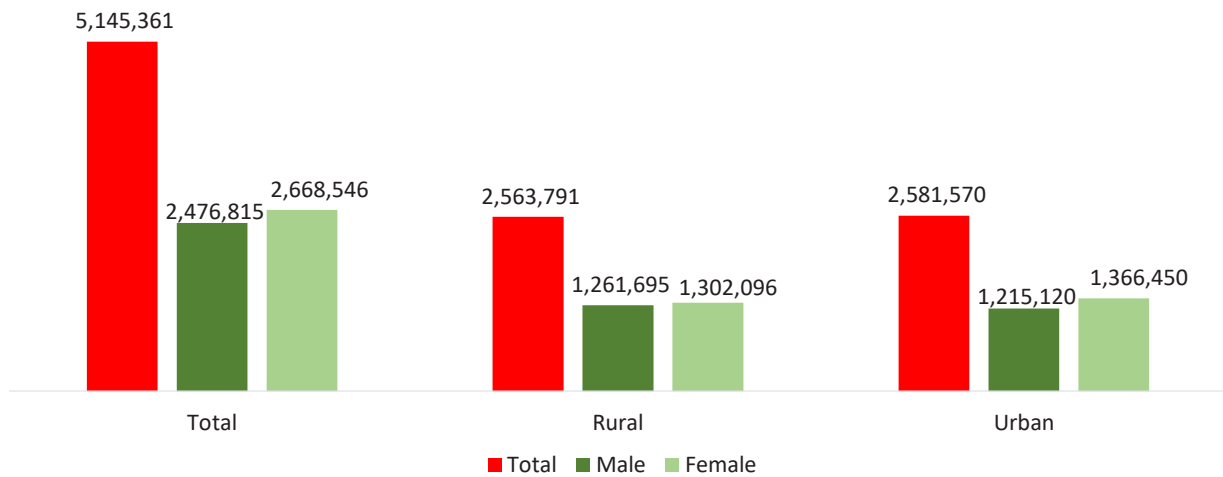

Age Group	2010		2022	
	Number	Percent	Number	Percent
0-4	2,252,748	17.2	2,760,251	14.0
<15	5,943,169	45.4	8,275,958	42.0
16+	6,817,872	52.1	10,914,256	55.4
0-18	7,204,150	55.0	10,193,441	51.8
19-34	3,362,161	25.7	5,145,361	26.1
15-64	6,803,054	52.0	10,868,136	55.2
18+	6,222,313	47.5	9,973,631	50.6
65+	346,443	2.6	549,329	2.8

Sources: 2010 and 2022 Censuses of Population and Housing

Figure 2.17 shows the youth population by sex and rural urban. At national level, there were

more female youths than male youths. This is similar in both rural and urban areas.

Figure 2.17: Youth Population Aged 19-34 years by Sex and Rural Urban, Zambia 2022

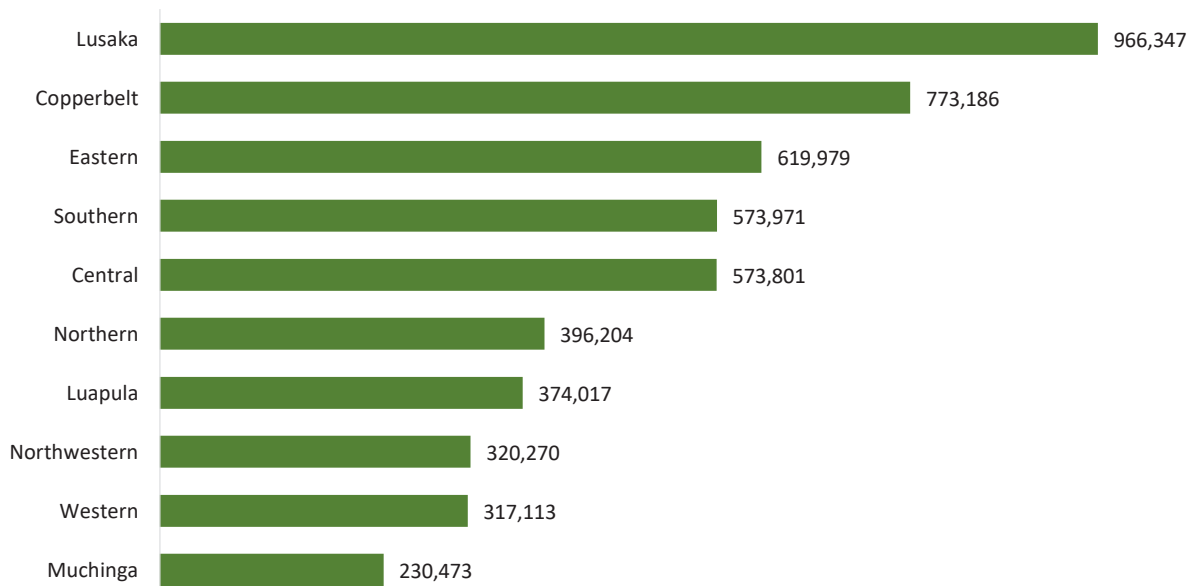

Source: 2022 Census of Population and Housing

By province, Lusaka Province had the largest youth population [966,347] followed by the Copperbelt Province [773,186]. The province

with the smallest number of youths [230,473] was Muchinga Province (Figure 2.18).

Figure 2.18: Youth Population Aged 19-34 Years by Province, Zambia 2022

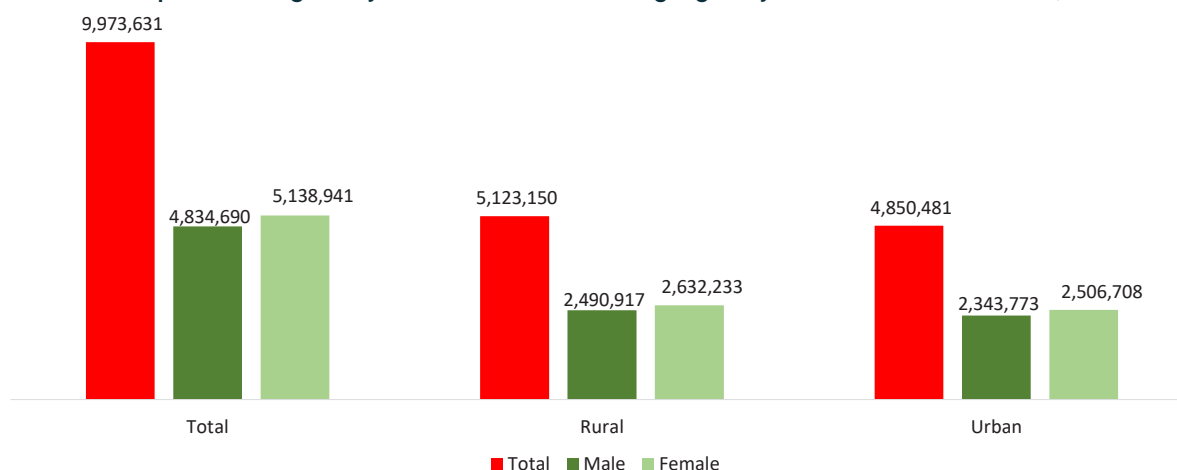

Source: 2022 Census of Population and Housing

Figure 2.19 shows the population aged 18 years and older by sex and rural/urban. This population can also be referred as the voting

age population. Like the youth population, more females than males were aged 18 years and above in both rural and urban areas.

Figure 2.19: Population Age 18 years and older (Voting Age) by Sex and Rural/Urban, Zambia 2022

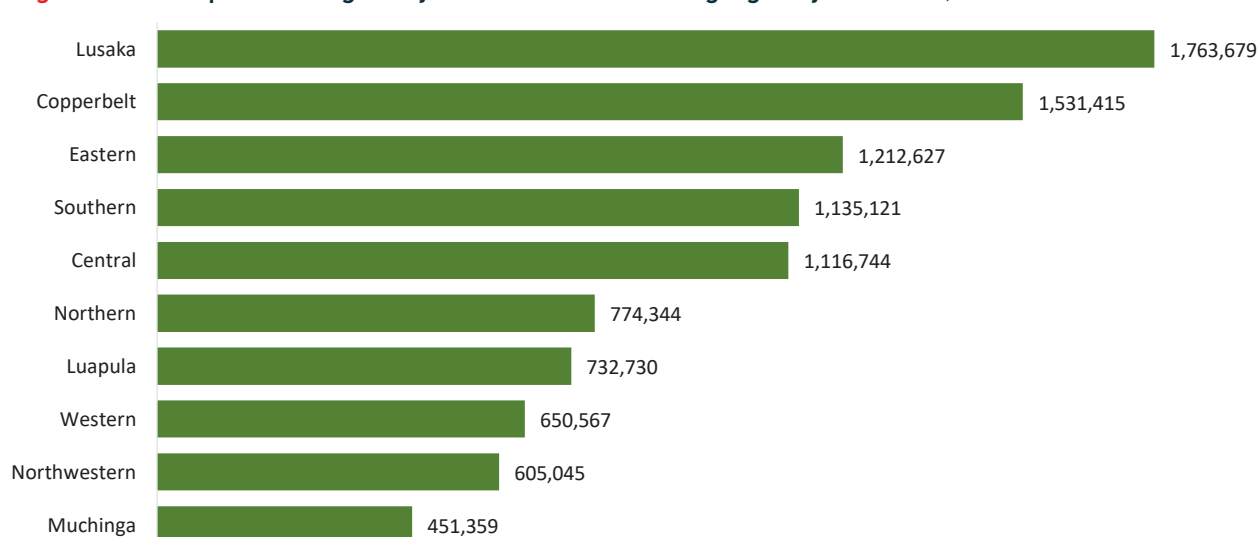

Source: 2022 Census of Population and Housing

By province, Figure 2.20 shows that Lusaka Province had the largest number (1,763,679) of persons aged 18 years and above, followed by the Copperbelt Province (1,531,415). The

province with the smallest number of persons aged 18 years and above was Muchinga Province (451,359).

Figure 2.20: Population Age 18 years and older (Voting Age) by Province, Zambia 2022

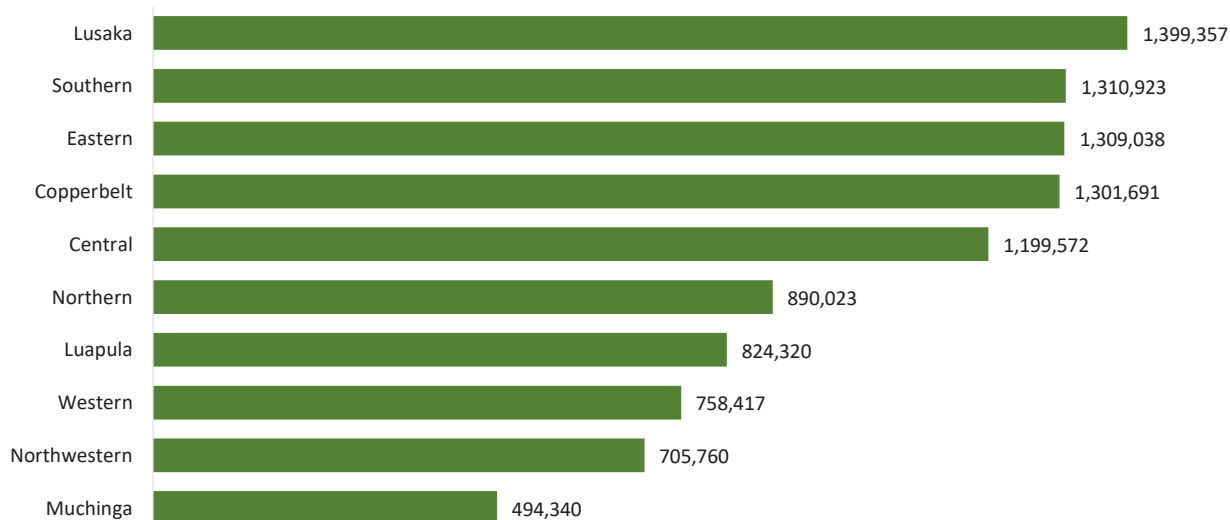

Source: 2022 Census of Population and Housing

Figure 2.21 shows the children population by Province. Lusaka Province had the largest number (1,399,357) of children followed by Southern Province (1,310,923). Muchinga had

the smallest number (494,340) of children. Like Lusaka Province, Southern and Eastern provinces have more children than Copperbelt Province.

Figure 2.21: Children Population Aged 0-18 years by Province, Zambia 2022

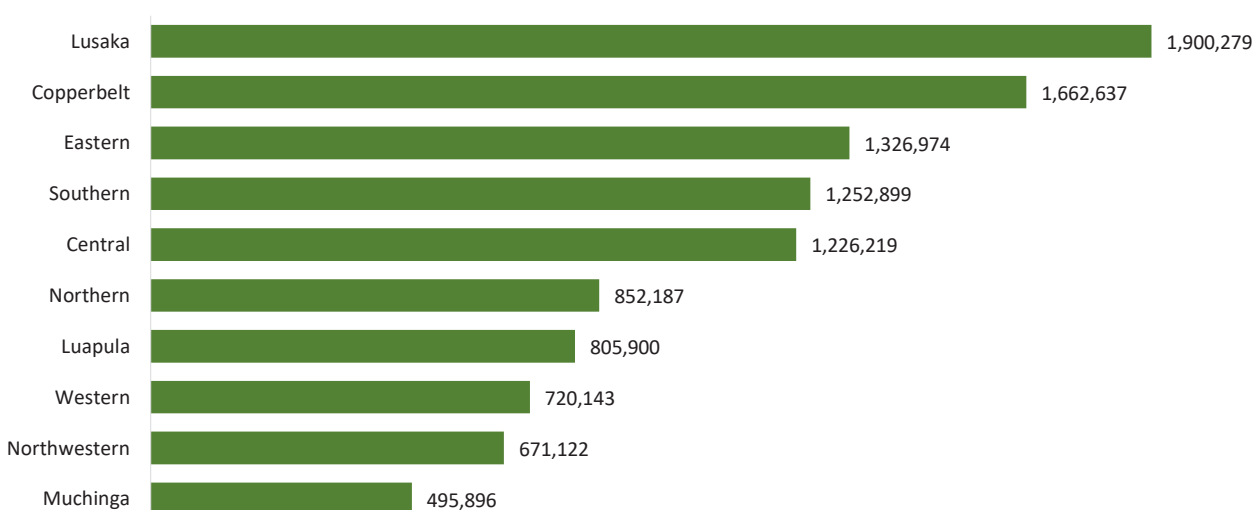

Source: 2022 Census of Population and Housing

Figure 2.22 shows the population aged 16 years and older. Lusaka Province had the largest population (1,900,279) aged 16 years and older,

followed by Copperbelt Province (1,662,637). Muchinga Province had the smallest number (495,896) of persons aged 16 years and older.

Figure 2.22: Population Aged 16 years and older by Province, Zambia 2022

Source: 2022 Census of Population and Housing

2.6 Sex Ratio at Birth

The sex ratio represents the number of males per 100 females. A ratio below 100 indicates more females while a ratio above 100 indicates more males. **Table 2.2** shows the sex ratio at birth. The sex ratio in the table was calculated

based on the population aged below one year at the time of the census. At national level, there were 100 males per 100 females, indicating an equal number of males and females at birth. Muchinga, North Western and Western provinces had more males per 100 females at birth.

Table 2.2: Sex Ratio at Birth by Rural/Urban and Province, Zambia 2022

Province	Total	Rural	Urban
Total	100	100	100
Central	100	100	99
Copperbelt	99	98	99
Eastern	98	98	98

Southern	100	100	101
Western	102	102	100

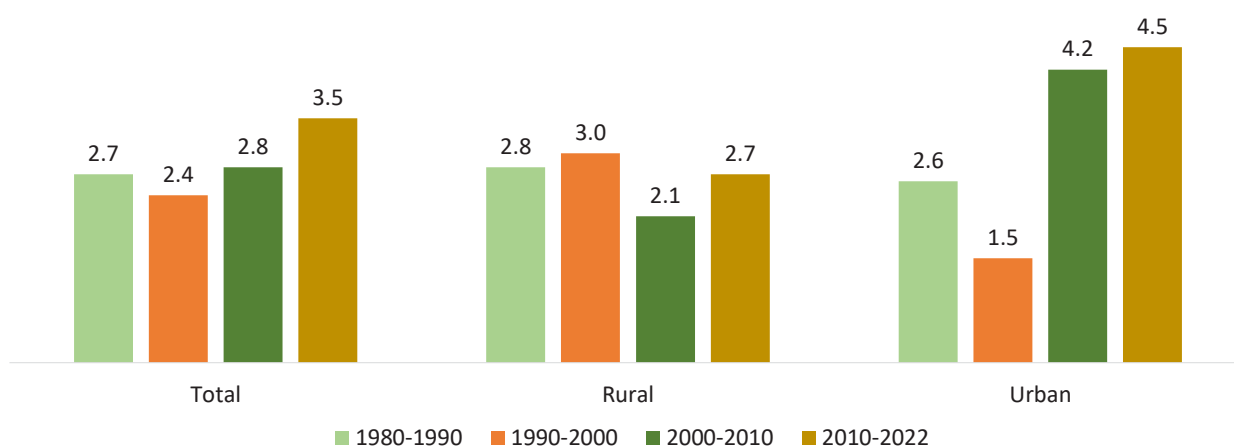

Source: 2022 Census of Population and Housing

2.7: Average Annual Population Growth Rate

The national average annual population growth rate between 2010 and 2022 was 3.5 percent. It increased by 0.7 percentage points from the 2.8 percent recorded during the 2000-2010 intercensal period. Rural areas recorded an

increase of 0.6 percentage points in the growth rate from the 2.1 recorded between 2000 and 2010, the urban areas recorded an increase of 0.3 percentage points in the same period (**Figure 2.23**).

Figure 2.23: Trends in Average Annual Population Growth Rate by Rural/Urban, Zambia 1980-1990, 1990-2000, 2000-2010 and 2010-2022

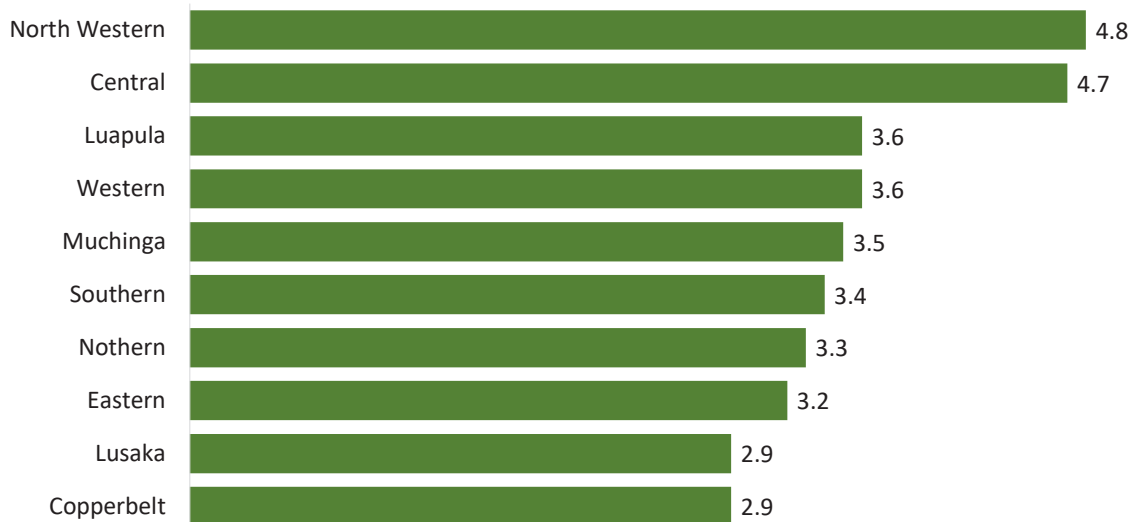

Sources: 1980, 1990, 2000, 2010 and 2022 Censuses of Population and Housing

*Note: Some areas have been reclassified from rural to urban in 2022

Figure 2.24 shows the average annual growth rate by province. North Western Province had the highest average annual growth rate of 4.8 percent during the 2010-2022 intercensal

period. Central Province had the second highest growth rate of 4.7 percent. Copperbelt and Lusaka provinces had the lowest growth rate of 2.9 percent each.

Figure 2.24: Average Annual Population Growth Rate by Province, Zambia 2010-2022

Source: 2022 Census of Population and Housing

2.8 Population Density

Population Density refers to the total number of people per square kilometre.

Table 2.3 shows Zambia's area and population density by province from 1990 to 2022. Zambia has a total surface area of 752,612 square kilometres. The country is sparsely populated with a population density of 26.2 persons per square kilometre in 2022, representing an increase of 8.8 persons per square kilometre

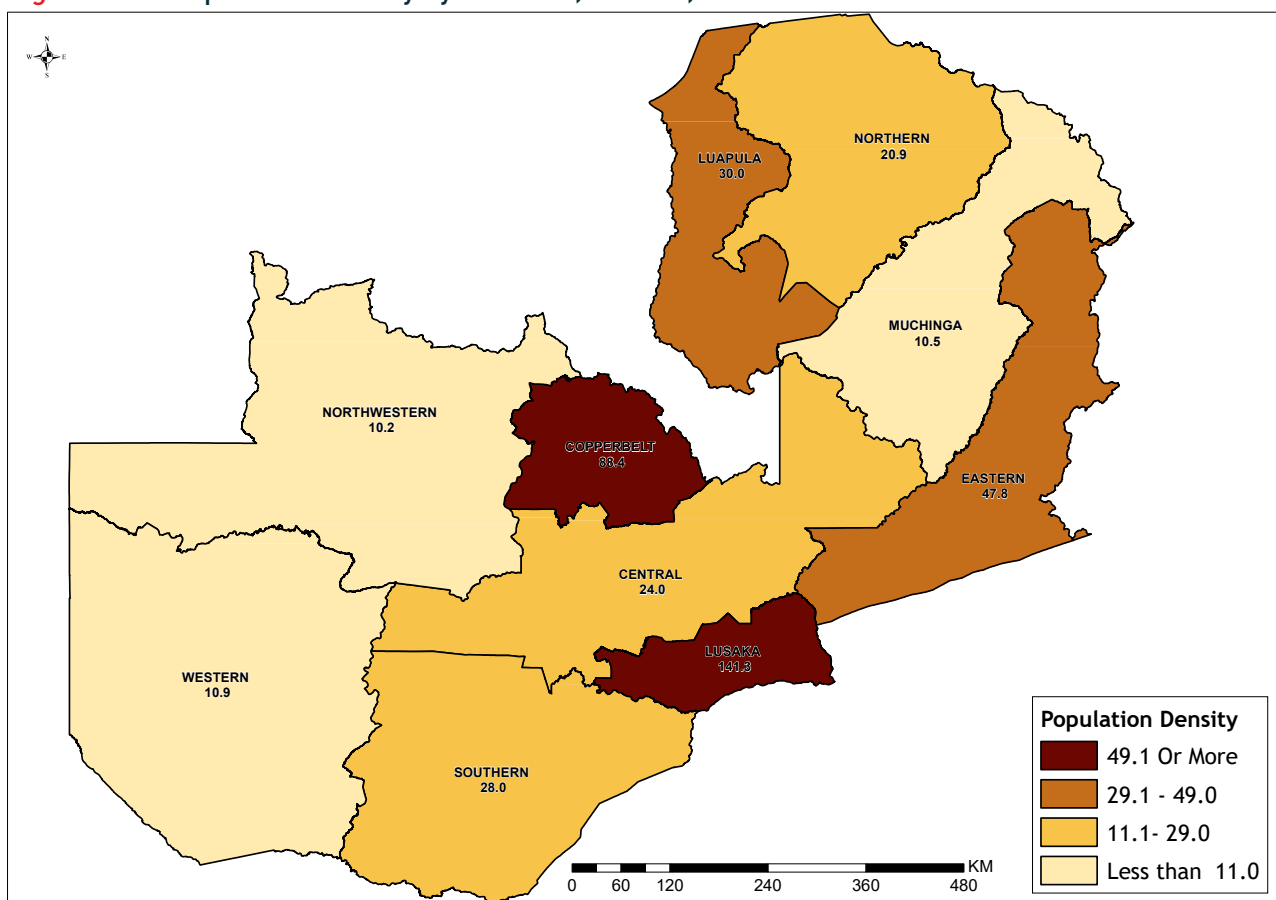

from 2010. In 2022, Lusaka was the most densely populated province with a density of 141.3 persons per square kilometre. The second most densely populated province was Copperbelt with a density of 88.4 persons per square kilometre. North Western Province was the least densely populated with 10.2 persons per square kilometre (Table 2.3 and Figure 2.25).

Table 2.3: Population Density (Population per sq.km) by Census Year and Province, Zambia, 1990 - 2022

Province	Area sq.km	1990	2000	2010	2022
Zambia	752,612	10.3	13.1	17.4	26.2
Central	94,394	8.3	10.7	13.8	24.0
Copperbelt	31,328	46.6	50.5	63.0	88.4
Eastern	51,476	14.5	17.8	30.9	47.8
Luapula	50,567	11.2	15.3	19.6	30.0
Lusaka	21,896	45.3	63.5	100.1	141.3

Southern	85,283	11.3	14.2	18.6	28.0
Western	126,386	5.1	6.1	7.1	10.9

Sources: 1990, 2000, 2010 and 2022 Censuses of Population and Housing

Figure 2.25: Population Density by Province, Zambia, 2022

Source: 2022 Census of Population and Housing

2.9 Median Age

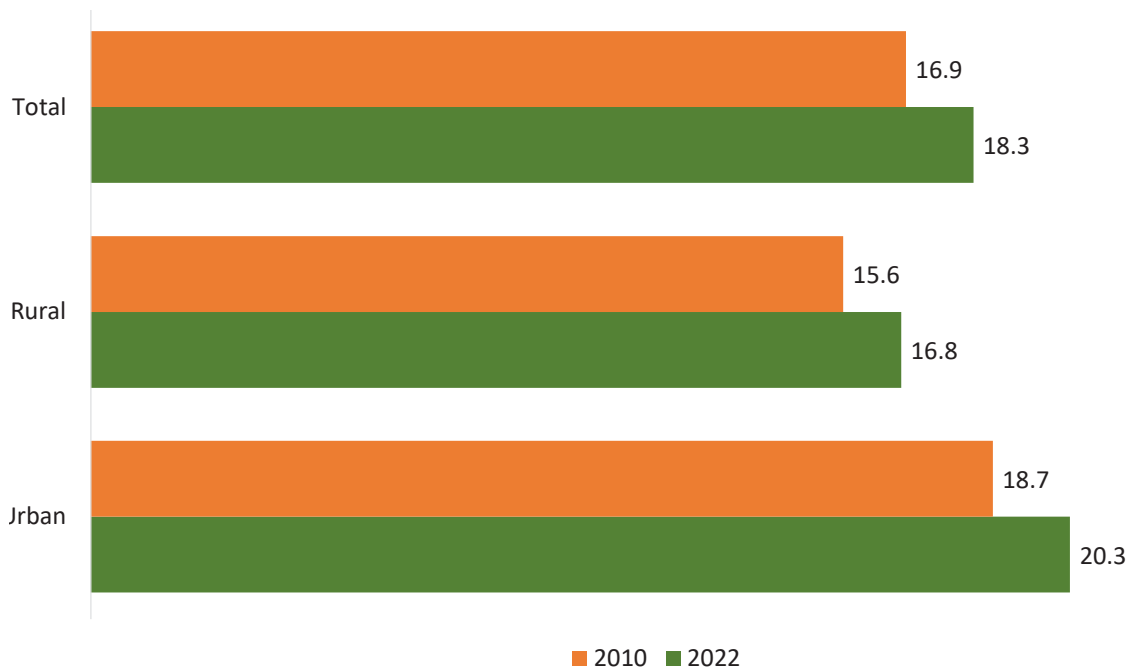

Median age is the age at which the population is divided into two numerically equal groups i.e. half the population is below the age, while the other half of the population is above the age.

This section summarises the age distribution for the 2022 Census using the median age. A median age that is lower than 20 years shows a young population; that between 20 and 30

years indicates an intermediate population that is either becoming younger or ageing; while a population with a median age above 30 years is an old population.

Figure 2.26 shows the median age by rural and urban areas in 2010 and 2022. The median age for the country was 18.3 in 2022 while in 2010 it was 16.9. In 2022, the median ages for rural and urban areas were 16.8 and 20.3, respectively.

Figure 2.26: Median Age by Rural/Urban, Zambia 2010 and 2022

Sources: 2010 and 2022 Censuses of Population and Housing

Figure 2.27 shows the median age by sex and rural/urban. The median age for males and females for the country was 18.1 years and 18.5 years, respectively. The median age for

males in rural areas was 16.5 years while that of females was 17.1 years. In urban areas, the median age for males was 20.4 years while that of females was 20.2 years.

Figure 2.27: Median Age by Sex and Rural/Urban, Zambia 2022

Source: 2022 Census of Population and Housing

Figure 2.28 shows the median age by province. The median age ranged from 21.2 years in

Lusaka Province to 17.0 years in North Western Province.

Figure 2.28: Median Age by Province, Zambia 2022

Source: 2022 Census of Population and Housing

Figure 2.29 shows the median age by sex and province. Among males, the median age ranged from 21.5 years to 16.3 years in Lusaka and Western provinces, respectively. Among

females, the median age ranged from 21.0 years in Lusaka Province to 17.2 years in North Western Province.

Figure 2.29: Median Age by Sex and by Province, Zambia 2022

2.10 Age Dependency Ratio

This section summarises the number of persons in the 2022 Census who are not economically active for every 100 economically active persons.

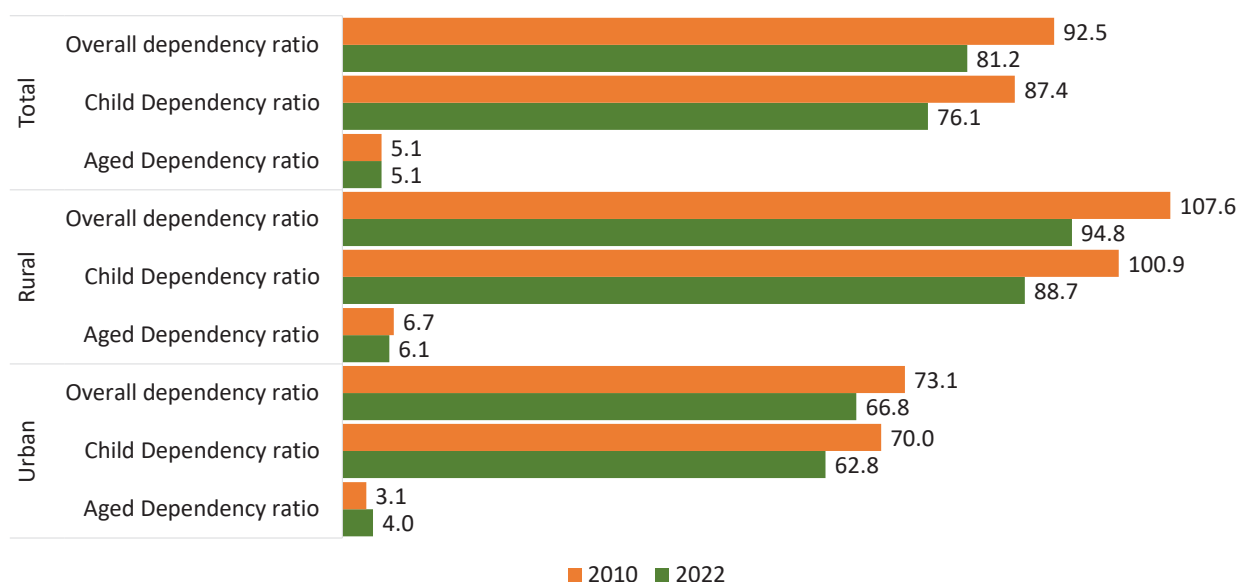

Age dependency ratio is the ratio of the persons aged 0-14 years and 65 years and older per 100 persons in the working age 15-64 years old. There are three kinds of age dependency ratios that can be used to track changes of the population (for economic purposes) over time. Age dependency ratio shows the burden of dependency on the productive population aged 15-64 years.

In this section, all the three age dependency ratios have been calculated, namely;

- i. **Child dependency ratio** – the ratio of the population under 15 years per 100 persons in the working age population 15 to 64 years;
- ii. **Aged (Old-age) dependency ratio** – the ratio of the population 65 years and older per 100 persons in the working age population 15 to 64 years; and
- iii. **Overall dependency ratio** – the ratio of the combined (under 15 and 65 years and older) per 100 persons in the working age population 15 to 64 years.

Figure 2.30 shows Age Dependency ratio by rural/urban for the 2010 and 2022 Censuses. In 2022, the Overall Dependency ratio was 81.2 persons for every 100 persons in the productive population, which was a reduction from 92.5 in 2010. Similarly, the Child Dependency ratio declined from 87.4 in 2010 to 76.1 in 2022. The pattern is similar for both rural and urban areas.

Figure 2.30: Age Dependency Ratio by Rural/Urban, Zambia 2010 and 2022

Sources: 2010 & 2022 Censuses of Population and Housing

Table 2.4 shows the Overall, Child and Aged Dependency Ratios by province for the 2010 and 2022 Censuses. In 2022, Western Province had the highest Overall Dependency Ratio at 94.5 persons while Lusaka Province had the

lowest at 62.1 persons. In 2010, North Western Province had the highest Overall Dependency Ratio at 107.0 persons while Lusaka Province had the lowest at 72.5 persons.

Table 2.4: Overall, Child and Aged Dependency Ratios by Province, Zambia, 2010 and 2022

Province	Age Dependency Ratios					
	Overall		Child		Aged	
Year	2010	2022	2010	2022	2010	2022

3.0 INSTITUTIONAL AND HOMELESS POPULATIONS

The 2022 Census collected information on individuals found in institutions as well as those not found in any fixed place of abode. Those that were found and captured from institutions were termed as the “**Institutional Population**”, whereas those that were found and captured from non-residential or any fixed place of residence were termed as the “**Homeless Population**”.

3.1 Institutional Population

The institutional population covers all the individuals found in institutions or collective living quarters such as correctional facilities, orphanages, convents, hotels, security services training camps, hospices, boarding schools’ dormitories, boarding houses, college and university hostels among others. The institutional population is broken down into Institutionalised and Non-institutionalised.

Institutionalised Population- These are persons who are residents of institutional group quarters who are primarily unable or unlikely to participate in the census (i.e. they cannot be captured from any household). The institutionalised population is persons residing in institutional group quarters such as orphanages, police/military training camps, adult correctional facilities, juvenile facilities, skilled-nursing facilities, and other institutional facilities such as mental (psychiatric) hospitals and in-patient hospice facilities. To qualify

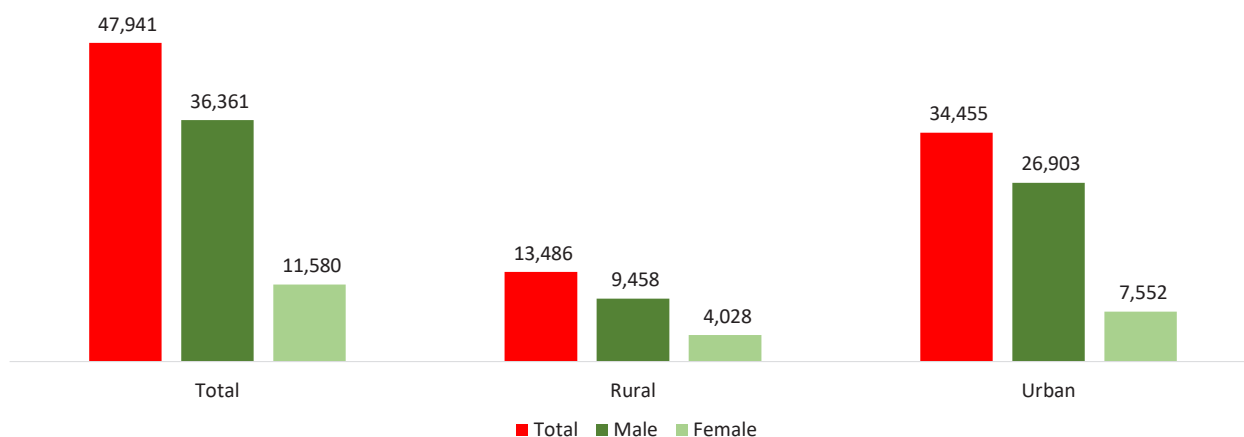

an individual as a permanent resident of an institution in this case, the period the person has been in the institution or the period he/she is going to be in the facility is taken into consideration.

Non-Institutionalised Population - These are persons living in group quarters or in facilities that house those who are primarily eligible, able, or likely to participate in the census while resident (i.e they can be counted from their place of usual residence). The non-institutionalised population lives in non-institutional group quarters such as college/university student housing, military quarters, mine quarters, farm/fish camps and other non-institutional group quarters such as emergency and transitional shelters for people experiencing homelessness and group homes.

In the 2022 Census, only the institutionalised and homeless populations were added to the population covered from residential based households to come up with the total population at each administrative level.

Figure 3.1 presents the institutionalised population as captured during the 2022 Census. There was a total of 47,941 persons residing permanently in institutions. More males (36,361) were recorded to be residing in institutions than females (11,580). The institutionalised population was more in urban than rural areas for both males and females.

Figure 3.1: Institutionalised Population by Rural/Urban, Zambia 2022

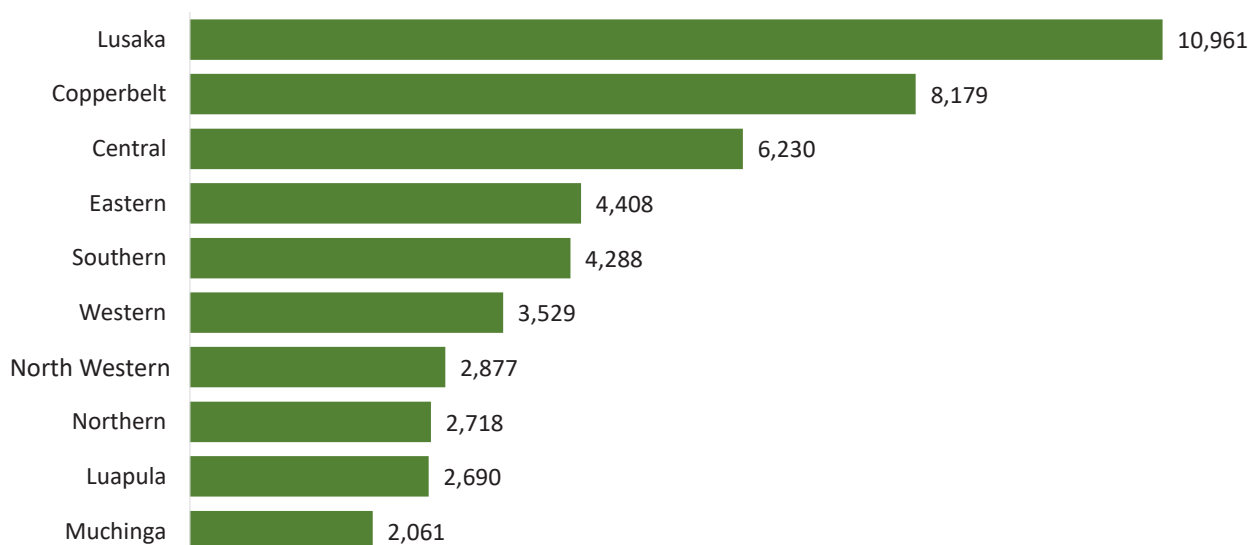

Source: 2022 Census of Population and Housing

Figure 3.2 shows the institutionalised population by province. There were more persons living in institutions in Lusaka Province with 10,961 persons. Copperbelt

Province had the second largest number with 8,179 persons, while Muchinga Province had the least with 2,061 persons.

Figure 3.2: Institutionalised Population by Province, Zambia 2022

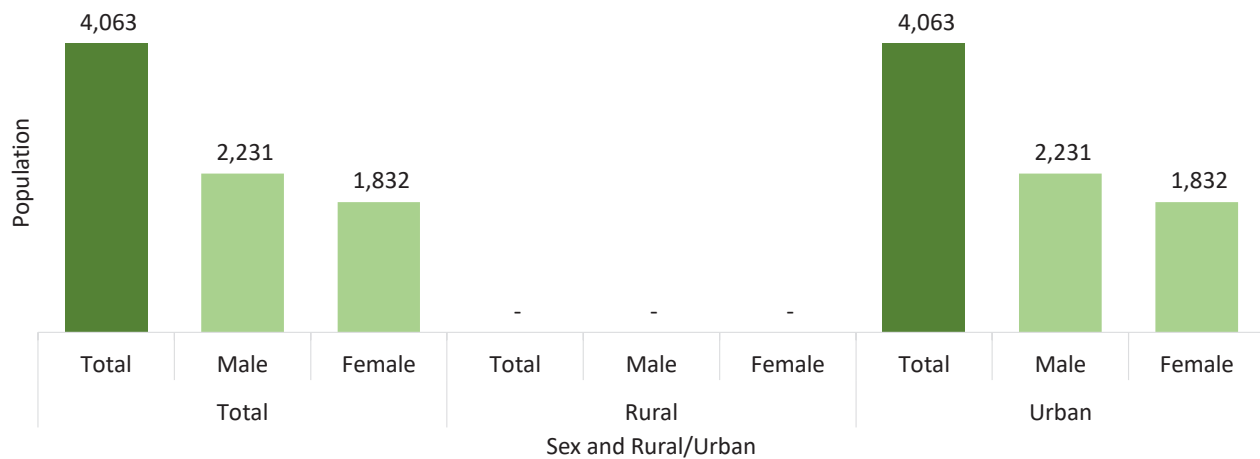

Source: 2022 Census of Population and Housing

3.2 Homeless Population

A homeless population is a person or group of persons who have no permanent living arrangement or do not have a fixed place of abode. The members of the homeless household live on the streets or any place they can find shelter for a short period of time.

Results from the census indicate that homelessness is an urban phenomenon in Zambia as no homeless population was recorded in rural areas. The homeless population is shown in **Figures 3.3 and 3.4**. There were 4,063 homeless persons in Zambia as of 8th September 2022. Of this total, 2,231 were males and 1,832 were females.

Figure 3.3: Homeless Population by Sex and Rural/Urban, Zambia 2022

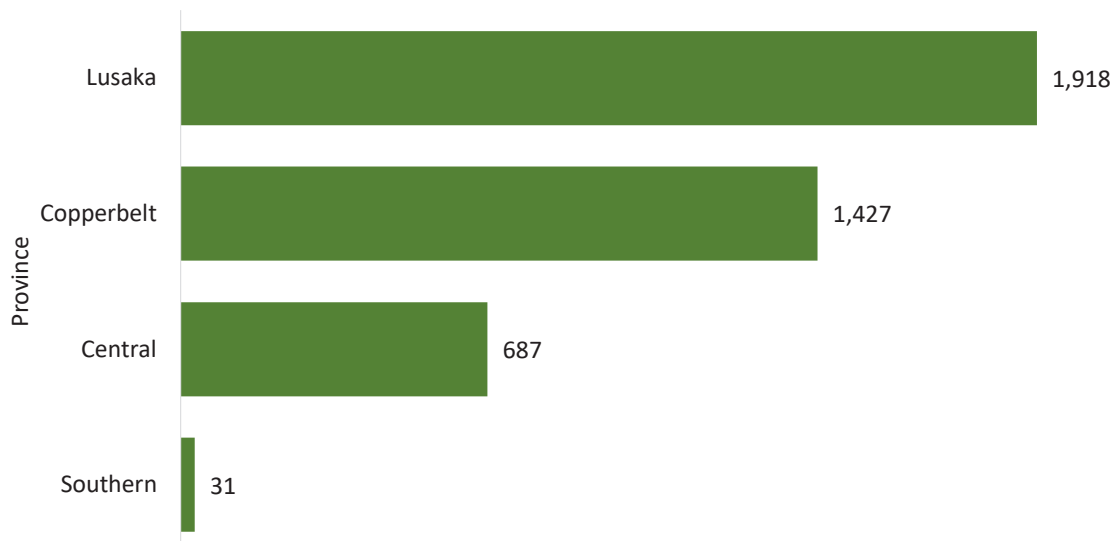

Source: 2022 Census of Population and Housing

At provincial level, the homeless population was only found in four provinces namely; Central, Copperbelt, Lusaka and Southern. Lusaka Province had the largest number of

the homeless population with 1,918 followed by Copperbelt Province with 1,427. Southern Province had the least with 31 persons.

Figure 3.4: Homeless Population by Province, Zambia 2022

4.0 NUMBER OF HOUSEHOLDS, AVERAGE HOUSEHOLD SIZE AND HOUSEHOLD HEADSHIP

4.1 Number of Households

Figure 4.1 shows the number of households by rural/urban as well as by Census year. A total of 4,087, 031 households were enumerated during the 2022 Census. Of this number,

2,169,479 were in rural areas and 1,917,552 were in urban areas. In line with the increase in the population, the number of households has been increasing in the past two decades.

Figure 4.1: Number of Household by Census Year and Rural/Urban, Zambia 2000, 2010 and 2022

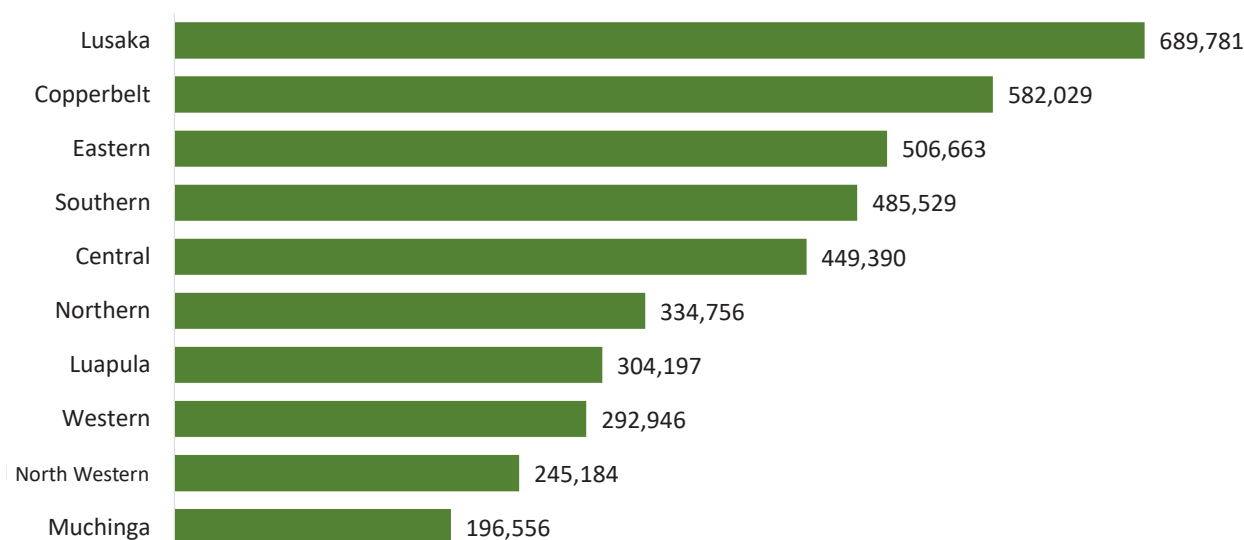

Sources: 2000, 2010 & 2022 Censuses of Population and Housing

Figure 4.2 shows the number of households by province. Lusaka Province had the largest number of households in 2022 with 689,781

followed by Copperbelt Province with 582,029. Muchinga Province had the smallest number with 196,556 households.

Figure 4.2: Number of Household by Province, Zambia 2022

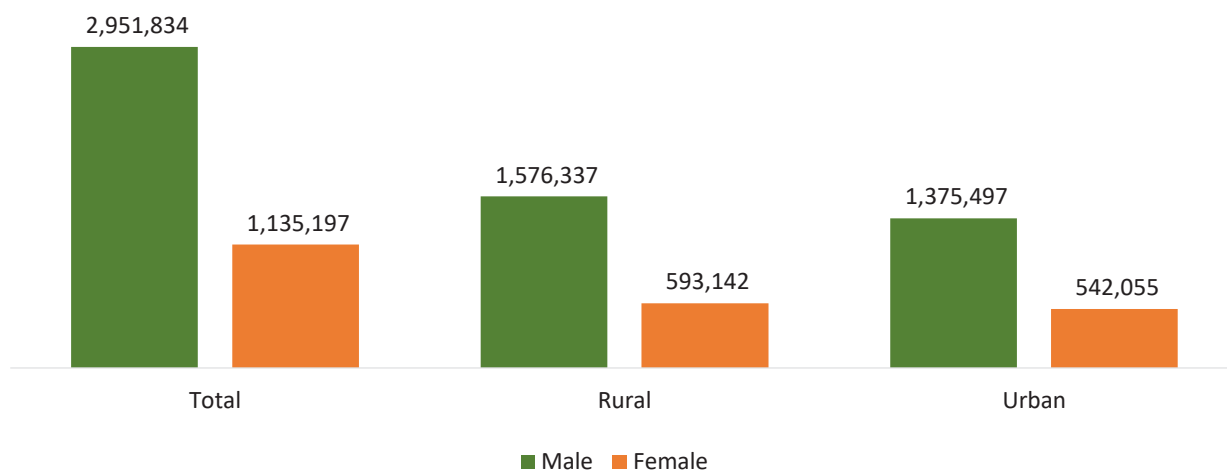

Source: 2022 Census of Population and Housing

4.2: Household Headship

The number of households by sex of the head of household and rural/urban is shown in **Figure 4.3**. Most of the households were headed by

males [2,951,834] compared with females (1,135,197). This pattern was also observed in both rural and urban areas.

Figure 4.3: Number of Households by Sex of the Head and Rural/Urban, Zambia 2022

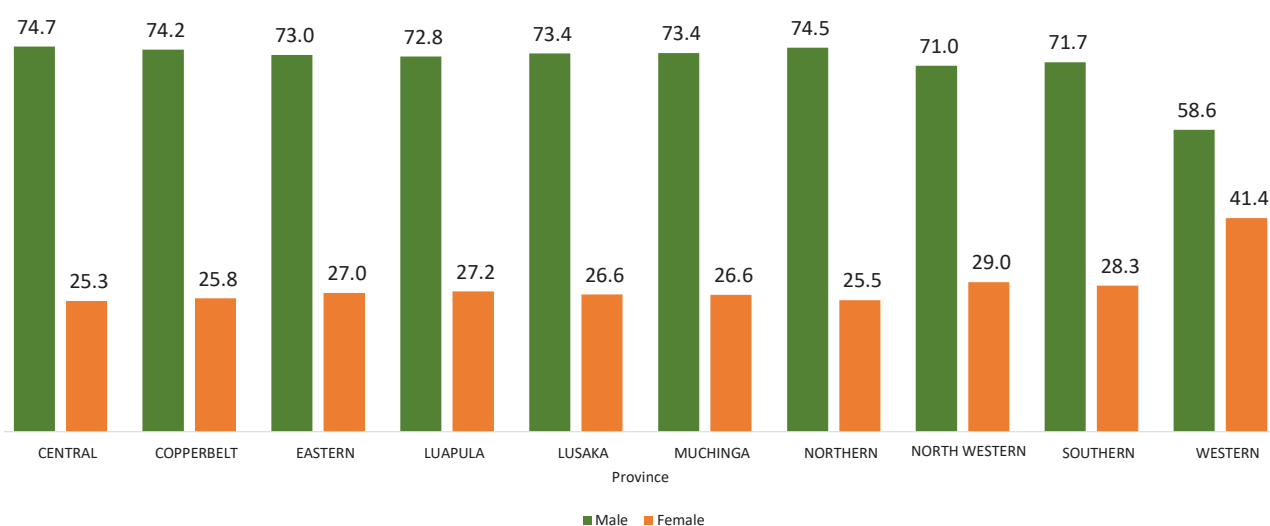

Source: 2022 Census of Population and Housing

At provincial level, the pattern of household headship is similar to the national, where more households were headed by males than females. The highest percentage of female

headed households was recorded in Western Province at 41.4 percent. The rest of the provinces had less than 30 percent of female headed households (**Figure 4.4**).

Figure 4.4: Household Headship (Percent) by Sex of Head and Province, Zambia 2022

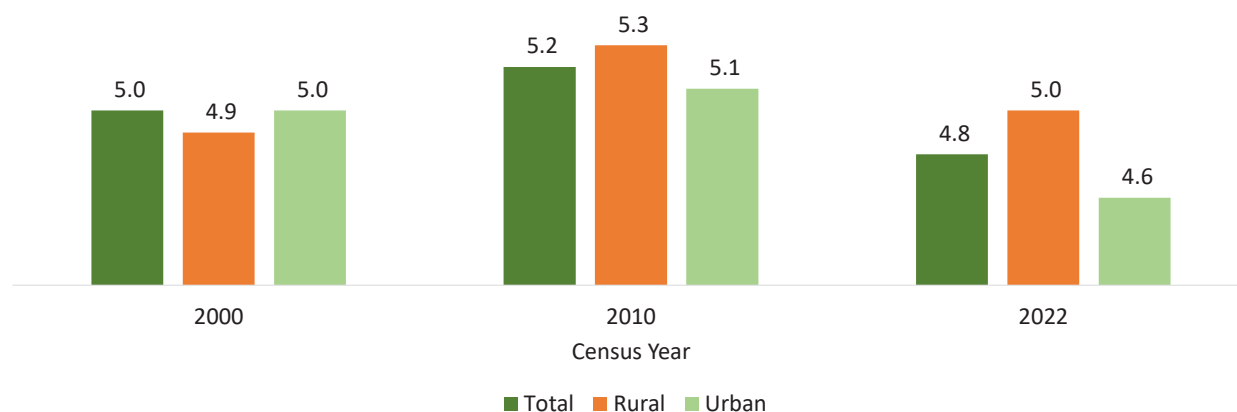

Source: 2022 Census of Population and Housing

4.3: Average Household Size

The average household size is a measure of the number of persons per household. According to the 2022 Census, the average household size in Zambia was 4.8 people per household. The average household size was higher in rural

areas at 5.0 compared with urban areas at 4.6. The average household size has declined in the past 12 years from 5.2 persons per household in 2010 to 4.8 persons per household in 2022 (Figure 4.5).

Figure 4.5: Average Household Size by Rural/Urban, Zambia 2000,2010 and 2022

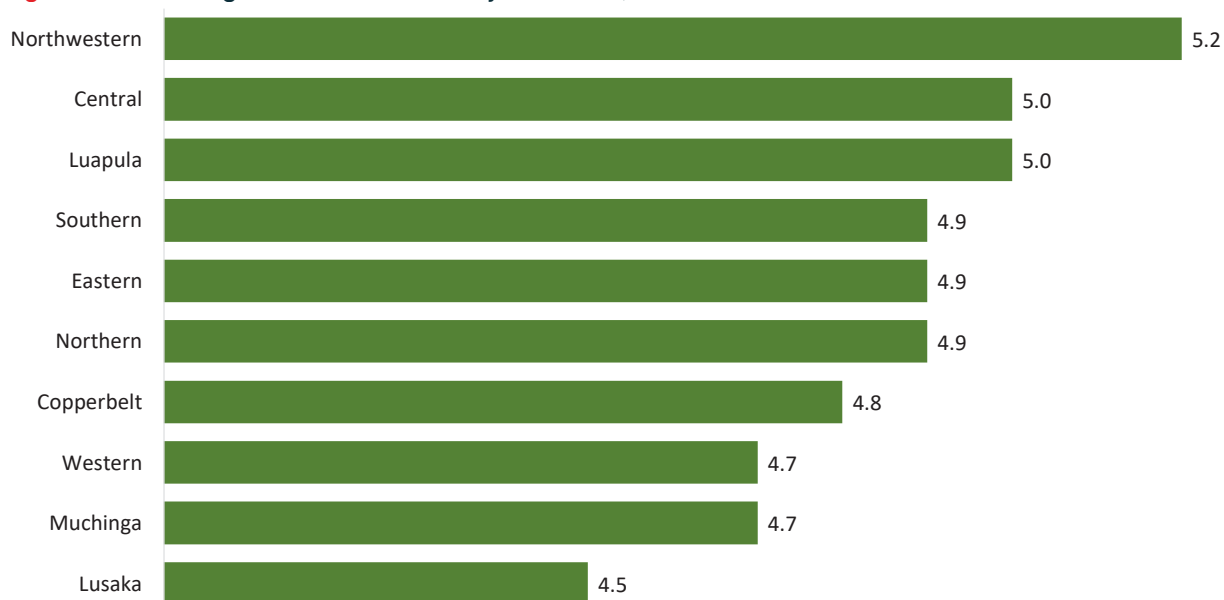

Sources: 2000, 2010 & 2022 Censuses of Population and Housing

North Western Province had the highest average household size of 5.2 followed by Central Province with 5.0. The lowest average

household size was observed in Lusaka Province with 4.5 people per household.

PID	USUAL RESIDENTS AND VISITORS	MEMBERSHIP STATUS	SEX	RELATIONSHIP TO HEAD OF HOUSEHOLD	DATE OF BIRTH	AGE	FOR AGES 10 YEARS AND OLDER		EVER MARRIED
							MARITAL STATUS	AGE AT FIRST MARRIAGE	
	Greetings, My name is _____ I am working with the Zambia Statistics Agency as an enumerator. As you may know, the Government of the Republic of Zambia through the Zambia Statistics Agency is conducting a Census of Population and Housing which happens once in ten (10) years. I have come to collect information about your household that will help the Government plan for the provision of services to the public such as health, education and agriculture among others. The information will be kept strictly confidential and will not be shared with any unauthorized persons. May I proceed to interview your household?	INDICATE THE MEMBERSHIP STATUS 1=Usual member present 2=Usual member Absent 3=Visitor	Is (NAME) male or female? 1 = MALE 2 = FEMALE	What is the relationship of (NAME) to the head of the household? 01 = HEAD 02 = SPOUSE (WIFE/HUSBAND) 03 = OWN SON/DAUGHTER 04 = STEP SON/DAUGHTER 05 = FOSTER OR ADOPTED SON/DAUGHTER 06 = SON/DAUGHTER IN LAW 07 = BROTHER/SISTER 08 = BROTHER/SISTER IN LAW 09 = COUSIN 10 = NEPHEW/NIECE 11 = GRAND SON/DAUGHTER 12 = PARENT 13 = PARENT IN LAW 14 = AUNT/UNCLE 15 = GRAND PARENT 16 = LIVING-IN PARTNER 17 = OTHER RELATIVE 17 = NOT RELATED	What is (NAME)'s date of birth? DD MM YYYY	How old was (NAME) at his/her last birth day? ENTER AGE IN COMPLETED YEARS IF LESS THAN A YEAR '00' IF P2=2 SKIP TO NEXT PERSON	What is (NAME)'s marital status? 1 = NEVER MARRIED 2 = MONOGAMOUSLY MARRIED 3 = POLYGAMOUSLY MARRIED 4 = DIVORCED 5 = SEPARATED 6 = WIDOWED 7 = COHABITING/LIVING TOGETHER	How old was (NAME) when he/she first got married/started cohabiting/living together? INTRODUCTION AND CONSENT

Greetings: _____, I am working with the Zambia Statistics Agency as an enumerator. As you may know, the Government of the Republic of Zambia through the Zambia Statistics Agency is conducting a Census of Population and Housing which happens once in ten (10) years. I have come to collect information about your institution that will help the Government plan for the provision of services to the public such as health, education and agriculture among others. The information will be kept strictly confidential and will not be shared with any unauthorized persons.

May I proceed to interview your household? _____

SECTION P1: SOCIO DEMOGRAPHIC CHARACTERISTICS
