## Central Statistical Office

## Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for susta inable national development and decision-making.

I would like to urge our readers and users of statistic al information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

## INTERNATIONAL MERCHANDIZE TRADE

## May 2017 records a Trade Deficit

In May 2017, Zambia recorded a trade deficit valued at K 333.1 Million from K1,166.6 Million recorded in April 2017. This represents a 71.4 percent decrease in the
trade deficit. This means that the country imported more in May 2017 than it exported in nominal terms.

## Zambia's Exports of Copper by Volume and coresponding prices at the London Metal

 Exchange (LME), J anuary to May 2017The volume of Copper exhibited a fluctuating trend between January and May 2017 with the highest volume of 85,626.06 metric tonnes recorded in February and the lowest volume of 80,374.35 metric tonnes recorded in May 2017.

On the other hand, the corresponding price of Copper on the London Metal Exchange registered a steady increase between January and February 2017 from USD 5,737.43 per metric tonne to

USD 5,941.55 per metric tonne. However, the price of copper declined from USD 5,821.52 to USD 5,587.83 per metric tonne between March and May 2017.

This product accounts for the largest weight/ proportion of Traditional Exports, and as such, any change in the volume and price/value has a direct bearing on the performance of Traditional Exports.

Zambia's Copper Export Volumes and LME Pric es, J anuary to May 2017

Zambia's Top 25 Non-Traditional Exports (NTEs), May and April 2017

Zambia's major Non-Traditional Exports (NTE) for the month of May 2017 were Other mineral substances, nes which accounted for 8.1 percent, followed by Other raw cane sugar, which accounted for 8.0 percent.

Other notable NTEs in May 2017 were New stamps; stamp-impressed paper; cheque forms; banknotes, etc -postage, revenue stamp and Bullion semimanufactured forms which accounted for 12.4 percent.

## Zambia's Major Export Destinations by Commodity in May 2017

The major export destination in May 2017 was Switzerland, which accounted for 45.1 percent of the total export eamings. The major export products to Switzerland were Copper anodes for electrolytic refining, accounting for 66.0 percent.

China was the second main destination of Zambia's exports accounting for 20.3 percent of the total export eamings. The major export product to China was Copper blister, accounting for 44.6 percent.

Congo DR was the third main export destination accounting for 6.1 percent of the total export eamings. The major export product was Sulphuric acid; oleum in bulk accounting for 11.7 percent.

Singapore was the fourth main export destination accounting for 5.8 percent of the total export eamings. The major export products were Cathodes of refined copper accounting for 75.3 percent.

The fifth main export destination was South Africa, which accounted for 5.5 percent of the total export eamings. The major export products were Bullion semimanufactured forms, accounting for 23.3 percent.

These five countries collectively accounted for 82.8 percent of Zambia's total export eamings in May 2017.

## Export Market Shares by selected Regional Groupings and Major Trading Partners, May and April 2017

Switzerland was the largest market for Zambia's total exports during the month of May 2017, ac counting for 45.1 percent.

Asia was the second largest market for Zambia's total exports, accounting for 32.7 percent in May 2017. Within Asia, China was the dominant export market, accounting for 62.0 percent. Other notable markets in Asia were Singapore, United Arab Emirates, Hong Kong and India.

The Dual SADC/COMESA grouping was the third largest market for Zambia'stotal Exports accounting for 10.2 percent in May 2017. Within this grouping, Congo DR was the dominant market with 59.9 percent. Other notable markets in this grouping were Malawi, Zmbabwe, Mauritius and Swaziland.

The SADC exclusive grouping was the fourth major destination accounting for 7.2 percent of Zambia's total exports in

May 2017. Within this grouping, South Africa was the dominant market with 76.5 percent. Other notable markets were Tanzania, Botswana, Namibia and Mozambique.

The COMESA exclusive grouping was the fourth largest market for Zambia's total exports accounting for 2.7 percent in May 2017. Within this grouping, Kenya was the dominant market with 59.9 percent. Other notable markets in this grouping were Rwanda, Burundi and Uganda.

The European Union (EU) was the fifth largest market for Zambia's total exports accounting for 2.0 percent in May 2017. Within the EU, United Kingdom was the dominant market with 75.2 percent. Other notable markets were Luxembourg, Belgium, Netherlands and Germany.

The Rest of the World accounted for the remaining 2.7 percent in May 2017.

## Zambia's Major Import Sources by Commodity in May 2017

China was the third main source,

The major source of imports in May 2017 was South Africa, accounting for 31.1 percent. The major import products were Gas oils, contributing 4.6 percent.

The second source of Zambia's imports was Congo DR accounting for 14.2 percent. The major import product was Other Copper concentrate, which accounted for 44.8 percent.
accounting for 10.8 percent. The major import products were Parts of machinery of 84.74 accounting for 5.7 percent.

Other sources of Zambia's imports were Kuwait and India which collectively accounted for 13.6 percent of Zambia's imports.

## Import Market Shares by Selected Regional Groupings and major trading partners May and

 April 2017The SADC Exclusive grouping was the major source of Zambia's imports, accounting for 38.4 percent in May 2017. Within this grouping, South Africa was the dominant market with 81.1 percent. Other notable markets were Tanzania, Mozambique, Namibia, and Botswana.

Asia was the second main source of Zambia's imports accounting for 32.3 percent in May 2017. Within this grouping, China was the major source of Zambia's imports accounting for 33.3 percent. Other notable markets were Kuwait, India, United Arab Emirates, and Japan.

Dual SADC-COMESA was the third main source, accounting for 16.1 percent in May 2017. Within this regional grouping, Congo DR was the main source of Zambia's
imports with 88.3 percent. Other notable markets were Zmbabwe, Mauritius, Swaziland and Malawi.

The European Union was the fourth largest source of Zambia's imports accounting for 9.7 percent. Within this grouping, United Kingdom was the main source of Zambia's imports with 16.3 percent. Other notable markets were Belgium, Netherlands, Germany and Sweden.

The COMESA exclusive grouping was the fifth largest source for Zambia's imports accounting for 0.5 percent in May 2017. Within this grouping, Kenya was the dominant market with 82.7 percent. Other notable markets were Egypt and Uganda.

## NATIONAL ACCOUNTS

## QUARTERLY GROSS DOMESTIC PRODUCT

## ECONOMY GROWS BY 3.0 PERCENT IN THE FIRST QUARTER OF 2017

The economy grew by 3.0 percent in the first quarter of 2017 as measured by Gross Domestic Product (GDP) at constant 2010 prices. It was estimated at K31,968.1 million in the first quarter of 2017 compared to K31,026.1 million in the same quarter of 2016. This growth has been attributed to the growth in the Electricity generation which recorded a growth of 25.6 percent compared to a negative growth rate of 29.5 percent in the first quarter of 2016, the Agric ulture, Forestry \& Fishing industry which recorded 17.5 percent in the first quarter of 2017 compared to a growth of 3.1 percent in the same quarter of 2016. Other industries with signific ant growth rates were the Human Health \& Social work (11.0 percent), Education ( 7.8 percent), Arts, entertainment \& recreation ( 7.6 percent),

Transport \& Storage ( 6.8 percent) and Public administration \& Defence (4.4 percent). However, Information \& Communication, Mining \& Quarming and Financial \& Insurance recorded the negative growth rates of 30.1 percent, 5.2 percent and 3.1 percent, respectively.

In tems of contribution to the total growth, Agriculture, Forestry and Fishing Industry had the highest contribution accounting for 1.7 percentage points. This was followed by Education industry ( 0.6 percentage points) then Construction ( 0.4 percentage points). The Manufacturing, Electricity generation and Wholesale \& Retail Trade industries contributed 0.3 percentage points each.

## REVISION OF 2016 ANNUAL GDP

The 2016 Annual GDP has been revised upwards from 3.4 percent in the first release to 3.6 percent in the revised release. The fourth quarter (Q4) of 2016 GDP estimates at constant 2010 prices have been revised mainly due to upward revision of Agriculture, Forestry and Fishing Industry from negative growth of 4.8 percent to a growth of 10.2 percent, resulting in the overall revised
growth of 3.6 percent from a negative growth of 0.5 percent earlier published. The revisions are necessitated as a result of receiving more data. Meanwhile the Electricity generation has been revised further down from negative 6 percent to negative 13.6 percent. Furthemore, the GDP at current prices has been revised upwards from $K 216,826.3$ million to $K 217,224.5$ million.

| C. <br> Surplus/deficit (A-B) <br> 10/ | 1,178,516 | -40,000 | -146,765 | 0 | 0 | 114,305 | 1,101,060 |
| D. <br> Potential Commercial exports 11/ | -1,178,516 | 40,000 | 146,765 | 0 | 0 | 0 | 0 |
| E. <br> Food aid import requirements 12/ | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Notes: |  |  |  |  |  |  |  |
| 1/ Stocks held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2017 |  |  |  |  |  |  |  |
| 2/ Production estimates by MoA/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of $25 \%$ is used. |  |  |  |  |  |  |  |
| 3/ Human staple food consumption represents $70 \%$ ( $1,470 \mathrm{kCal} / \mathrm{person} / \mathrm{day}$, CSO) of total diet ( $2,100 \mathrm{kCal} / \mathrm{person} /$ day, National Food and Nutrition Commission), for the national population of 16.1 million people (based on CSO Census projections with 2017 and 2018 average population used).The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption. |  |  |  |  |  |  |  |
| 4/National strategic requirements expected to be carried over into the next season by FRA. (this amount of 500,000 Mt includes equivalent to 3 months cover) |  |  |  |  |  |  |  |
| 5/Estimated requirements by major stockfeed producers. |  |  |  |  |  |  |  |
| 6/Estimated requirements by industrial breweries |  |  |  |  |  |  |  |
| 7/Estimated retention of grain for other uses by smallholders. |  |  |  |  |  |  |  |
| 8/ Post-harvest losses are estimated at 5\% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries. |  |  |  |  |  |  |  |
| 9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2017/18 marketing season. It does not include Formal trade. |  |  |  |  |  |  |  |
| 10/ Expected surplusses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. |  |  |  |  |  |  |  |
| The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D. |  |  |  |  |  |  |  |
| 11/ Commercial imports/exports represent expected regional and international trade by the private sector. For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested |  |  |  |  |  |  |  |
| 12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains. |  |  |  |  |  |  |  |
