## Republic of Zambia

# Central Statistical Office 

## Foreword

$\omega$elcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

## INFLATION

CONSUMER PRICE INDEX

## YEAR ON YEAR INFLATION RATE FOR DECEMBER 2017 DECREASES TO 6.1 PERCENT

The year on year inflation rate as measured by the all items Consumer Price Index (CPI) for December 2017 reduced to 6.1 percent compared to 6.3 percent recorded in November 2017. This means that on average, prices increased by 6.1 percent between December 2016 and December 2017.

Movement of Consumer Price Indices (CPI) show a steadily increasing trend in the prices of commodities during the
period of December 2016 to December 2017. However, Annual Inflation Rates over the same period have shown a decreasing pattern from 7.5 percent in December 2016 to 6.1 percent in December 2017.

The average annual rate of inflation for 2017 is 6.6 percent.

## YEAR ON YEAR FOOD AND NON-FOOD INFLATION RATE

The year on year (Annual) food inflation rate for December 2017 remained the same as that recorded in November 2017 at 4.8 percent.

The year on year (Annual) non-food inflation rate for December 2017 was recorded at 7.5 percent, from 7.9
percent recorded in November 2017, indicating a decrease of 0.4 percentage points. The decrease in the annual nonfood inflation is mainly attributed to the decreases of some items in the Clothing and Footwear CPI division e.g. Men's imported trousers and boys shorts.

## ANNUAL INFLATION RATE MOVEMENT BY CPI MAIN GROUP

## CPI MAIN GROUPS THAT DECREASED

The annual inflation rate for December 2017 reduced for:

## 1 Alcoholic Beverages And Tobacco

The annual inflation rate for this CPI main group reduced from 5.2 percent in November, 2017 to 3.7 percent in December, 2017. This decrease is as a result of price changes of items in the beer subgroup of this division. The major items that influenced this change are Chibuku opaque beer in a tarven, Mosi and Castle lagers.

## 2. Clothing and Footwear

The annual inflation rate for the Clothing and footwear subgroup recorded a decrease of 1.0 Percentage points from 8.2 percent recorded in November 2017 to 7.2 percent recorded in December, 2017. This reduction is mainly as a result of the price changes of imported men's trousers.

## 3. Housing, Water, Electricity, Gas \& Other Fuels

The annual inflation rate for this CPI main group decreased from 16.2 percent in November 2017 to 15.9 percent in December 2017. This decrease is mainly attributed to price changes for items such as Concrete block(s), Paint and floor tiles.

## 4. Health

The annual inflation rate for the Health CPI main group was recorded at 4.2 percent in December 2017 compared to the 4.8 percent recorded in November 2017. This decrease of 0.6 percentage points is attributed to the price changes of pharmaceutical items such as Aspirin, Paracetamol and Fansidar.

## 5. Transport

The transport CPI main group recorded a decrease in the annual inflation rate of 0.7 percentage points from 1.7 percent in November 2017 to 1.0 percent in December 2017. This decrease is mainly attributed to the price changes of Motor Vehicles and air transport.

## 6. Recreation and Culture

The annual inflation rate for the recreation and culture CPI main group decreased from 7.1 percent recorded in November 2017 to 5.6 percent in December 2017. This decrease is attributed to price changes for magazines, school exercise books and birthday/wedding cards.

## 7. Education

The education CPI main group had the highest reduction in the annual inflation rate of 1.6 percentage points from 7.0 percent recorded in November 2017 to 5.4 percent recorded in December 2017. This decrease is as a result of changes in Secondary School fees for private school.
$3 \mid \mathrm{Page}$

## CPI MAIN GROUPS THAT INCREASED

There was an increase in the annual inflation rate for:

## 1. Furnishing, Household Equipment, Routine Housing Maintenance

The annual inflation rate for the Furnishing, Household Equipment, and Routine Housing Maintenance CPI main group was recorded at 4.4 percent in December 2017 from 4.3 percent recorded in November 2017, indicating a 0.1 percentage point increase. This increase is as a result of price changes for items in the Domestic services subgroup such as monthly salaries for full time gardener and maids.

## 2. Restaurant and Hotel

The annual inflation rate for the Restaurant and hotel CPI main group increased from 3.1 percent recorded in

November 2017 to 3.3 percent recorded in December 2017. This increase of 0.2 percentage points is as a result of price movements for Nshima with beef hotel meal, and Bed and continental breakfast in a hotel.

## 3. Miscellaneous Goods and Services

The Miscellaneous goods and services CPI main group recorded an increase of 1.1 percentage points in the annual inflation rate from 5.7 percent in November 2017 to 6.8 percent in December 2017. This increase is attributed to price changes of items such as Private security services, Hammer milling charges, razor blades and toothpaste.

The annual inflation rates for Food and Non-alcoholic Beverages and Communication in December 2017 remained unchanged.

## MONTH ON MONTH INFLATION RATE: FOOD AND NON-FOOD ITEMS

The month on month (Monthly) food inflation rate for December, 2017 increased to 1.1 percent compared to 0.8 percent recorded in November, 2017. The increase is as a result of price changes of Mincemeat, Margarine, Lemons, Chinese cabbage and Mushrooms.

The month on month (Monthly) Non-food inflation rate for December 2017 was recorded at 0.2 percent compared to 2.0 percent recorded in November, 2017. This indicates a decrease of 1.8 percentage points. The decrease in non-food monthly inflation is mainly attributed to price changes of Chibuku in a tarven, Bed sheets, imported men's trousers, Bicycle tyre and school exercise book.

## INTERNATIONAL MERCHANDISE TRADE

## NOVEMBER 2017 RECORDS A TRADE SURPLUS

Zambia's international merchandise trade records a surplus of K421.7 million in November 2017 from a deficit of K885.2 Million recorded in October 2017. This means that the country exported more in November 2017 than it imported in nominal terms. The trade surplus can mainly be explained by an increase in
the volume of copper exported from 76,250.3 metric tonnes in October 2017 to 100,585.3 metric tonnes in November 2017. Further, the corresponding LME price increased by 0.4 percent, from USD 6,797.4 per metric tonne in October 2017 to USD 6,825.6 per metric tonne in November 2017.

## Performance of Exports (Traditional and Non-Traditional Exports (TEs and NTEs)), November and October 2017

The Metal export earnings increased by 32.1 percent from K5,168.3 Million in October 2017 to K6,829.2 Million in November 2017. The overall contribution of Metals and their products to the total export earnings between November and October 2017 averaged 76.6 percent.

Non-Traditional Exports (NTEs) increased by 6.0 percent from K1,757.3 Million in October 2017 to K1,862.7 Million in November 2017. The share of NTEs recorded an average of 23.4 percent in revenue earnings between November and October 2017.

# Zambia's Exports of Copper by Volume and corresponding LME prices, January to 

 November 2017The volume of Copper exported in November 2017 increased by 31.9 percent from 76,250.3 metric tonnes recorded in October 2017 to 100,585.3 metric tonnes recorded in November 2017.

The corresponding Copper prices on LME increased by 0.4 percent, from USD 6,797.4 per metric tonne in October 2017
to USD 6,825.6 per metric tonne in November 2017.

Since Copper accounts for the largest weight/ proportion of Traditional Exports, any change in the volume and price/value has a direct bearing on the performance of Traditional Exports.

Exports of Copper (Mts) and LME Copper prices (USD), January to November, 2017

Performance of Non-Traditional Exports (NTEs), November and October 2017

For the purpose of this analysis, NonTraditional Exports are divided into Agricultural and Non-Agricultural products.

## Agricultural Products

Agricultural products accounted for a share of 30.7 percent of Zambia's NonTraditional Exports (NTEs) in November 2017 compared to 29.9 percent recorded in October 2017.

The export earnings from Agricultural products recorded a growth of 8.6 percent from K 525.9 Million to K 571.2 Million. The major export commodities were Maize (excl. seed) ( 21.0 percent), Soya beans excl. seed (18.2 percent) and Maize seed ( 9.6 percent).

## Non-Agricultural Products

Non-Agricultural products accounted for a share of 69.3 percent of Zambia's NonTraditional Exports (NTEs) in November 2017 compared to 70.1 percent recorded in October 2017.

The export earnings from Non-Agricultural products recorded an increase of 4.9 percent from K1,231.4 Million to K1,291.4 Million. The major export commodities were Bullion semi-manufactured forms (mainly Gold) (12 percent), Sulphuric Acid ( 9.4 percent), Wire of refined copper, maximum cross-sectional dimension $>6 \mathrm{~mm}$ ( 8.2 percent).

## Exports by Major Product Categories, November and October 2017

Zambia's major export products in November 2017 were from the intermediate goods category (mainly comprising Copper anodes for electrolytic refining and Cathodes of refined copper) accounting for 85.5 percent. Exports from the Consumer goods, Raw Materials and Capital goods
categories, collectively accounted for 14.5 percent of total exports in November 2017.

Exports by Major Product Categories November and October 2017

## Zambia's Major Export Destinations by Commodity in November 2017

The major export destination in November 2017 was Switzerland, which accounted for 45.9 percent of the total export earnings. The main export produc $\dagger$ to Switzerland was Copper anodes for electrolytic refining, accounting for 59.2 percent of total export earnings from that country, followed by cathodes of refined copper (38.7 percent).

China was the second main destination of Zambia's exports accounting for 14.2 percent of the total export earnings. The major export product to China was Copper blister, accounting for 78.0 percent of total export earnings from China.

South Africa and Congo DR were the third main export destinations
accounting for 5.9 percent each, of the total export earnings. The major export products to South Africa were Bullion semi-manufactured forms accounting for 30.1 percent of total export earnings from that country while the major export products to Congo DR were Sulphuric acid; oleum in bulk accounting for 23.6.

The fourth main export destination was United Arab Emirates, which accounted for 4.1 percent of the total export earnings. The major export product was Cathodes of refined copper, accounting for 51.9 percent of total export earnings from that country.

These five countries collectively accounted for 76.0 percent of Zambia's total export earnings in November 2017.

## Export Market Shares by selected Regional Groupings and Major Trading Partners, November and October 2017

Switzerland was the largest market for Zambia's total exports in November 2017, accounting for 45.9 percent.

Asia was the second largest market for Zambia's total exports, accounting for 26.0 percent in November 2017. Within Asia, China was the dominant export market, accounting for 54.6 percent. Other notable markets in Asia were United Arab Emirates, Singapore, India and Hong Kong.

The SADC exclusive grouping was the third largest market for Zambia's total exports accounting for 8.1 percent in November 2017. Within this grouping, South Africa was the dominant market with 73.1 percent. Other notable markets were Botswana, Tanzania, Mozambique and Namibia.

The DUAL- SADC \& COMESA grouping was the fourth largest market for

Zambia's total exports accounting for 8.0 percent in November 2017. Within this grouping, Congo DR was the dominant market with 73.5 percent. Other notable markets in this grouping were Zimbabwe, Malawi and Swaziland

The European Union grouping was the fifth largest market for Zambia's total exports accounting for 2.9 percent in November 2017. Within this grouping, The United Kingdom was the dominant market with 77.6 percent. Other notable markets in this grouping were Germany, Netherlands, Denmark and Italy.

The COMESA exclusive grouping was the sixth largest market for Zambia's total exports accounting for 1.8 percent in November 2017. Within this grouping, Kenya was the dominant market with 51.6 percent. Other notable markets were Rwanda, Burundi, Ethiopia and Uganda.

## QUARTERLY GROSS DOMESTIC PRODUCT

## ECONOMY GREW BY 3.3 PERCENT IN THE THIRD QUARTER OF 2017

The economy grew by 3.3 percent in the third quarter of 2017 which was 0.1 percentage points higher than that recorded in the second quarter. This is according to the year on year comparison of GDP at constant 2010 prices. The human health and social work industry recorded the highest growth of 21.9 percent in the period under review. The Electricity generation industry was second with a growth of 19.8 percent, followed by Agriculture, forestry \& fishing industry at 15.5 percent. The lowest growth at negative 7.3 percent was recorded in the Arts, entertainment and recreation industry.

Analysis based on the three quarters of 2017 shows that the economy grew by 3.1 percent. In terms of contribution to this growth, Agriculture, forestry and fishing industry had the highest contribution to the growth accounting for 1.1 percentage points. This was followed by Education industry ( 0.6 percentage points), Construction industry (0.4 percentage points). The Manufacturing and Electricity generation industries were fourth each accounting for 10.3 percentage points). Information and communication industry had a negative contribution to the GDP growth in the first three quarters of 2017.

The year on year growth rates of the first three Quarters of 2017 were lower than those of the first three quarters of 2016. The growth rate at constant 2010 prices
was 3.3 percent in the third quarter of 2017 compared to 3.4 percent in the third quarter of 2016. The lower growth in 2017 is mainly on account of a slower
growth in Mining \& Quarrying, communication industries. Construction and Information and

## QUARTERLY INDUSTRY VALUE ADDED SHARES TO GDP

Gross Domestic Product at current prices for the first three quarters of 2017 was estimated at K182,933.1 million compared to K164,480.2 million for the first three quarters of 2016. The results show that out of K182,933.1 million, the Wholesale and retail trade industry had the highest share accounting for 18.4
percent. This was followed by Mining and quarrying industry (13.7 percent), Agriculture, forestry and fishing industry ( 12.8 percent) and Construction was the fourth major contributor with a share of 8.0 percent for the first three quarters of 2017.

Gross Value Added and percentage shares by industry at current prices, Q1 2016 to Q3 2017

| Industry | 2016 |  |  |  |  | 2017 |  |  |  | Percentage Shares |

## Update on 2017 Livestock Census

The Government of the Republic of Zambia, through the Ministry of Livestock and Fisheries in collaboration with the Central Statistical Office is conducting the 2017 Livestock and Aquaculture Census. The purpose of the Livestock Census is to provide a benchmark upon which future surveys in the livestock sub sector will be based. This will also form a basis for planning and policy formulation, as well as policy implementation.

Training of all field staff is underway in all provincial centres. This is to be followed by data collection exercise which will commerce in the first week of January 2018 and expected to last for a month.

The Central Statistical Office wishes to advise members of the public that it has not issued any job search advert for the Livestock Census as is being circulated on social media. Members of the public are hereby advised to ignore the advert as it is not authentic and has not been released by the CSO.

CSO takes this opportunity to solicit for cooperation from the selected households to facilitate the collection of quality data.

# 2020 Census of Population and Housing clock ticking 

In order to be in conformity with the international standards and requirements of decennial census undertaking, Zambia will conduct a Census of Population and Housing in August 2020. This is to obtain updated figures on the population size, distribution, composition and other demographic, social and economic characteristics at national, provincial, district, constituency and ward levels.

Zambia has so far conducted five censuses since independence, and these were conducted in 1969, 1980, 1990, 2000, 2010. The 2020 Census of Population and Housing will be the sixth undertaking of this nature.

## Why conduct a census?

The population and housing census is the cornerstone of national statistics. It is required for several reasons including:

1. To provide accurate and reliable information on the size, composition and distribution of the population of Zambia at all administrative levels;
2. To monitor national development programmes such as the Seventh National Development Plan (7NDP), the Vision 2030 and international obligations such as the Sustainable Development Goals (SDGs) and the 2063 Africa Agenda;
3. To provide information on the demographic and socio-economic characteristics of the population of Zambia;
4. To provide accurate sampling frame for future inter-censal household and population based surveys;
5. To generate statistics on small areas and small population groups;
6. To provide benchmark for research and analysis, particularly for population projections.

## What are the Key Phases of the 2020 Census?

Conducting a successful census involves a series of carefully coordinated steps. There are three key phases of the 2020 census operations namely Pre-Census Stage, Census Stage and Post Census stage, covering a period of 2017 to 2022.

## PRE-CENSUS STAGE (2017-2020)

Major Activities in this stage include:

## Census Mapping

Census mapping involves the accurate updating of the current administrative and geographic frame of the country and the systematic demarcation of this frame into small units called Enumeration Areas (EAs) for enumeration, spatial analysis and dissemination purposes. Census mapping is a UN recommendation which should be done prior to the census. It normally commences three years before the Census year.

The purpose of the census mapping exercise is to:

- Update the administrative boundaries with the inclusion of the new province, districts, constituency and wards;
- Delineate Enumeration Areas (EA) in the country to facilitate the smooth counting of people during enumeration period;
- Provide the basis to estimate resources required at each administrative level e.g. personnel, materials and transport;
- Ensure that EA maps easily guide the enumerators on the households that they should cover during census enumeration;
- Provide a comprehensive master frame for government and stakeholders that will
be used in planning, research and delivering services and;
- Facilitate dissemination of census data using GIS web based techniques and systems.

The mapping exercise is planned to commence in 2018. The mapping methodology will be Geographic Information System (GIS) driven with the use of satellite base maps for demarcating Enumeration Areas.

## Census pretest planned for August 2018:

A pretest will be conducted to test the formulation of concepts and definitions, census questionnaires, instructions manuals etc. and the evaluation of alternative methodologies and data collection techniques. The report from the pretest will assist in guiding on what changes need to be made to the questionnaire as well as guiding on what logistics need to be put in place.

## Pilot census to comprehensively test all census procedures, August 2019

The pilot census is "dry run" for the actual census on a smaller scale, to evaluate all aspects of the census operations including the concepts and definitions, the adequacy of the questionnaires, the
training of field enumerators and supervisory staff, field organization, census methodology, sampling design and estimation procedure, data processing and data tabulation. The results will be used when drawing up the final plans for the census.

## CENSUS STAGE (August 2020)

Major activities will include;

- Census Publicity;
- Recruitment and training of field staff;
- Data collection: data collection will be done using Computer
- Assisted Personal Interviewing (CAPI) for data collection in order to improve quality and coverage of the census data and to disseminate the results timely.

## POST CENSUS STAGE (2020-2022)

Key activities will include;

- Post Enumeration Survey (PES) to provide an indication of coverage and content errors to assess the quality of the census;
- Data Analysis and Report Writing;
- Dissemination of results.

## The Year 2017 at a Glance

| E. <br> Food aid import requirements 12/ | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Notes: |  |  |  |  |  |  |  |
| 1/ Stocks held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2017 |  |  |  |  |  |  |  |
| 2/ Production estimates by MoA/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of $25 \%$ is used. |  |  |  |  |  |  |  |
| 3/ Human staple food consumption represents $70 \%(1,470 \mathrm{kCal} / \mathrm{person} / \mathrm{day}, \mathrm{CSO})$ of total diet ( $2,100 \mathrm{kCal} / \mathrm{person} / \mathrm{day}$, National Food and Nutrition Commission), for the national population of 16.1 million people (based on CSO Census projections with 2017 and 2018 average population used).The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption. |  |  |  |  |  |  |  |
| 4/National strategic requirements expected to be carried over into the next season by FRA. (this amount of 500,000 Mt includes equivalent to 3 months cover) |  |  |  |  |  |  |  |
| 5/Estimated requirements by major stockfeed producers. |  |  |  |  |  |  |  |
| 6/Estimated requirements by industrial breweries |  |  |  |  |  |  |  |
| 7/Estimated retention of grain for other uses by smallholders. |  |  |  |  |  |  |  |
| 8/ Post-harvest losses are estimated at 5\% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries. |  |  |  |  |  |  |  |
| 9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2017/18 marketing season. It does not include Formal trade. |  |  |  |  |  |  |  |
| 10/ Expected surplusses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. |  |  |  |  |  |  |  |
| The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D . |  |  |  |  |  |  |  |
| 11/ Commercial imports/exports represent expected regional and international trade by the private sector. For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested |  |  |  |  |  |  |  |
| 12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains. |  |  |  |  |  |  |  |
