August, 2015

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

"We measure what we treasure. We treasure what we measure"

INFLATION

Inflation increases to 7.3 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for August 2015 increased to 7.3 percent compared to 7.1 percent recorded in July, 2015. This means that on average, prices increased by 7.3 percent between August 2014 and August 2015.

The increase was mainly attributed to the rising of inflation in Transport. The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Annual Inflation Rate August 2014 to August 2015

Annual Food and Non-Food Inflation Rates

The annual food inflation rate for August 2015 remained at 7.8 percent while the annual non-food inflation rate increased to 6.7 percent from 6.2 percent recorded in July 2015. This increase was mainly attributed to the

increase of prices in the Transport Division and was particularly influenced by increases in prices of Liquid fuels (Petrol & Diesel), road transport fares and Car licence fee.

Zambia's Major Export Destinations by Commodity in July 2015

The major export destination in July 2015 was Switzerland, which accounted for 53.7 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 57.3 percent.

China was the second major destination of Zambia's exports accounting for 15.0 percent. The major export product to China was Copper blisters (63.8 percent).

Congo DR was the third major export destination accounting for 6.8 percent. The major export product to Congo DR was *Sulphuric acid; oleum in bulk* accounting for 13.3 percent.

South Africa was the fourth major export destination accounting for 4.5 percent. The major export products to South Africa were Semi-manufactured gold (incl. gold plated with platinum), non-monetary (22.8 percent).

The fifth major export destination was Singapore accounting for 4.4 percent. The major export product to Singapore was Cathodes and sections of cathodes of refined copper accounting for 83.7 percent.

These five countries collectively accounted for 84.4 percent of Zambia's total export earnings in July 2015.

Zambia's Major Import Sources by Commodity in July 2015

The major source of imports in July 2015 was South Africa, accounting for 30.3 percent. The major import product from South Africa was Gas Oils, contributing 3.8 percent.

The second major source of Zambia's imports was Congo DR which accounted for 15.2 percent. The major import products from Congo DR were Copper ores and concentrates accounting for 49.8 percent.

China was the third major source of Zambia's imports accounting for 8.8 percent. The major import products from China were Road tractors for semi-trailers, which accounted for 7.2 percent.

Other sources of Zambia's imports were Kenya and Kuwait, which collectively accounted for 14.9 percent of Zambia's Imports.

LAYMAN & STATISTICS

Domestic Exports: These are goods originating from the exporting countries.

Re-exports: This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

Trade Surplus: this is a situation where a country is exporting more than it is importing in value terms.

Trade Deficit: It is a situation where a country is importing more than it is exporting in value terms.

SITC: Stands for Standard International Trade Classification. It is a trade statistical nomenclature mainly used in trade statistical analysis.

	Breweries	6/ 110,000	0		0	0	0	110,000
	Grain retained for other uses	7/ 40,000	3,000		2,464	0	0	45,306
	(iii) Losses	8/ 130,911	1,276		2,005	8,212	47,642	191,461
	(iv) Structural cross-border trade	9/ 200,000						200,000
	(v) Existing FRA Export Commitments	358,417						
	Total requirements	3,086,854	62,753		46,715	164,232	863,331	4,018,011
C.	Surplus/deficit (A-B)	10/ 876,768	-35,000		0	0	89,528	862,670
D.	Potential Commercial exports	11/ -876,768	35,000	64,081	0	0	0	0
E.	Food aid import requirements	12/ 0	0	0	0	0	0	0

Notes:

- 1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2015.
- 2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.
- 3/ Human staple food consumption represents 70% (1,470 kCal/person/day, CSO) of total diet (2,100 kCal/person/day, National Food and Nutrition Commission for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2014, mid-market. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.
- 4/ National strategic requirements expected to be carried over into the next season by FRA.(this amount of 500,000 Mt includes equivalent quantity that is already budgeted for).
- 5/ Estimated requirements by major stock feed producers.
- 6/ Estimated requirements by industrial breweries.
- 7/ Estimated retention of grain for other uses by smallholders.
- 8/ Post-harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.
- 9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2015/16 marketing season. It does not include Formal trade.
- 10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial requirements. The total surplus/deficit is expressed as maize equivalent using energy values. The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.
- 11/ Commercial imports/exports represent expected regional and international trade by the private sector been harvested. For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.
- 12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
