March, 2015

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

Inflation decreases to 7.2 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for March 2015 was recorded at 7.2 percent compared to 7.4 percent recorded in February, 2015. This means that on average, prices increased by 7.2 percent between March 2014 and March 2015.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Exports by Major Product Categories, February and January 2015

Zambia's major export products in February 2015 were from the intermediate goods category (*mainly comprising copper cathodes and sections of refined copper*) accounting for 80.0 percent. Other exports were from the Consumer goods, Capital goods and Raw materials categories, which

collectively accounted for 20.0 percent of total exports in February 2015. This implies that between February and January 2015, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, which on average accounted for 82.4 percent of the total exports.

Zambia's Major Export Destinations by Commodity in February 2015

The major export destination in February 2015 was Switzerland, which accounted for 32.6 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 88.9 percent.

China was the second major destination of Zambia's exports accounting for 16.5

percent. The major export product to China was Copper blisters (79.1 percent).

The third major export destination was Congo DR accounting for 12.8 percent. The major export product to Congo DR was Sulphuric acid; oleum in bulk accounting for 49.3 percent.

South Africa was the fourth major export destination accounting for 9.4 percent. The major export products to South Africa were Cathodes & Sections of Cathodes of refined Copper (31.7 percent).

Singapore was the fifth major export destination accounting for 7.6 percent.

The major export products to Singapore were Cathodes & Sections of Cathodes of refined Copper accounting for 100.0 percent.

These five countries collectively accounted for 79.0 percent of Zambia's total export earnings in February 2015.

Export Market Shares by Regional Groupings, February and January 2015

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's exports, accounting for 27.5 percent in February 2015. Within SADC, Congo DR was the dominant market with 46.5 percent. Other notable markets in SADC were South Africa, Zimbabwe, Botswana and Namibia.

Asia was the second largest market for Zambia's exports, accounting for 27.1 percent in February 2015. Within Asia, China dominant market, accounting for 61.0 percent. Other notable markets in Asia were Singapore, Hong Kong, Japan and India.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 16.3 percent in February 2015. Within COMESA, Congo DR was the dominant market with 78.7 percent. Other notable markets in COMESA were Zimbabwe, Kenya, Malawi and Uganda.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 2.5 percent in February 2015. Within the EU, Germany was the dominant market with 66.8 percent. Other notable markets were the United Kingdom, France, Sweden and Netherlands.

Zambia's Major Import Sources by Commodity in February 2015

The major source of imports in February 2015 was South Africa, accounting for 33.6 percent. The major import product from South Africa was Structures and parts of structures, nes, of iron or steel - minlead frames & super strs, contributing 3.7 percent.

The second main source of Zambia's imports was Congo DR which accounted for 15.9 percent. The major import products from Congo DR were Copper ores and concentrates, which accounted for 76.2 percent.

China was the third main source of Zambia's imports accounting for 11.3 percent. The major import products from China was Urea, accounting for 5.8 percent.

Other sources of Zambia's imports were India and the United Kingdom, which collectively accounted for 8.4 percent of Zambia's Imports in February 2015.

LAYMAN & STATISTICS

Domestic Exports: These are goods originating from the exporting countries.

Re-exports: This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

Trade Surplus: this is a situation where a country is exporting more than it is importing in value terms.

Trade Deficit: It is a situation where a country is importing more than it is exporting in value terms.

SITC: Stands for Standard International Trade Classification. It is a trade statistical nomenclature mainly used in trade statistical analysis.

E. Food aid import requirements ^{12/}	0	0	0	0	0	0	0

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private Sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
