November, 2014

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi

INFLATION

Inflation increases to 8.1 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for November 2014 was recorded at 8.1 percent compared to 7.9 percent recorded in October, 2014. This means that on average, prices increased by 8.1 percent between November 2013 and November 2014.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Zambia's Major Export Destinations by Commodity in October 2014

The major export destination in October 2014 was Switzerland, which accounted for 44.7 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 91.5 percent.

China was the second major destination of Zambia's exports accounting for 17.6 percent. The major export product to China was Copper blisters (69.7 percent).

The third major export destination was South Africa accounting for 10.1 percent. The major export product to South Africa was Cathodes & Sections of Cathodes of refined Copper accounting for 37.1 percent.

Congo (DR) was the fourth major export destination accounting for 8.1 percent. The major export products to Congo (DR) were Sulphuric acid; oleum in bulk (37.7 percent).

Australia was the fifth major export destination accounting for 4.5 percent. The major export product to Australia was copper blister which was the only product exported to Australia.

These five countries collectively accounted for 85.0 percent of Zambia's total export earnings in October 2014.

Export Market Shares by Regional Groupings, October and September 2014

Southern African Development Community (SADC) was the largest market for Zambia's total exports, accounting for 24.5 percent in October 2014. Within SADC, South Africa dominated the export market, accounting for 41.2 percent. Other notable markets in SADC were Congo (DR), Zimbabwe, Malawi and Botswana.

Asia regional grouping was the second market for Zambia's total exports, accounting for 23.5 percent in October 2014. Within Asia, China was the

dominant market with 74.7 percent. Other notable markets in Asia were Singapore, United Arab Emirates, Japan and Hong Kong.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 12.9 percent in October 2014. Within COMESA, Congo (DR) was the dominant market with 62.8 percent. Other notable markets in COMESA were Zimbabwe, Malawi, Mauritius and Kenya.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 1.8 percent in October 2014. Within the EU, Germany was the

dominant market with 59.7 percent. Other notable markets were The United Kingdom, Netherlands, Sweden and Belgium.

FORMAL SECTOR EMPLOYMENT TRENDS, 2012 - 2013

Quarterly Trends in Formal Sector Employment

The 2012/2013 Formal Sector Employment and Earnings Report reveals that formal sector employment was 955,150 as at the fourth quarter 2013. This represents an increase of 119,771 from 835,379

recorded in the first quarter of 2012. The highest increase of 44,002 was observed between fourth quarter 2012 and first quarter 2013.

Formal Sector Employment Trends, 2012 - 2013

Formal Sector Employment by Sector

The private sector is the largest employer accounting for 604,425 in 2012 and 687,809 in 2013. Local government had

the smallest number of employed people with 12,718 in the first quarter 2012 and 13,534 in the fourth quarter 2013.

Number of Employed Persons by Sector, Zambia 2012 and 2013

Sector	First Quarter 2012	Fourth Quarter 2013
Central Government	159,598	176,993
Local Government	12,718	13,532
Parastatal	27,818	33,355
Private	604,425	687,809
NGOs	30,821	43,461
Total	835,379	955,150

ZAMBIA DEMOGRAPHIC AND HEALTH SURVEY

Maternal Health continues to improve

The 2013/14 Zambia Demographic and Health Survey (ZDHS) collected information on antenatal care; health facility delivery; assistance during delivery; and maternal mortality. The health care that a mother receives during pregnancy, at the time of delivery, and soon after delivery is important for the survival and well-being of both the mother and her child.

Results from the survey reveal that there has been an improvement in antenatal

care from a skilled provider (doctor, clinical officer, nurse, or midwife) since 2001/02.

The percentage of women aged 15-49 years who had a live birth in the five years preceding the survey and received antenatal care from a skilled provider for the last live birth, increased from 93 percent in 2001/02 to 96 percent in 2013/14.

Source: ZDHS 2001/2, 2007 and ZDHS 2013/14 preliminary Report

The results further show that, the percentage of live births in the five years preceding the survey delivered by a skilled provider increased by 21 percentage points from 43 percent in

2001/02 to 64 percent in 2013/14 whereas the proportion of births delivered in a health facility increased by 23 percentage points from 44 to 67 percent in the same period.

Source: ZDHS 2001/2, 2007 and ZDHS 2013/14 preliminary Report

The Maternal Mortality Ratio (MMR) has continued to decline since 2001/02. The ratio declined from 729 maternal deaths per 100,000 live births in 2001/02 to 591

maternal deaths per 100,000 live births in 2007. In 2013/14, the maternal mortality ratio reduced further to 398 maternal deaths per 100,000 live births.

CSO moves ahead to improve GBV Statistics

The Central Statistical Office (CSO) through the Gender Statistics Unit has embarked on the process of improving gender statistics. This development involves the presentation of statistics portraying the situation of men and women, boys and girls in various social and economic spheres.

One important area identified was the need to improve gender based violence (GBV) statistics, due to identified inconsistencies in various administrative GBV data.

Since early this year (2014), CSO has engaged various stakeholder institutions in improving GBV statistics. The office has had consultative meetings with stakeholders to assess data collection instruments for GBV information as well as determine matters relating to the storage and dissemination of this information.

Efforts have been made to standardize and harmonize data collection instruments for a comprehensive data production, easy monitoring and comparison of GBV indicators. A workshop on harmonizing and improving gender based violence (GBV) data collection instruments was conducted in October 2014.

The technical team comprising members from stakeholder institutions reviewed instruments used by stakeholder institutions in collecting GBV data. The team also discussed the way forward in creating a strategy for coordination among institutions collecting GBV statistics.

What has been done?

Administrative forms used in collecting GBV data were revised to ensure that key variables are captured at data collection. Instruments reviewed were from the following institutions:

- Zambia Police-Victim Support Unit (ZP-VSU)
- Young Women Christian Association of Zambia (YWCA)
- Ministry of Community Development Mother and Child Health (MCDMCH)
- Ministry of Health-University Teaching Hospital
 1. Pediatrics – Centre of Excellence One Stop Centre
 2. Gynecology and Obstetrics
 3. Casualty
- Ministry of Health-Kasama One Stop Center
- National Women's Legal Aid Clinic (NWLAC)
- STOP GBV - World Vision Zambia

A manual (to guide data collectors) with key indicators, concepts and definitions being used in GBV in harmony with the Anti-GBV Act, No.1 of 2011.

The team also made recommendations on improving the systems and procedures of data collection and developed a roadmap to the development of the GBV Data Base.

The exercise is aimed at harmonising and improving coordination of data collection, production and dissemination of GBV statistics in Zambia.

AFRICAN STATISTICS DAY

CSO Celebrates 2014 African Statistics Day!

The Central Statistical Office (CSO) celebrated the 2014 African Statistics Day which falls on 18th November of every year. This is the day when the African Statistical fraternity celebrates the African Statistics Day. This day was initiated by the United Nations Economic Commission for Africa in 1990. The African Statistics Day is a yearly advocacy tool aimed at raising awareness on the importance of Statistics in all aspects of Economic and Social Development in Africa.

The Minister of Finance, Honourable Alexander B. Chikwanda, MP officially launched the commemoration of this day on Monday, 17th November, 2014. However, Zambia celebrated this day on Friday, 21st November, 2014 under the theme ***“Open Data for Accountability and Inclusiveness”***.

In line with the interpretation of the theme, the Central Statistical Office (CSO) is mandated to produce timely, quality and credible official statistics for sustainable development. It ensures that all the statistics it produces from censuses and surveys are made available and accessible to all stakeholders to

enable them review the outcomes of government policies.

Availability of statistics empowers citizens to make informed decisions; better understand their Government decision making processes; and increase their sense of responsibility.

In an effort to make sure that the statistics produced by CSO are made available and accessible to the various data users, various channels are used in data dissemination. Some of the channels used are through the National data archive (NADA) which allows access to micro and macro data; the Website where data users will find census and survey reports. CSO data/information can also be accessed through dissemination seminars and other publicity meetings; and soft and hard copy reports.

During the commemoration of the 2014 Africa Statistics Day which was held at Mulungushi International Conference Centre, CSO launched the Zambia Data Portal. This is an internet based portal which allows data users to analyse census and survey data from various sources; and to report the data in form of tables, graphs and maps.

Total availability	2,988,021	47,484	441,839	44,950	210,392	1,114,583	4,614,109
B. Requirements:							
(i) Staple food requirements:							
Human consumption 3/	1,429,739	55,769	281,321	40,540	199,872	721,901	2,533,816
Strategic Reserve Stocks (net) 4/	500,000	0	0	0	0	0	500,000
(ii) Industrial requirements:							
Stock feed 5/	223,300	0	0	0	0	0	223,300
Breweries 6/	100,000	0	0	0	0	0	100,000
Grain retained for other uses 7/	34,347	4,478	0	2,464	0	0	41,088
(iii) Losses 8/	126,640	2,237	13,679	1,946	10,520	55,729	199,228
(iv) Structural cross-border trade 9/	120,000						120,000
Total requirements	2,534,026	62,484	295,000	44,950	210,392	777,630	3,717,432
C. Surplus/deficit (A-B) 10/	453,995	-15,000	146,839	0	0	336,953	896,677
D. Potential Commercial exports 11/	-453,995	15,000	-146,839	0	0	0	0
E. Food aid import requirements 12/	0	0	0	0	0	0	0

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket). The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
