September, 2014

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

INFLATION

September Inflation Decreases!

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for September 2014 was recorded at 7.8 percent. This means that on average, prices increased by 7.8 percent between September 2013 and September 2014.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

Exports by Major Product Categories, August and July 2014

Zambia's major export products in August 2014 were from the intermediate goods category (mainly comprising copper cathodes and sections of refined copper) accounting for 84.7 percent. Other exports were from the Consumer goods, Raw materials and Capital goods categories which collectively accounted

for 15.3 percent of total exports in August 2014. This implies that between August and July 2014, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, accounting for an average of 84.8 percent of the total exports.

Zambia's Major Export Destinations by Commodity in August 2014

Zambia's major export destination in August 2014 was Switzerland, which accounted for 51.9 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 94.2 percent.

China was the second major destination of Zambia's exports accounting for 13.3 percent. The major export product to China was Copper blisters (72.2 percent).

The third major export destination was South Africa accounting for 7.6 percent. The major export product to South Africa was Cathodes & Sections of Cathodes of

refined copper, accounting for 27.7 percent.

Congo (DR) was the fourth major export destination accounting for 7.2 percent. The major export products to Congo (DR) were Sulphuric acid; oleum in bulk (22.4 percent).

Singapore was the fifth major export destination accounting for 4.1 percent. The major export product to Singapore was Precious or semi-precious stones, nes, which accounted for 47.4 percent.

These five countries collectively accounted for 84.1 percent of Zambia's total export earnings in August 2014.

CSO TO CONDUCT THE POST HARVEST SURVEY, 2013/2014

The Central Statistical Office in conjunction with the Ministry of Agriculture and Livestock will soon be conducting the Post Harvest Survey (PHS) for the 2013/2014 agricultural season. The 2013/2014 PHS is expected to start with a ten day training of Master Trainers scheduled to commence on Saturday 27th September, 2014. The training of Master Trainers will be followed by the training of Supervisors and Enumerators in all provinces during the third week of October. Data collection is expected to start during the last week of October.

The field staff for the PHS will be drawn from both CSO and MAL staff in the provinces. A total of 16,800 households will be covered in all the districts, as well as all Large-Scale Farms.

The purpose of the PHS is to provide actual production as opposed to estimates provided by the Crop Forecasting Survey (CFS) which was done earlier in the year. The major objectives of the PHS are;

- To provide key Agriculture Performance Indicators for the National Development Plans.
- To provide public institutions, the private sector, research

organisations and other stakeholders with indicators of seasonal agricultural performance for planning and research.

- To provide agricultural production figures used for calculating the agriculture sector's contribution to the country's Gross Domestic Product (GDP).
- To provide Government institutions, the donor community and other international partners with useful information that will enable the formulation of developmental programs for improving food security.
- To provide baseline data used in carrying out Vulnerability Assessment and Mapping (VAM).
- To generate information that will contribute towards preparedness and mitigation of disasters.
- To provide the Ministry of Agriculture and Livestock (MAL) with indicators used for Agricultural Sector Performance Analysis for agricultural policy, planning and decision making.

This year's PHS will also pilot the use of the **Computer-Assisted Personal Interview (CAPI) technology developed by the World Bank. This technology is used in conducting complex surveys with dynamic structures using low-cost android tablet devices. The software can be tailored to the needs of the clients, allowing them to successfully complete simple and more sophisticated projects, from basic evaluation questionnaires to complicated multistage panel surveys.** The software is offered free of charge, its development being co-financed by the World Bank, [Bill and Melinda Gates Foundation](#) and the [Food and Agriculture Organization of the United Nations](#).

If the Pilot will be successful, CSO and MACO intend to implement the use of CAPI during next year's CFS to be conducted in January 2014.

The introduction of CAPI will dramatically reduce the time lag between data collection and data analysis. Since manual coding of the responses recorded with pen and paper will no longer be necessary and data validation will be done at the time of data collection, the information will be ready for statistical analysis as soon as surveying is completed.

The Use of tablet devices for interviewing yields many other benefits such as:

- Reducing the number of coding errors. Surveys can contain validation data that make it impossible to enter values outside a given range. Supervisors may also view and check the collected information as soon as the enumerators finish the interviews, together with possible error reports. Automated routing reduces the incidence of missing data.
- Changes in the structure of the questionnaire can be instantly reflected on the interviewers' devices. This allows for last-minute updates or error corrections.
- CAPI technology simplifies conducting surveys with dynamic structure, where the questions to be asked will vary depending on the answers given by the respondent. For instance, if a person participating in a survey reports being employed, an additional section inquiring about the type of job, working hours or income can be displayed

B. Requirements:							
(i) Staple food requirements:							
Human consumption 3/	1,429,739	55,769	281,321	40,540	199,872	721,901	2,533,816
Strategic Reserve Stocks (net) 4/	500,000	0	0	0	0	0	500,000
(ii) Industrial requirements:							
Stockfeed 5/	223,300	0	0	0	0	0	223,300
Breweries 6/	100,000	0	0	0	0	0	100,000
Grain retained for other uses 7/	34,347	4,478	0	2,464	0	0	41,088
(iii) Losses 8/	126,640	2,237	13,679	1,946	10,520	55,729	199,228
(iv) Structural cross-border trade 9/	120,000						120,000
Total requirements	2,534,026	62,484	295,000	44,950	210,392	777,630	3,717,432
C. Surplus/deficit (A-B) 10/	453,995	-15,000	146,839	0	0	336,953	896,677
D. Potential Commercial exports 11/	-453,995	15,000	-146,839	0	0	0	0
E. Food aid import requirements 12/	0	0	0	0	0	0	0

Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket). The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
