## Central Statistical Office

Volume 138

Website: [www.zamstats.gov.zm](http://www.zamstats.gov.zm)

October, 2014

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

# INFLATION

## Inflation increases to 7.9 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for October 2014 was recorded at 7.9 percent. This means that on average, prices increased by 7.9 percent between October 2013 and October 2014.

The Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

### Zambia's Top 25 Non-Traditional Exports (NTEs), September and August 2014

Zambia's major Non-Traditional Exports (NTEs) in September 2014, were Sulphuric acid; oleum in bulk which accounted for 16.2 percent. Portland cement (excl. white) were the second largest NTEs in September 2014 accounting for 5.9 percent.

Other notable NTEs, in September 2014 were Cotton, not carded or combed (4.4 percent); Semi-manufactured gold (incl. gold plated with platinum (4.3 percent); and Wire of refined copper, maximum cross-sectional dimension (3.8 percent).

## Zambia's Major Export Destinations by Commodity in September 2014

Zambia's major export destination in September 2014 was Switzerland, which accounted for 42.6 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 91.3 percent.

China was the second major destination of Zambia's exports accounting for 21.6 percent. The major export product to China was Copper blisters (50.0 percent).

The third major export destination was Congo DR accounting for 9.8 percent. The major export product to Congo DR was Sulphuric acid; oleum in bulk accounting for 42.6 percent.

South Africa was the fourth major export destination accounting for 6.4 percent. The major export products to South Africa were Semi-manufactured gold (incl. gold plated with platinum), non-monetary (17.3 percent).

Australia was the fifth major export destination accounting for 4.1 percent. The major export product to Australia was copper blister which accounted for 99.4 percent.

These five countries collectively accounted for 84.5 percent of Zambia's total export earnings in September 2014.

## Export Market Shares by Regional Groupings, September and August 2014

Asia regional grouping was the largest market for Zambia's total exports, accounting for 27.1 percent in September 2014. Within Asia, China was the dominant market with 79.7 percent. Other notable markets in Asia were Singapore, Japan, United Arab Emirates, and India.

Southern African Development Community (SADC) was the second market for Zambia's total exports, accounting for 22.1 percent in September 2014. Within SADC, Congo (DR) dominated the export market, accounting for 44.4 percent. Other notable markets in SADC were South Africa, Zimbabwe, Malawi and Tanzania.

The Common Market for Eastern and Southern Africa (COMESA) was the third largest market for Zambia's total exports accounting for 14.5 percent in September 2014. Within COMESA, Congo (DR) was the dominant market with 67.4 percent. Other notable markets in COMESA were Zimbabwe, Malawi, Kenya and Mauritius.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 2.3 percent in September 2014. Within the EU, United Kingdom was the dominant market with 41.6 percent. Other notable markets were Belgium, Germany, Netherlands and Italy.

## Zambia's Major Import Sources by Commodity in September 2014

The major source of Zambia's imports in September 2014 was South Africa, accounting for 35.3 percent. The major import products from South Africa were Generating sets, (excl. wind-powered) contributing 5.2 percent.

The second main source of Zambia's imports was Congo (DR) which accounted for 16.3 percent. The major import products from Congo (DR) were Copper ores and concentrates, which accounted for 86.2 percent.

China was the third main source of Zambia's imports accounting for 9.4 percent. The major import products from China were Generating sets, (excl. wind-powered), accounting for 13.5 percent.

Other sources of Zambia's imports were Kenya and India, which collectively accounted for 11.8 percent of Zambia's Imports.

## ZAMBIA DEMOGRAPHIC AND HEALTH SURVEY

### Infant and under Five Mortality Rates Decreases

Information on infant and child mortality is a basic indicator of a country's socio-economic development and as such is important for the planning and evaluation of health policies and programs. Reductions in infant and child mortality remains priority areas in the Zambian health perspective.

Preliminary results from the 2013-14 Zambia Demographic Health Survey (ZDHS) shows a decline in infant and under five mortality rate.

The estimates for infant mortality rate have continued to decline from 95 deaths per 1,000 live births in 2001-02 to 70 deaths per 1,000 live births in the 2007

and to a further 45 deaths per 1,000 live births in 2013-14.

The under-five mortality rate has also continued to decrease from 168 deaths per 1,000 live births in 2001-02 to 119 deaths in 2007 and further to 75 deaths per 1,000 live births in the 2013-14.

The Neonatal mortality rate declined from 37 deaths per 1000 live births in the 2001/2 to 34 deaths per 1000 live births in 2007 and further reduced 24 deaths per 1000 live births in 2013-14.

## Trends in Childhood Mortality

*Deaths per 1,000 live births for the 5-year period before the survey*

■ 2001-02 ■ 2007 ■ 2013-14

Source: 2001-02, 2007 and 2013/14 Preliminary Zambia Demographic and Health Survey

## LAYMAN AND STATISTICS

**Neonatal mortality:** the probability of dying within the first month of life

**Infant mortality:** the probability of dying before the first birthday

**Under-five mortality:** the probability of dying between birth and the fifth birthday

**Notes:**

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st February 2014.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to February 2012, midmarket). The food balance shows an overall surplus of staple foods. Food prices February affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and February not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
