## Central Statistical Office

Volume 105

Website: [www.zamstats.gov.zm](http://www.zamstats.gov.zm)

December, 2011

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi  
Director of Census and Statistics

29th December, 2011

#### Inside this Issue

- **December inflation drops to 7.2 percent**
- **November 2011 records Trade Surplus**
- **Economy to grow by 6.5 percent in 2011**
- **Overall Performance of the Economy in the First Half Of 2011**
- **Selected Socio - Economic Indicators**

# INFLATION

## *December inflation drops to 7.2 percent*

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), reduced to 7.2 percent in December 2011, from 8.1 percent in

November 2011. The decrease is mainly attributed to reductions in some food prices.

Source: CSO, Prices Statistics, 2011

## *Changes in Annual Inflation Rates for CPI Main Groups*

Between November 2011 and December 2011, annual rates of inflation reduced for Food, beverages and tobacco; Clothing and footwear; Household fuel and lighting; and Furniture and household

goods. The annual rate of inflation increased for Medical care; Transport and communication; Recreation and education; and Other goods and services.

### Annual Inflation Rate: CPI Main Groups

	Total	Food And Beverages	Clothing And Footwear	Rent Fuel & Lighting	Furniture And Household Goods	Medical care	Transport And Comms	Recreation And Education	Other Goods And Services

## ***National Average Prices of Selected Products***

A comparison of retail prices between November 2011 and December 2011, shows that the average price of a 25 kg bag of white breakfast mealie meal reduced by 1.6 percent, from K48,309 to K47,545, while the national average price of a 20 litre tin of maize grain reduced by 1.5 percent, from K19,718 to K19,429. The national average price of 1kg of

tomatoes reduced by 9.6 percent, from K4,094 to K3,700.

However, the national average price of 1kg of dried kapenta (Siavonga) increased by 14.1 percent, from K65,547 to K74,797, while the national average price of 1kg of beef (mixed cut) increased by 2.9 percent, from K23,951 to K24,642.

### **National Average Prices for selected Products and Months**

Product Descriptions	2011						Percentage Change
	July	August	September	October	November	December	Dec-11/ Nov-11

## ***Status on the Revised Consumer Price Index (CPI) In Zambia***

### **Background**

The Central Statistical Office (CSO) is in the process of implementing the Consumer Price Index (CPI) based on a new methodology including the revised basket of products; new weights; new index reference period; and new software for processing the CPI.

The International Labour Organization (ILO) technical assistance Mission in May 2006 and the International Monetary Fund (IMF) technical assistance Mission in 2009 assisted in the development of the new methodology for computing the CPI.

The African Development Bank (AfDB) funded a second technical assistance Mission from ILO in September 2011 to review and validate the new Consumer Price Index (CPI) methodology, including data entry and processing software. This technical assistance was required because of the recommendations made in May 2006 on the most appropriate methods for rebasing the index and selecting a new index reference period among other things and provision of additional guidelines on the treatment of the new elements in CPI design based on international standards and best national practices.

Following a recommendation by the Ministry of Finance and National Planning, a technical committee on the new CPI

methodology was formed. Membership of the technical committee was drawn from the following; Bank of Zambia (BOZ), Common Market for Eastern and Southern Africa (COMESA), Economics Association of Zambia (EAZ), Zambia Institute for Policy Analysis and Research (ZIPAR) the University of Zambia (UNZA), the Jesuit Centre for Theological Reflection (JCTR), Ministry of Finance and National Planning, and Central Statistical office (CSO). Further, the following three subcommittees were formed:

- (i) Methodology sub-committee to review and validate the new CPI methodology;
- (ii) Policy sub-committee to deal with policy implications of the results from the new CPI methodology; and
- (iii) Sensitization sub-committee, with the responsibility of sensitization of stakeholders on the new CPI methodology.

Following the recommendations made by ILO, IMF, and the Methodology sub-committee, the new index series has been produced parallel to the old since January 2010. The new CPI methodology will be launched in January 2012. From January 2012, CSO will begin publishing the revised CPI and therefore, cease to produce the CPI based on the old methodology.

## Comparison of the Old and Revised Consumer Price Index

Item/ Area	Old CPI	Revised CPI
Basket of products	357	438
Classification system	8 Divisions	12 Divisions (COICOP)
Weights	Derived from 1993/1994 Household Budget Survey (HBS)	Derived from 2002/2003 Living Conditions Monitoring Survey (LCMS III) HBS TYPE
Compilation level	Metropolitan Low Income Group, Metropolitan High Income Group, and Non-Metropolitan Group.	Provincial CPIs
Index reference period (Base Period)	1994	2009
Methodology for calculating item indices	Arithmetic mean	Geometric mean
Price reference period	Base price reference period	Previous month price
Districts	45	73
Outlets	2115	3,000
Software for Data Entry, Processing and Reporting	Dbase IV, DOS based	Microsoft Access, with Visual Basic for Applications (Windows based)

## Features of the New CPI Software

The New CPI System has been developed in Microsoft Access and has the following features: -

- *Uses Windows platform*
- *Propagates centrally collected prices to provincial outlets*
- *Validation is immediate, which allows immediate correction*
- *Editing/ reviewing of quotations is flexible – permitting filtering of records of interest such as the threshold (upper and lower limits) values of price change rates*
- *Prints Questionnaires from the application*
- *System works in a Client-Server environment, supporting a minimum of 15 users concurrently*

# INTERNATIONAL MERCHANDISE TRADE

## *November 2011 records Trade Surplus*

Zambia recorded a trade surplus valued at K315.9 Billion in November 2011, representing a nominal increase of 68.4 percent from K187.5 Billion recorded in October 2011. This means that the country exported more in November 2011 than it imported, in the same month, in nominal terms.

Since January 2011, the country has had monthly trade surpluses with the highest valued at K1,484.3 Billion recorded in January 2011, followed by K1,296.9 Billion in September 2011. The lowest trade surplus was in October 2011, valued at K187.5 Billion.

## Percentage share of Exports and Imports in Total Trade, January to November\* 2011

Source: CSO, International Trade Statistics, 2011

These trade data are compiled based on the General Trade System

Note: January 2011 to October 2011 figures have been revised, while November 2011 figures are provisional

### ***Exports by Major Product Categories, November and October 2011***

Zambia's major export products in November 2011 were from the Intermediate goods category (*mainly comprising copper cathodes and sections of refined copper*) accounting for about 71.4 percent. Other exports were from the Consumer goods, Raw materials and Capital goods categories; which collectively accounted for about

28.5 percent of total exports in November 2011. This implies that between November and October 2011, the country has been a net exporter of Intermediate goods, mainly metals and their articles, accounting for an average of 77.5 percent of the total exports for the two months.

### ***Zambia's Major Export Destinations by Commodity in November 2011***

Zambia's major export destination in November 2011 was Switzerland, which accounted for 45.0 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for about 82.4 percent.

China was the second major destination of Zambia's exports accounting for 22.2 percent. The main export product to China was Copper blister (65.3 percent).

Zimbabwe was the third major export destination accounting for 7.4 percent. The main export product to Zimbabwe was Maize (corn) starch which contributed 39.9 percent to the country's share of exports.

South Africa was the fourth major destination of Zambia's exports accounting for 6.0 percent. The major export product to South Africa were articles of Cobalt (24.3 percent).

The Democratic Republic of Congo (DRC) was the fifth major export destination of Zambia's exports accounting for 2.8 percent. The main export product to The DRC was raw cane sugar in solid form, which accounted for 28.4 percent.

These five countries collectively accounted for 83.4 percent of Zambia's total export earnings in November 2011.

### **Export Market Shares by Regional Groupings, November and October 2011**

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's total exports, accounting for 23.0 percent in November 2011. Within SADC, Zimbabwe was the dominant market in November 2011 with 32.3 percent while South Africa was the dominant market in October 2011 with 64.8 percent. Other notable markets were Tanzania, Mauritius and Malawi.

Asia was the second largest market for Zambia's total exports, accounting for 22.9 percent in November 2011. Within

Asia, China was the dominant market in both November and October 2011 with 97.0 and 94.1 percent, respectively. Other notable markets were the United Arab Emirates, Singapore and India.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest market for Zambia's total exports accounting for 17.4 percent in November 2011. Within COMESA, Zimbabwe was the dominant market with 42.9 percent in November 2011 while Congo (DR) was the dominant market in October with 45.2 percent.

Other notable markets were Rwanda, Malawi and Mauritius.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 4.8 percent in November

2011. Within the EU, the United Kingdom was the dominant market in both months with 58.1percent in November and 26.0 percent in October 2011. Other notable markets were Luxembourg, Poland and Germany.

### ***Import Market Shares by Regional Groupings, November and October 2011***

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 56.7 percent in November 2011. Within SADC, Congo (DR) was the major source of Zambia's imports with 65.2 percent in November 2011, while South Africa was the dominant market in October 2011 with 34.6 percent. Mozambique was the second major source of Zambia's imports with 28.5 percent in November, while Congo (DR) was the dominant market in October 2011 with 21.8 percent. Other notable markets were Zimbabwe and Malawi.

Asia was the second largest source of Zambia's imports accounting for 27.4 percent in November 2011. Within Asia, China was the dominant source of Zambia's imports in both November and October 2011 with 31.8 and 33.2 percent, respectively. Kuwait was second in November 2011 with 15.8 percent, while the United Arab Emirates was second in October 2011 with 25.8 percent. Other notable markets were India, Singapore and Japan.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest source of Zambia's imports accounting for 20.4 percent in November 2011. Within

COMESA, Congo (DR) was the main source of Zambia's imports in both November and October 2011 with 85.6 and 81.8 percent, respectively. Kenya was second in November 2011 with 5.0 percent, while Zimbabwe was second in October 2011 with 5.1 percent. Other notable sources were Swaziland, Mauritius and Egypt.

The European Union (EU) was the fourth largest source of Zambia's imports

accounting for 8.4 percent in November 2011. Within the EU, the United Kingdom was the major source of Zambia's imports accounting for 33.5 and 61.3 percent in November and October 2011, respectively. Sweden was second with 19.5 percent in November 2011 while Belgium was second in October 2011 with 17.8 percent. Other notable markets were France, Poland, Germany and Luxembourg.

(R) Revised figures

# National Accounts Statistics

## *Economy to grow by 6.5 percent in 2011*

According to the preliminary estimates of GDP by kind of economic activity, the Zambian economy is expected to grow by 6.5 percent in 2011. This growth is driven by the expected increased output in Transport and Communications;

Electricity, gas and water; Agriculture; Forestry and fishing; Construction; and Trade sectors. The preliminary estimates are mainly based on data for the first half of the year.

**Percentage Changes in GDP at Constant 1994 Prices, 2006-2011**

Source: CSO, National Accounts Statistics  
\* Preliminary

The services or tertiary sector is expected to be the main source of economic growth, recording the highest growth

rate of 6.9 percent. This is followed by the Secondary Sector, at 6.4 percent.

\* Preliminary

The Primary Sector, which comprises Agriculture, forestry and fishing; and Mining and quarrying, is expected to grow by 4.8 percent in 2011 from 10.2 percent in 2010. Growth in this sector was mainly spurred by the Agriculture, forestry and fishing industry which is expected to

grow by 7.7 percent this year, due to expected high crop output in maize, soya-beans, seed cotton, both burley and Virginia tobacco and wheat; as estimated in the 2010/2011 Crop forecast survey.

#### Crop Production 2007/2008 to 2010/2011 (Metric tonnes)

Crops	2007/2008	2008/2009	2009/2010	2010/2011	% change
Maize	1,445,655	1,887,010	2,795,483	3,020,380	8.0
Sorghum	11,446	21,829	27,732	18,458	(33.4)
Rice	30,258	41,929	51,656	49,410	(4.3)
Millet	39,163	48,967	47,997	37,644	(21.6)
Sunflower	15,405	33,653	26,420	21,954	(16.9)
Groundnuts	84,598	120,564	164,602	139,388	(15.3)
Soyabeans	59,177	118,794	111,888	116,539	4.2

Burley Tobacco	7,471	8,758	9,809	11,141	13.6
Mixed Beans	50,488	46,729	65,265	47,070	(27.9)
Wheat	113,242	195,456	172,256	237,336	37.8

Source: CSO, *Agricultural Statistics*

The slower growth in the Primary sector is attributed to the expected smaller increase in the mining output. Copper output marginally increased while cobalt output declined. In the Other Mining and Quarrying industry (though stone quarrying continues to record increased growth) there was no recorded production in the coal mining industry by the second quarter of 2011 though production was expected to resume in the third quarter. As a result, the mining and quarrying sector is expected to grow by only 1.3 percent in 2011 compared to a growth of 15.2 percent in 2010.

The Secondary sector is expected to grow by 6.4 percent in 2011 compared to the 6.5 percent growth in 2010. The Electricity, gas and water industry is the main source of this growth, posting a

growth of 7.9 percent. This is mainly due to increased demand for electricity for both industrial as well as domestic use.

The Construction; and the Manufacturing industries are expected to grow by 7.2 percent and 5.0 percent, respectively. The high growth rate in construction is due to the continued increase in building and construction activities in the country.

The Tertiary or Services Sector is expected to grow by 6.9 percent in 2011 compared to a growth of 6.6 percent in 2010. The Transport and Communications industry has the largest contribution to growth, showing 12.3 percent growth. This is mainly due to the sustained growth in the Telecommunications as well as the Road Transport sub-industries.

### ***Levels of GDP and GDP per Capita***

Zambia's GDP at current prices shows that the GDP is expected to grow from K77, 666.6 billion in 2010 to K93, 960.4 billion in 2011. In US dollar terms, the economy is expected to grow from US\$

16.2 billion in 2010 to US\$19.6 billion in 2011.

GDP per capita is expected to increase from US\$1,241.0 in 2010 to US\$1,463.0 in 2011.

### GDP Per Capita, 2006 - 2011

	2006	2007	2008	2009	2010	2011
GDP by kind of economic activity (K'billions)	38,560.8	46,194.8	54,839.4	64,615.6	77,666.6	93,963.8

### Structure of the Economy

The GDP at current prices depicts the structure of the economy. The Tertiary sector is expected to account for 43.8 percent of the total GDP in 2011, followed by the Secondary sector which is expected to account for 33.0 percent.

Within the Tertiary Sector, the Wholesale and retail trade industry accounts for the largest share, followed by the Community, social and personal services; and the financial institutions and insurance industries.

The Construction industry has the largest share of GDP within the Secondary Sector, followed by Manufacturing. The Electricity and Water Supply industry has the lowest share of GDP in this sector.

Within the Primary Sector, Agriculture, forestry and fishing industry accounts for the larger share compared to Mining and Quarrying industry. The structure of the primary sector has not changed much in the preceding five years.

Over the last ten years, there has been a shift in the structure of the economy. Notably, the secondary sector has increased its share of the economy from 19.9 percent in 2002 to 33.0 percent in

2011. The primary sector has remained more or less the same, while there has been a decline in the share of the tertiary sector, from 54.5 percent in 2002 to 43.8 percent in 2011.

## Trends in the structure of the primary, secondary and tertiary sectors' Gross Value Added, 2002-2011

## 2011 Quarterly Index of Industrial Production

### Overall Performance of the Economy in the First Half Of 2011

Data for the first half of 2011 shows that Zambia's industrial output increased by 5.0 percent in 2011 compared to the output produced during the same period in 2010. This is according to the 2011, first and second Quarter Index of Industrial Production (IIP) which covers the Mining and quarrying; Manufacturing; and Electricity industries.

The 5.0 percent growth in the production index is on account of strong growth in the electricity and manufacturing industry indices. The electricity industry grew by 11.3 percent in first half of 2011; manufacturing output increased by 7.1 percent in the first half of 2011.

### Index Numbers and Year-on-Year percentage changes of the Quarterly IIP, 2010 - 2011

PERIOD	Average Index Q1_Q2 2009	Average Index Q1_Q2 2010	Growth 2010/2009	Average Index Q1_Q2 2011	Growth 2011/2010	
<b>TOTAL INDEX</b>	169.4	183.5	8.3	192.6	5.0

	Coal	41.6	0	(100.0)	0.0	-
	Non-ferrous Ore	240.2	267.2	11.2	270.6	1.3
	Stone Quarrying	305.0	323.15	5.9	336.0	4.0
<b>MANUFACTURING</b>	<b>TOTAL MANUFACTURING</b>	119.3	127.85	7.2	137.0	7.1
	<i>Food, Beverages &amp; Tobacco</i>	157.0	169.8	8.1	179.3	5.6
	<i>Textile, Clothing &amp; Leather</i>	37.3	24.55	(34.3)	9.3	(62.1)
	<i>Wood &amp; Wood Products</i>	224.9	254.7	13.3	268.5	5.4
	<i>Paper &amp; Paper Products</i>	122.3	153.95	25.9	176.7	14.8
	<i>Chemicals, Rubbers &amp; Plastics</i>	118.0	117.75	(0.2)	126.8	7.6
	<i>Non-metallic Mineral Products</i>	151.6	170.3	12.3	206.0	20.9
	<i>Basic Metal Industries</i>	83.5	82.55	(1.1)	81.3	(1.5)
	<i>Fabricated Metal Products</i>	68.5	78.2	14.1	92.7	18.5
<b>TOTAL ELECTRICITY</b>	133.9	144.8	8.1	161.2	11.3	

Source: CSO, Index of Industrial Production

However, the 5.0 percent growth in the Index of Industrial Production in first half of 2011 is 3.3 percentage points lower than that recorded in 2010 in the same

period. This is mainly on account of a lower growth in output for the mining industry in first half of 2011.

### ***Performance of the Mining and Quarrying Industry***

Production in the Mining and Quarrying industry grew by 2.2 percent in the first half of 2011. The growth is mainly attributed to favourable growth in the stone quarrying sub-industry which grew

by 4 percent. The Non-ferrous ore sub-industry grew by 1.3 percent during the same period.

#### **Performance of the Mining and Quarrying Industry in the first half of 2011**

PERIOD		Average Index Q1_Q2 2009	Average Index Q1_Q2 2010	Growth 2010/2009	Average Index Q1_Q2 2011	Growth 2011/2010

	Coal	41.6	0.0	(100.0)	0.0	-
	Non-ferrous Ore	240.2	267.2	11.2	270.6	1.3
	Stone Quarrying	305.0	323.15	5.9	336.0	4.0

Source: CSO, Index of Industrial Production

The other mining sub-industry, which comprises coal mining, continues to record no production. However,

production at the only coal mine was expected to resume in the third quarter of 2011.

### ***Copper and Cobalt Production***

Copper production increased from 362,823 metric tonnes in the first half of 2010 to 371,582.2 metric tonnes in the first half of 2011, representing a growth of 2.4 percent. Production of cobalt, on the

other hand declined from 1,194 metric tonnes in the first half of 2010 to 901.4 metric tonnes in the first half of 2011, representing a decline of 24.5 percent.

#### **Copper and Cobalt production, first half 2009 – 2011, in metric tonnes**

	Product Weight	First Half 2009	First Half 2010	% Change 2010	First Half 2011	% Change 2011
Copper	0.85	330,125	362,823	9.9	371,582.2	2.4
Cobalt	0.15	808	1,194	47.8	901.4	(24.5)

Source: CSO, Index of Industrial Production

### ***Performance of the Manufacturing Industry***

Production in the manufacturing industry grew by 7.1 percent in the first half of 2011 compared to 7.2 percent during the same period in 2010. The growth is mainly

attributed to the Non-metallic mineral products; Fabricated metal products; and Paper & Paper Products sub-industries.

## Performance of manufacturing industry in the first half of 2011

PERIOD		Average Index Q1_Q2 2009	Average Index Q1_Q2 2010	Growth 2010/2009	Average Index Q1_Q2 2011	Growth 2011/2010
MANUFACTURING	TOTAL MANUFACTURING	119.3	127.85	7.2	137.0	7.1
	Food, Beverages & Tobacco	157.0	169.8	8.1	179.3	5.6
	Textile, Clothing & Leather	37.3	24.55	(34.3)	9.3	(62.1)
	Wood & Wood Products	224.9	254.7	13.3	268.5	5.4
	Paper & Paper Products	122.3	153.95	25.9	176.7	14.8
	Chemicals, Rubbers & Plastics	118.0	117.75	(0.2)	126.8	7.6
	Non-metallic Mineral Products	151.6	170.3	12.3	206.0	20.9
	Basic Metal Industries	83.5	82.55	(1.1)	81.3	(1.5)
	Fabricated Metal Products	68.5	78.2	14.1	92.7	18.5

Source: CSO, 2010 and 2011 Index of Industrial Production

The Non-metallic mineral products sub-industry grew by 20.9 percent in the first half of 2011 compared to a growth of 12.3 percent in the first half of 2010, representing an increase of 8.6 percentage points, mainly on account of increased production of cement and lime. The fabricated metal products sub-industry grew by 18.5 percent compared to a growth of 14.1 recorded in the first

half of 2010. In this sub-industry, output grew on account of increased production of steel, door and window frames, bolts and nuts.

On the other hand, the Textiles, clothing and leather industries; and the Basic metal products recorded declines in output of 62.1 percent and 1.5 percent, respectively, in the period under review.

## Performance of the Electricity Industry

Electricity generation grew by 11.2 percent in the first half of 2011 compared to the same period in 2010. In the first half of 2011, a total of 5,993,000 KWh of

electricity was generated compared to 5,388,123 KWh generated during the same period in 2010.

### Production of Electricity in KWh, 2010 – 2011

	2010			2011			% Change 2011 /2010
