

Central Statistical Office

Volume 99 Website: www.zamstats.gov.zm June, 2011

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi
Acting Director of Census and Statistics

30th June, 2011

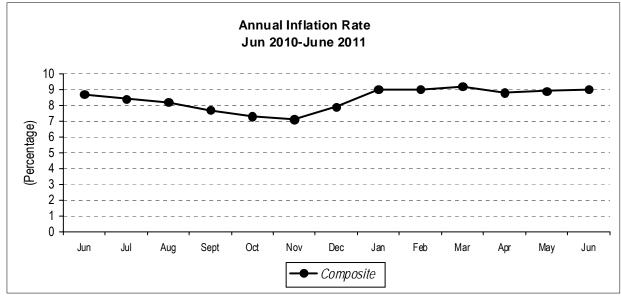

Inside this Issue

- June Inflation slightly increases to 9.0 percent
- May 2011 records Trade Surplus
- Economic Growth in the FNDP Period
- 2009 Formal Sector Employment
- Update on the 2010 Census of Population and Housing!
- Selected Socio -Economic Indicators

INFLATION

June Inflation slightly increases to 9.0 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), slightly increased to 9.0 percent in June 2011, from 8.9 percent in May 2011. The increase is attributed to increases in some food prices.

INTERNATIONAL MERCHANDIZE TRADE

May 2011 records Trade Surplus

Zambia recorded a trade surplus valued at K774.8 billion in May 2011, representing a nominal increase in growth of about 29.9 percent from K1,105.4 billion recorded in April 2011. This means that the country exported more in May 2011 than it imported, in the same month, in nominal terms.

Since January 2011, the country has had monthly trade surpluses with the highest valued at K1,484.3 billion recorded in January 2011 and the lowest in February 2011, valued at K645.2 billion.

Exports by Major Product Categories May and April 2011

Zambia's major export products in May 2011 were from the Intermediate goods category (mainly comprising copper cathodes and sections of refined copper and copper blister) accounting for 86.8 percent. Other exports were from the Consumer goods, Raw materials and Capital goods categories; which

collectively accounted for 13.3 percent of total exports in May 2011. This implies that between May and April 2011, the country has been a net exporter of Intermediate goods, mainly Metals and their articles, accounting for an average of 89.1 percent of the total exports.

Zambia's Major Export Destinations by Product in May 2011

Zambia's major export destination in May 2011 was Switzerland, which accounted for 56.3 percent. The major export products to Switzerland were; Cathodes & Sections of Cathodes of refined Copper accounting for about 78.0 percent.

China was the second major export destination of Zambia's total exports accounting for 14.6 percent. The major export products to China were Copper blisters (47.1 percent); and Cathodes & sections of cathodes of refined copper (26.8 percent).

South Africa was the third major export destination of Zambia's exports accounting for 9.9 percent. The main export products to South Africa were Cathodes and sections of cathodes of refined copper (39.1 percent); and Wire of refined copper, maximum cross-sectional dimension >6mm, contributing

about 15.5 percent to the country's share of exports.

The Democratic Republic of Congo was the fourth major export destination of Zambia's exports, accounting for 4.3 percent. The main export products to the Democratic Republic of Congo were Sulphuric Acid; and Sulphur, sublimed or precipitated; colloidal sulphur, accounting for 15.8 and 11.9 percent, respectively.

The United Kingdom was the fifth major export destination of Zambia's total exports accounting for 3.1 percent. The major export products to the United Kingdom were Cathodes & Sections of Cathodes of refined copper, accounting for about 94.2 percent.

These five countries collectively accounted for 88.2 percent of Zambia's total export earnings in May 2011.

Export Market Shares by Regional Groupings, May and April 2011

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's total exports, accounting for 21.9 percent in May 2011. Within SADC, South Africa was the dominant market in May and April with 45.3 and 66.8 percent 2011 respectively. Congo (DR) was second in both May and April 2011 with 19.7 and 16.3 percent, respectively. Other notable markets were Namibia, Zimbabwe and Mauritius.

Asia was the second largest market for Zambia's total exports, accounting for 17.0 percent in May 2011. Within Asia, China was the dominant market in both May and April 2011 with 86.0 and 95.5 percent, respectively. Saudi Arabia was the second dominant market in May 2011 with 8.4 percent. Other notable markets were India and Hong Kong.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest market for Zambia's total exports accounting for 9.8 percent in May 2011. Within COMESA, Congo (DR) was the dominant market with 43.8 percent in May 2011 and 50.3 percent in April 2011. Zimbabwe was the second dominant market in both May and April 2011 with 21.4 and 25.2 percent, respectively. Other notable markets were Mauritius, Malawi and Kenya.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 3.7 percent in May 2011. Within the EU, the United Kingdom was the dominant market with 82.0 and 68.8 percent in May and April 2011, respectively. Luxembourg was the second dominant market in May 2011 with 9.1 percent. Other notable markets were Netherlands and Germany.

Zambia's Major Import Sources by Product, May 2011

The major source of Zambia's imports in May 2011 was South Africa, accounting for 33.0 percent. The major import products from South Africa were Crushing or grinding machines for earth, stone, ores; and Mineral or chemical fertilizers with nitrogen, contributing 4.6 and 2.0 percent, respectively to the share of imports.

The second main source of Zambia's imports in May 2011 was Congo (DR)

accounting for 22.1 percent of the total value of imports. The major import products from Congo (DR) were Copper ores and concentrates, accounting for 80.1 percent.

Other notable sources of Zambia's imports were China, the United Arab Emirates and India, collectively accounting for 17.4 percent of Zambia's total imports in May 2011.

Import Market Shares by Regional Groupings, May and April 2011

Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 60.6 percent in May 2011. Within the SADC regional grouping, South Africa was the major source of Zambia's imports with 54.4 percent in May 2011 and 54.5 percent in April 2011. Congo (DR) was the second major source of Zambia's imports with 36.4 and 38.6 percent in May and April 2011, respectively. Other notable markets were Botswana, Zimbabwe and Tanzania.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the second largest source of Zambia's imports accounting for 25.3 percent in May 2011. Within COMESA, Congo (DR) was the main source of Zambia's imports in both May and April

2011 with 87.4 and 87.7 percent, respectively. Other notable sources were Zimbabwe, Kenya, Egypt and Malawi.

Asia was the third largest source of Zambia's imports accounting for 24.2 percent in May 2011. Within Asia, China was the dominant source of Zambia's imports in both May and April 2011 with 35.1 and 26.4 percent, respectively. Other notable markets were the United Arab Emirates, India, Kuwait and Japan.

The European Union (EU) was the fourth largest source of Zambia's imports accounting for 10.1 percent in May 2011. Within the EU, the United Kingdom was the major source of Zambia's imports accounting for 28.4 and 30.3 percent in May and April 2011, respectively. Other notable markets were Sweden, Finland, Ireland and Germany.

GROSS DOMESTIC PRODUCT

Economic Growth in the FNDP Period

According to the final estimates of Gross Domestic Product (GDP) for 2010, the Zambian economy grew by 7.6 percent in 2010 compared to a growth of 6.4 percent in 2009. This growth was driven by increased output in Mining and Quarrying; Transport and Communications; and Agriculture, Forestry and Fishing.

During the period of the Fifth National Development Plan (FNDP), Zambia's annual economic growth averaged 6.4 percent. This is slightly below the annual average target of 7 percent set out in the FNDP.

Growth in the Primary Sector, which consists of the Agriculture, Forestry and Fishing industry as well as the Mining and Quarrying industry, grew from 4.1 percent in 2006 to 10.2 percent in 2010. The Mining and Quarrying industry was the main source of growth in this sector. The mining and quarrying industry grew by an annual average of 9.8 percent during 2006-2010. The sustained growth is mainly due to increased copper output.

The Agriculture, Forestry and Fishing industry grew by an annual average of 3.8 percent during 2006-2010, with strong growth in 2009 and 2010. This is due to higher crop output, which resulted in the recording of unprecedented maize output in the 2009/2010 agriculture season of 2.8 million metric tonnes.

The period average growth in the Secondary Sector, which consists of Manufacturing, Electricity and Water Supply and Construction, was 7.4 percent. Construction was the main source of growth, averaging a growth of 12.1 percent in the period under review. This is mainly due to increased building and construction activities at corporate and household levels.

The Electricity and Water Supply and the Manufacturing industries grew by an average of 4.9 percent and 3.4 percent, respectively, during the period 2006-2010.

The Tertiary Sector grew by an annual average of 6.3 percent during the period 2006-2010. The Transport and Communications industry had the highest contribution to GDP which averaged 15.9 percent during the period 2006-2010. The strong growth is mainly due to the sustained growth in the Telecommunications sub-industry as well as the Road Transport sub-industry.

Levels of Gross Domestic Product (GDP)

Zambia's current price GDP rose from K38,560.8 billion in 2006 to K77,666.6 billion in 2010. In US dollar terms, the economy grew from US\$ 10.7 billion in 2006 to

US\$16.2 billion in 2010. GDP per capita has also increased from US\$907.3 in 2006 to US\$1,241.0 in 2010.

Structure of the Economy

The GDP at current prices depicts the structure of the economy. The Services Sector accounted for 46.3 percent of the total GDP in the period 2006-2010. This was followed by the Secondary Sector which accounted for 28.6 percent of the total GDP. The Primary Sector accounted for 23.9 percent of the total GDP.

Within the Tertiary Sector, the Wholesale and Retail Trade industry accounted for the largest share, followed by the Community, Social and Personal Services, and the Financial Institutions and Insurance industry. The share of GDP in this sector declined slightly from 47.4 percent in 2006 to 45.5 percent in 2010. Within the Secondary Sector, Construction had the largest share,

followed by Manufacturing. Electricity and Water Supply had the lowest share of GDP in this sector. The share of GDP in the Secondary sector increased from 25.6 percent in 2006 to 31.8 percent in 2010.

Within the Primary Sector, Agriculture, Forestry and Fishing accounted for the larger share compared to Mining and Quarrying. The structure of the primary sector did not change much in the period under review.

With the increase in subsidies, especially to the agriculture sector, the share of Taxes less Subsidies on Products has reduced from 7.4 percent in 2006 to 3.9 percent in 2010.

Source: CSO, Employment and Earnings Inquiry

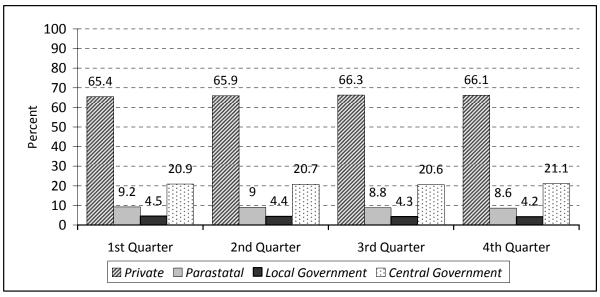

Formal Sector Employment by Sector

The results also show that the Private sector accounted for an average of 65.9 percent of workers in the formal sector in 2009. Between first quarter and second quarter, the number of workers increased by 2.5 percent from 431,575 to 442,378. It increased further to 449,057 workers in the third quarter and to 452,564 workers in the fourth quarter.

The Central Government accounted for an average of 20.8 percent of workers in the formal sector in 2009. This has shown an increase from the first to the fourth quarter. Between first quarter and second quarter, the number of workers increased by 0.8 percent from 138,092 workers to 139,234 workers. It increased further to 139,691 workers in the third quarter and to 144,564 workers in the fourth quarter.

Local Government accounted for an average of 4.4 percent of workers in the formal sector. There was a reduction of 0.5 percent between the first and second quarter from 29,394 to 29,252 workers. Furthermore, a reduction of 1.4 percent was recorded between the second and third quarter from 29,252 to 28,831 workers. However, the number of workers increased by 0.1 percent from 28,831 workers to 28,861 workers between third quarter and fourth quarter.

Source: CSO, Employment and Earnings Inquiry

The Parastatal or quasi-government institutions accounted for an average of 8.9 percent of workers in the formal sector. Over the year, the number of workers in the sector reduced from 60,521 in the first quarter to 58,536 workers in the fourth quarter. Between the first quarter

and second quarter, the number of workers decreased by 0.2 percent from 60,521 to 60,382 workers. Furthermore, there was a reduction of 1.2 percent between the second quarter and third quarter from 60,382 to 59,664 workers.

Formal Sector Employment by Industry

The Agriculture, forestry and fishing industry accounted for an average of 12.1 percent of the formal sector employment in 2009. Between first quarter and second quarter, Agriculture, forestry and fishing industry recorded a 5.2 percent increase in the number of workers from 76,901 to 80,906. In the third quarter, the number of workers increased by 2.6 percent from 80,906 in the second quarter to 82,980. At the close of 2009,

Agriculture, forestry and fishing industry had 84,033 workers, an increase of 1.3 percent from the third quarter.

Financial and insurance activities industry accounted for an average of about 4 percent of the formal sector employment. In the first quarter, it recorded 19,437 workers and increased to 23,518 workers in the second quarter. Between second and third quarter, the

number of workers in the industry increased by 10 percent from 23,518 workers in the second quarter to 25,862 workers in the third quarter. The industry

further experienced another increase of 4.8 percent between third and fourth quarter.

Community, Social and Personal Services Industry accounted for an average of 43 percent of the formal sector employment. The number of workers increased by 0.6 percent, from 286,497 workers in the first quarter to 288,176

workers in the second quarter. Between third and fourth quarters, the number increased by 1.4 percent from 288,326 workers in the third quarter to 292,465 workers in the fourth quarter.

2010 Census of Population and Housing

Update on the 2010 Census of Population and Housing!

Zambia successfully undertook the 2010 Census of Population and Housing. The data collection exercise commenced mid October 2010 and came to an end mid November 2010. Immediately after data collection, CSO embarked on the task of processing the census preliminary figures whose results were disseminated in February this year. The Census preliminary report is available on the CSO website as well as in hard copy format obtainable from the CSO offices. The preliminary report was summarized from the summary count data compiled from the Census questionnaires immediately after the census data collection in the field. The data capture for the summary count was done in the Districts.

For the 2010 census data capture from the questionnaires, CSO is using the combined Intelligent Character Recognition (ICR) and Optical Character Recognition (OCR) scanning technology in its data capturing process. The main aim of employing this technology is to cut down on the time spent on capturing data using computers.

The complete suite of the data capturing system was obtained from a United Kingdom (UK) firm called Data Research Services (DRS) with the support of the UK Department of International Development (DFID). The data capturing process commenced on 30th March 2011 and is expected to be completed by mid August 2011.

The data capturing process involves the scanning of census questionnaires as well as character correction, the process that ensures that all the captured characters are correctly recognized by the system. So far, data for five (5) provinces out of the nine (9) provinces of Zambia has been successfully captured and currently data for the sixth province is being captured.

Alongside the data capturing process, a team of CSO Information Technology (IT) staff and various Subject Matter Specialists, managed to develop a draft edit and imputation specifications document. This task was accomplished with the technical assistance offered by the United States (U.S) Census Bureau. This document was produced using data for the provinces that have been completely captured. The final edit and imputation specification document is scheduled to be finalized after all the data has been captured. CSO expects to have the final population figures of the 2010 Census using clean census dataset by December 2011.

LAY MAN and STATISTICS

1. Special Trade System

The special trade type records flows of goods as trade statistics only when they are cleared into or from the free circulation area.

2. General Trade System

The general trade type records flows of goods as trade statistics when they cross the boundary of the customs territory.
