

Central Statistical Office

Volume 86 Website: www.zamstats.gov.zm May, 2010

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

- Selected Socio-Economic Indicators

Zambia Expected to Produce Highest Quantity of Maize ever!

The 2009/2010 Crop Forecasting Survey (CFS) results show that production of Maize is expected to increase by 48.1 percent from 1,887,010 metric tonnes during the 2008/2009 agricultural season to 2,795,483 metric tonnes during the 2009/2010 agricultural season. The results also show that area planted to maize increased by 10.4 percent from 1,125,466 hectares to 1,242,268 hectares. Furthermore, area harvested to maize is expected to increase by 18.5 percent from 911,492 hectares during the 2008/2009 agricultural season 1,080,558 hectares during the 2009/2010 agricultural season.

The average yield rate of maize per hectare is also expected to increase from

1.7 metric tonnes per hectare in 2008/2009 agricultural season to 2.3 metric tonnes per hectare in 2009/2010 agricultural season. This represents a 34.2 percent increase.

The increase in maize production in the 2009/2010 agricultural season could largely be attributed to the good price farmers received last season and the adequate rains in most parts of the country. In addition, more farmers reported using hybrid seed than recycled or local seed this agricultural season compared to the 2008/2009 agricultural season.

At provincial level, the highest maize yields are expected to be recorded in Central province at 3.0 metric tonnes per hectare, where as the lowest yields are expected to be recorded in

Western Province at 1.0 percent. All the provinces are expected to record increases in yields compared to the previous season.

INFLATION

Inflation declines to 9.1 percent in May 2010

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), reduced slightly to 9.1 percent in May 2010 from 9.2 percent in April, 2010. The decline is attributed to the decrease in some food prices.

The recent increase in fuel prices will be reflected in the June 2010 Consumer Price Index (CPI).

Changes in annual inflation rates for CPI Main Groups

Between April 2010 and May 2010, the annual inflation rates declined for food, beverages and tobacco; clothing and footwear; household fuel and lighting; furniture and household goods; as well as

other goods and services. The annual inflation rates increased for medical care; transport and communication; and recreation and education.

The annual food inflation rate

The annual food inflation rate was recorded at 6.5 percent in May 2010. This is a decline from 7.3 percent in April 2010.

Non-food inflation

The annual non-food inflation rate was recorded at 11.6 percent in May 2010. This is an increase from 11.2 percent in April 2010.

Zambia's Metal Exports and Non-Traditional Exports (NTEs) April 2010 and March 2010

There has been a gradual increase in the total value of exports between April and March 2010. The country's ever dominant metal products recorded a higher value in revenue growth of 5.1 percent in nominal terms, between April and March 2010. This could be attributed to, among other factors, the favourable metal prices on the International market. The overall

contribution of metal products to the total export earnings was 88.0 and 82.1 percent in April and March 2010, respectively.

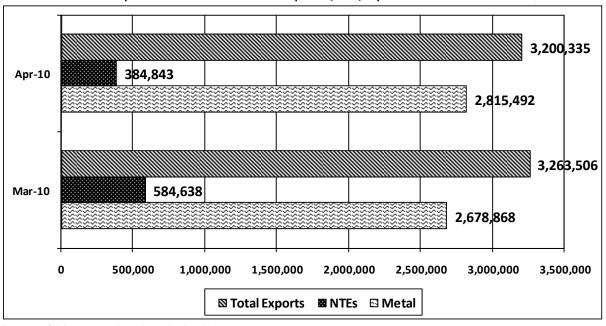

In terms of percentage contribution to the total exports earnings, NTEs recorded 12.0 and 17.9 percent in April and March 2010, respectively. Zambia's Metals Exports and Non-Traditional Exports (NTEs) April 2010* and March 2010, K'Million.

Zambia's Major Export Destinations by Product in April 2010

The five major destinations of Zambia's exports in April 2010 were Switzerland (55.7 percent), China (20.5 percent), United Arab Emirates (6.0 percent), South Africa (5.5 percent) and Democratic Republic of Congo (3.4 percent). These five countries collectively accounted for 91.1 percent of Zambia's total export earnings.

Zambia's major export destination was Switzerland accounting for 55.7 percent. The major export products to Switzerland were Cathodes & sections of cathodes of refined copper (50.1 percent); Copper ores & concentrates (26.2 percent); Plates, sheets and strips of refined copper uncoiled (10.3 percent); and Cobalt ores and concentrates (9.2 percent).

China was the second largest destination of Zambia's total exports accounting for 20.5 percent. The major export products were Cathodes & sections of cathodes of refined copper (53.3 percent); Copper blister (29.2 percent); Plates, sheets and strip, of refined copper, uncoiled (7.8 percent); Copper (excl. Master) alloys, nes, unwrought (6.2 percent) and Master alloys of copper (1.3 percent).

Zambia's third major export destination was the United Arab Emirates with 6.0 percent. The major export products to

the United Arab Emirates were Cathodes and sections of cathodes of refined copper at 100 percent.

South Africa was the fourth largest destination of Zambia's total exports accounting for 5.5 percent. The major export products were Wire of refined copper, maximum cross-sectional dimension >6mm (27.8 percent); Other: articles of cobalt, nes (25.5 percent); Electric conductors, nes, for a voltage <=80 v (9.2 percent); Cobalt ores and concentrates (3.8 percent) and Wire of

refined copper, maximum cross-sectional (3.8 percent).

The Democratic Republic of Congo was the fifth largest destination of Zambia's total exports accounting for 3.4 percent. The major export products were Portland cement (excl. white (12.4 percent; Raw cane sugar, in solid form (11.4 percent); Wheat or meslin flour (6.4 percent); other mixtures with basis of odoriferous subst.inc (5.2 percent) and Sulphuric acid; oleum in bulk, (5.1 percent).

Export Market Shares by Regional Groupings, April 2010 and March 2010

Asia was the largest market for Zambia's total exports, accounting for 26.7 and 30.7 percent in April and March 2010, respectively. Within Asia, China was the dominant market with 76.7 percent in April and 82.5 percent in March 2010. The United Arab Emirates was second with 22.3 percent in April 2010, while it was third in March 2010 with 5.3 percent. The Republic of Korea was the third dominant market in the month of April 2010 with 0.6 percent, while it was second in March 2010 with 11.4 percent. Other notable markets were India and Hong Kong.

Southern African Development Community (SADC) regional grouping was the second largest market for Zambia's total exports accounting for 11.5 and 24.0 percent in April and March 2010, respectively. Within SADC, South Africa was the dominant market in April and March 2010 with 48.1 and 69.0 percent, respectively. Congo DR was the second dominant market with 29.9 and 18.6 percent in April and March 2010, Other key markets were respectively. Zimbabwe, Malawi, Namibia and Botswana.

The Common Market for Eastern and Southern Africa (COMESA) grouping of

countries was the third largest market for Zambia's total exports accounting for 7.0 and 7.2 percent, in April and March 2010, respectively. Within COMESA, Congo DR was the dominant market in both months with 49.5 and 61.9 percent in April and March 2010, respectively. Egypt was the second dominant market with 14.8 percent in April 2010, while Zimbabwe was second in March 2010 with 16.9 percent. Other notable markets were Malawi and Kenya.

The European Union (EU) was the fourth largest market for Zambia's total exports accounting for 4.1 and 3.6 percent of Zambia's total exports in April and March 2010, respectively. Within the EU market, the United Kingdom was the dominant market with 53.9 and 49.0 percent in April 2010, and March respectively. Luxembourg was second with 12.3 percent in April 2010, while Belgium was second in March 2010, with 32.9 percent. The Netherlands was the third largest market with 11.2 and 13.0 percent in April and March 2010, respectively. Other notable markets were Sweden, Germany and Italy.

Total Exports by Major Ports of Exit, April 2010 (K' million)

Zambia's six major ports of exit for exports in April 2010 were Ndola, Chirundu, Kitwe, Livingstone, Nakonde and Kapiri Mposhi port offices. Ndola port office was the major port of exit in April 2010 with 30.4 percent of Zambia's total exports. This is attributed to the copper and cobalt that are mainly exported through the Ndola Port. Chirundu was the second major

port of exit with 23.4 of Zambia's total exports in April 2010.

Kitwe port was third with 14.0 percent. It was followed by Livingstone (8.2 percent); Nakonde (7.4 percent), and Kapiri-Mposhi (7.2 percent). These six ports collectively accounted for 90.6 percent of Zambia's total exports.

Zambia's Major Import Sources by Product, April 2010

The major source of Zambia's imports in April 2010 was Congo (DR) accounting for 30.5 percent. The major import products from Congo (DR) were Copper ores and concentrates (24.3 percent); Cobalt ores and concentrates (15.7 percent); Cobalt oxides and hydroxides; commercial cobalt oxides (4.3 percent). Other notable imports were Mobile drilling derricks and Chemical products & residual products of chemicall.

The second main source of Zambia's imports in April 2010 was South Africa

accounting for 30.1 of the total value of imports. The major import products from South Africa were: Urea (3.7 percent); Other fertilizers, nes (3.5 percent); Parts of machinery of 84.26, 84.29 and 84.30, nes (2.0 percent); and Parts of pumps for liquids (2.0 percent).

Other notable sources of Zambia's imports were Kuwait, China and United Arab Emirates, collectively accounting for 16.0 percent of Zambia's total imports in April 2010.

Import Market Shares by Regional Groupings, April and March 2010

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 64.5 and 58.6 percent in April and March 2010, respectively. Within the SADC region, Congo (DR) was the major source of Zambia's imports in April 2010 accounting for 47.3 percent, while it was second in March 2010 with 41.9 percent. South Africa was the second major source of Zambia's imports with 46.7 percent in April 2010, while it was first in March 2010 with 52.2 percent. Other key market sources were Tanzania, Zimbabwe, Malawi and Mozambique.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the second largest source of Zambia's imports accounting for 34.1 percent in April 2010. Within COMESA, Congo (DR) was the main source of Zambia's imports with 89.6 and 88.6 percent in April and March 2010, respectively. Zimbabwe was the second largest market with 4.5 and 4.7 percent in April and March 2010, respectively. Other

notable sources were Kenya, Egypt and Malawi.

Asia was the third largest market for Zambia's imports accounting for 22.2 percent in April 2010. Within Asia, Kuwait was the dominant market in April and March 2010 with 43.7 and 58.3 percent, respectively. China was the second largest market with 15.0 and 13.6 percent in April and March 2010 respectively. Other notable markets were United Arab Emirates, India and Japan.

The European Union (EU) was the fourth largest source of Zambia's imports with 7.0 percent in both April and March 2010, respectively. Within the EU, the United Kingdom was the major source of Zambia's imports accounting for 23.7 and 24.1 percent in April and March 2010, respectively. Germany was the second dominant market with 17.9 percent in April 2010 and 17.1 percent in March 2010. Other key markets were Ireland, Finland, Sweden, Austria, Italy, Germany, and Italy.

2009 Zambia Sexual Behaviour Survey results

HIV testing has tremendously increased!

The 2009 Zambia Sexual Behaviour Survey results show that 46.1 percent of respondents have been tested for HIV an increase of 32.9 percentage points from 13.2 in 2005. There were notable

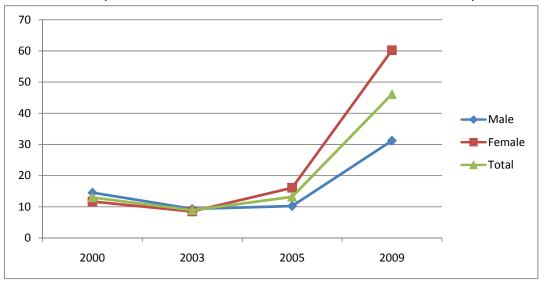

differences by residence and sex. More people in urban than rural areas reported that they had been tested for HIV. Furthermore, nearly twice as many females than males had tested for HIV.

Percent distribution of persons who have tested for HIV, Zambia Sexual Behavior Report, 2009

Background characteristics	2000	2003	2005	2009
Total	13.0	8.9	13.2	46.1

Percent distribution of persons who have tested for HIV, Zambia Sexual Behavior Report, 2009

Source: 2009 Zambia Sexual Behaviour Survey

Survey results also show that HIV testing among pregnant women has dramatically increased from 12.7 percent in 2005 to 67 percent in 2009. A

comparison of rural and urban areas shows that testing for HIV has consistently been higher in urban than rural areas.

CENSUS SCHEDULED FOR OCTOBER 2010!

The Census of Population and Housing is carried out under the provisions of the Census and Statistics ACT Chapter 127 of the laws of Zambia. Under this ACT the Central Statistical Office is mandated to carry out a Census of Population and Housing every ten years. The first comprehensive census was carried out in 1969. Since then, three more censuses have been carried out, in 1980, 1990 and 2000. The next census will be carried out this year (2010).

Under this ACT, all persons residing in Zambia, except foreign diplomats accredited to Zambia are required to provide the necessary information.

WHAT IS A CENSUS?

A Census of Population and Housing is defined as the total process of collecting, compiling, evaluating, analyzing and publishing demographic, economic and social data pertaining, at a specified time or times, to all persons in a designated area or the whole country. It is the primary source of information about the population of a country. It is undertaken at regular intervals, usually after ten years.

WHY HOLD A CENSUS?

The main objective of conducting a Population Census is to enumerate all the people in the country in order to provide the Government, private organizations, individuals, and other stakeholders with the number of persons in each district, township, locality, village, etc., according to age, sex, and other characteristics. For every aspect of planning, it is essential to know the size, structure and distribution of the population of a country. For instance, to plan for education, the country needs to have numbers of the school going population by sex and age.

CENSUS ACTIVITIES

Being a huge undertaking, the census encompasses various activities for its success. These include pre census, census and post census activities. Pre census activities include census mapping, pilot census, formation of committees to coordinate all aspects of the census, publicity, stakeholder consultations, recruitment and procurement.

The pilot census is carried out on sample basis to test the methodology of the census including questionnaire suitability, logistical arrangements, mapping, staffing and other resource requirements. The main census involves collection of data on all persons in the country. The post census activities include Post Enumeration Survey, data processing and analysis, report writing and dissemination.

CENSUS MAPPING

One of the most important activities that the office carries out before a census is the census mapping exercise. The objective of this exercise is to delineate the country into enumeration areas (EAS) to ensure that there is no duplication or omission of persons or households during the Census.

A census mapping is also undertaken in order to:

- Determine the location of the population in advance of the census enumeration in order to make possible the recruitment, training and allocation of a sufficient number of enumerators to ensure that census enumeration is completed in time without omissions or duplications;
- Establish the framework for sample surveys prior to, during or after census enumeration;
- Enable the Central Statistical Office to provide results of the census for areas whose locations are known.

The 2010 census mapping strategy has involved the use of the Global Positioning System (GPS) in rural areas and satellite imagery in major and small urban areas to delineate enumeration areas. The GPS is a modern tool that enables collection of precise geo codes. So far, 69.4 percent of wards in the county have been mapped.

PILOT CENSUS

The Pilot Census was conducted in February, 2010. Two districts were selected from each of the provinces except for Central, Copperbelt and Lusaka where three districts were selected from each. Both rural and urban districts were selected in each province. In each of the selected districts, mapped and unmapped areas were selected. This was done in order to have a "feel" of enumeration in rural and urban areas; and in mapped and unmapped areas, even when it is anticipated that mapping will be completed at the time of enumeration.

HELP THE CENSUS HELP YOU. BE COUNTED!
