Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Zambia's Metal Exports and Non-Traditional Exports (NTEs) January 2010 and February 2010

There has been a gradual increase in the total value of exports between January and February 2010. The country's ever dominant metal products recorded a higher value in revenue growth of 5.7 percent in nominal terms, between January and February 2010. This could be attributed to, among other factors, the fluctuating metal prices on the International market. The overall contribution of metal products to the total exports earnings was 83.9 and 83.1

percent in February 2010 and January 2010, respectively.

Non-Traditional exports recorded a moderate increase of export earnings of 25.6 percent in February 2010. In terms of percentage contribution to the total exports earnings, NTEs recorded 16.1 and 13.9 percent in February and January 2010, respectively.
