The Monthly

Central Statistical Office

Volume 79

Website: www.zamstats.gov.zm

October, 2009

Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Ms. Efreda Chulu
Director of Census and Statistics

Serving Your Data Needs

Inside this Issue

- CSO Celebrates the 2009 African Statistics Day!
- Inflation declines from 13.0 percent in September 2009 to 12.3 percent in October 2009
- September 2009 Records Trade Surplus
- Economy expected to grow by 6.3 Percent
- Industrial output up in the first Half of 2009
- Layman and Statistics
- Selected Socio-Economic Indicators

CSO Celebrates the 2009 African Statistics Day!

The Government of the Republic of Zambia through the Central Statistical Office (CSO) will be commemorating the 2009 African Statistics Day on the 18th of November, 2009.

The theme for this year's celebration is **"STRENGTHENING CIVIL REGISTRATION AND VITAL STATISTICS SYSTEM IN SUPPORT OF NATIONAL DEVELOPMENT AND MDGs IN AFRICA"**

November 18th was adopted in May 1990 by the United Nations Economic Commission for Africa (UNECA) Conference of African Ministries responsible for Economic planning and Development to be celebrated each year in order to "increase public awareness about the important role which statistics play in all aspects of social and economic life" of our countries and continent.

This day represents an opportunity for CSO to share with policy makers and the public at large, results from some of its statistical programs. During this years' commemoration, CSO shall launch the National Data Archive (NADA) system that it has adopted, and the National Strategy for the Development of Statistics (NSDS) and also disseminate latest statistical findings.

Join us in commemorating this years' African Statistics Day which will fall on 18th November, 2009.

**Remember: *Statistical information is key
to National Development***

INFLATION

Inflation declines from 13.0 percent in September 2009 to 12.3 percent in October 2009

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), declined by 0.7 of a percentage point from 13.0 percent in September, 2009 to 12.3

percent in October, 2009. The decline of 0.7 of a percentage point in the annual inflation rate in October 2009 was as a result of decreases in some food prices.

Changes in annual inflation rates for CPI Main Groups

Between October 2008 and October 2009, the annual inflation rates increased for clothing and footwear; rent, fuel and lighting; medical care; recreation and education; and other goods and services. The annual inflation rate

reduced for food, beverages and tobacco; furniture and household goods; and transport and communication.

The annual food inflation rate

The annual food inflation rate was recorded at 12.3 percent in October 2009. This is a decline from 13.9 percent in September 2009. Contributing most to the decline in food inflation were decreases in the cost of white breakfast meal, fresh vegetables, dried fish, dried kapenta, dressed chicken, cooking oil, and milk products.

However, increases were recorded in the cost of white roller meal, maize grain, meat, dried beans, sweet potatoes, alcoholic drinks, table salt, and other processed food products.

Non-food inflation

The annual non-food inflation was recorded at 12.3 percent in October 2009. This is a marginal increase from 12.1 percent in September 2009.

Zambia's Major Exports Classified by Harmonized Coding System (HS), September 2009

Zambia's major export product in September 2009 was Copper and articles thereof accounting for 62.0 percent of the total export earnings. Other export products were:

Ores, slag and ash (13.0 percent); Boilers, machinery & mechanical appliances (3.7 percent); Sugar and sugar confectionery (3.3 percent); and Tobacco & manufactured

tobacco substitutes (2.5 percent). These five product categories collectively accounted

for 84.5 percent of Zambia's total export earnings for September 2009.

Zambia's Major Export Destinations by Product in September 2009

The five major destinations of Zambia's exports in September 2009 were Switzerland (46.5 percent), South Africa (12.7 percent), China (11.0 percent), Democratic Republic of Congo (9.4 percent) and the United Kingdom (2.9 percent). These five countries collectively accounted for 82.5 percent of Zambia's total export earnings.

Zambia's major export products to Switzerland were Cathodes and sections of cathodes of refined copper; and Plates, sheets and strip of refined copper accounting for 51.8 and 24.3 percent, respectively. Other export products were Refined copper, nes, and unwrought copper blister (12.2 percent); Copper ores & concentrates (7.1 percent); Other articles of cobalt (2.0 percent); and Cotton not carded or combed (1.2 percent).

South Africa was the second largest destination accounting for 12.7 percent of Zambia's total exports. Major export products to South Africa were Cobalt ores and concentrates (20.7 percent); Copper ores and concentrates (percent 17.6); Wire of refined copper (14.3 percent); Raw cane sugar, in solid form (10.0 percent); Semi-manufactured gold (incl. gold plated) (9.9 percent); Cathodes and sections of cathodes of refined copper (8.9 percent); and Electric conductors, nes (4.2 percent).

China was the third largest destination of Zambia's total exports accounting for 11.0 percent. The major export products were refined copper, nes, unwrought, copper blister (56.0 percent); and Plates, sheets and strips, of refined copper (13.7 percent). Other notable products were: Cobalt ores and concentrates (12.5 percent); Other articles cobalt, nes (9.1 percent); Cathodes and sections of cathodes of refined copper (4.8 percent); and Cotton, not carded or combed (2.8 percent).

The Democratic republic of Congo was the fourth largest destination of Zambia's total exports accounting for 9.4 percent. The major export products were: Parts of machinery nes (28.8 percent); Raw cane sugar, in solid form (8.9 percent); Articles of vulcanized rubber of cellular rubber (6.2 percent); Portland cement (excl. white) with 5.0 percent; and Wheat or meslin flour (4.4 percent).

Zambia's fifth largest export destination was the United Kingdom with 2.9 percent. The major export products to the United Kingdom were Refined copper, nes, unwrought copper blister (62.9 percent); Plates, sheets and strip, of refined copper (14.9 percent); Mixtures of frozen vegetables (12.0 percent); Coffee, not roasted or decaffeinated (3.7 percent); and Precious or semi-precious stones, worked but not sorted (2.7 percent).

Export Market Shares by Regional Groupings, September and August 2009

The Southern African Development Community (SADC) regional grouping was the largest market for Zambia's exports accounting for 28.1 and 26.8 percent in September and August 2009, respectively. Within SADC, South Africa was the dominant market in September 2009 with 45.2 percent while Congo DR was dominant in August 2009 with 49.0 percent. Congo DR was the second dominant market in September 2009 with 33.6 percent while South Africa was second in August 2009 with 23.6 percent. Other key markets were Malawi, Zimbabwe, Tanzania and Mauritius.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the second largest market for Zambia's exports in September and August 2009 accounting for 16.1 and 22.8 percent, respectively. Within COMESA, Congo DR was the dominant market in September and August 2009, with 58.6 and 57.7 percent, respectively. Malawi was the second dominant market with 13.2 percent in September 2009 while Egypt was the second dominant market in August 2009 with 22.8 percent. Other key markets were Zimbabwe and Mauritius.

Asia was the third largest market for Zambia's exports in September and August 2009 accounting for 14.5 and 12.4 percent, respectively. Within Asia, China was the dominant market in both months with 75.6 percent in September and 79.6 percent in August. India was the second dominant market with 5.6 percent in September 2009 while Malaysia was the second dominant market in August 2009 with 5.6 percent. Other notable markets were Pakistan, Saudi Arabia, and The United Arab Emirates.

The European Union (EU) was the fourth largest market for Zambia's exports accounting for 8.7 and 5.0 percent of Zambia's total exports in September and August 2009, respectively. Within the EU market, the United Kingdom was the dominant market with 33.5 and 62.4 percent in September and August 2009, respectively. Belgium was second with 31.9 percent in September 2009 while Netherlands was second in August 2009 with 18.3 percent. Other notable markets were Luxembourg, Sweden and Germany.

Zambia's Major Import Sources by Product, September 2009

The major source of Zambia's imports in September 2009 was South Africa accounting for 43.7 percent of the total value of imports. The major import products were Ammonium nitrate; Other medicaments of mixed or unmixed products; Potassium chloride; Other fertilizers, nes; and Parts of machinery, collectively accounting for 18.7 percent.

The second main source of Zambia's imports in September 2009 was Congo (DR)

accounting for 14.2 percent. The major import products were Copper ores & concentrates; and cobalt ores and concentrates accounting for 70.3 percent.

Other notable sources of Zambia's imports were Kuwait, China and the United Kingdom collectively accounting for 18.0 percent of Zambia's total imports in September 2009.

Import Market Shares by Regional Groupings, September and August 2009

The Southern African Development Community (SADC) regional grouping was the largest source of Zambia's imports accounting for 63.4 and 61.6 percent in September and August 2009, respectively. Within the SADC region, South Africa was the major source of Zambia's imports accounting for 69.0 and 60.1 percent in September and August 2009, respectively. It was followed by Congo DR with 22.4 and 27.9 percent in both September and August 2009, respectively. Other key market sources were Tanzania, Zimbabwe, Mozambique and Botswana.

The Asian market was the second largest source of Zambia's imports accounting for 23.2 and 24.6 percent in September and August 2009, respectively. Within the Asian market, Kuwait was the major source of Zambia's imports accounting for 47.4 and 53.2 percent in September and August 2009,

respectively. Other notable sources were China, India, Japan and the United Arab Emirates.

The Common Market for Eastern and Southern Africa (COMESA) grouping of countries was the third largest source of Zambia's imports, accounting for 20.2 and 20.9 percent in September and August 2009, respectively. Within COMESA, Congo DR dominated as the main source of Zambia's imports with 70.2 and 82.1 percent in September and August, respectively. It was followed by Kenya with 14.4 and 8.4 percent in September and August 2009, respectively. Other notable sources were Zimbabwe, Egypt, Malawi and Swaziland.

The European Union (EU) was the fourth largest source of Zambia's imports with 8.2 and 9.8 percent in September and August 2009, respectively. Within the EU, The United Kingdom was the major source of Zambia's

imports accounting for 41.6 and 27.9 percent in September and August 2009, respectively. It was followed by Germany with 10.8 and 19.8 percent in September and August 2009,

respectively. Other key markets were Netherlands, Sweden, Belgium, Austria and Denmark.

NATIONAL ACCOUNTS

Economy expected to grow by 6.3 percent

Preliminary estimates of real Gross Domestic Product (GDP) show that the Zambian economy is expected to grow by 6.3 percent in 2009. This is due to expected strong growth in the Agriculture, Forestry and Fishing; Mining and Quarrying; and Construction industries.

In value terms, real GDP is expected to be K4,003.0 billion in 2009 compared to K3,765.4 billion in 2008. In nominal terms, the GDP is expected to increase to K64, 326.1 billion in 2009, from K55,078.8 billion in 2008.

Note: * Preliminary. The preliminary estimates will be revised when more comprehensive data are available.

Spurred by increased production of crops in the 2008/2009 agricultural season, the Agriculture, Forestry and Fishing industry is expected to grow by 7.1 percent in 2009, from 2.6 percent in 2008. The output of maize,

the country's main staple crop, is expected to reach 1.9 million metric tonnes from the 1.4 million metric tonnes produced in the 2007/2008 agricultural season.

Expected Crop Output from the 2007/2008 and 2008/2009 Crop Forecast Surveys (Metric Tonnes)

	2007/2008	2008/2009	% Change
<i>Maize</i>	1,445,655	1,888,773	30.7

Source: CSO/MACO Agriculture statistics

The Mining and Quarrying industry, which grew by 2.4 percent in 2008, is expected to post a growth of 15.8 percent in 2009. This is largely due to the increase in Copper output. The production of Copper is expected to reach 666,000 metric tonnes in 2009 compared to the 575,000 metric tonnes recorded in 2008. Coal production, which had ceased in the previous years, resumed in 2009 and is expected to contribute to the growth in the industry. Stone Quarrying output is also expected to increase.

The Construction industry is expected to rebound to double digit growth in 2009, growing by 15.5 percent compared to 8.7 percent recorded in 2008. The commissioning of a second cement plant by one of the main cement producers in the country has led to increased production and equally higher sales of the commodity. Cement is one of the main inputs in housing and commercial construction.

However, some of the industries in the services sector are expected to post declines and slower growths compared to last year.

The Hotels, Bars and Restaurants industry, which is largely driven by inbound tourism, is expected to decline by 14.5 percent in 2009 compared to the 5 percent growth realised in 2008.

Though the Transport and Communications industry is expected to post a marginal growth of 3.1 percent compared to the 15.8 percent growth in 2008, the Air Transport is expected to decline by 29.0 percent. However, the Communications is expected to grow by 12.0 percent in 2009 compared to a growth of 21.1 percent in 2008.

The Financial Institutions and Insurance industry is expected to grow by 5.0 percent in 2009 compared to 8.7 percent in 2008. The Community, Social and Personal Services industry is also expected to post a growth of 6.8 percent in 2009 which is lower than the 11.7 percent recorded in 2008.

INDUSTRIAL PRODUCTION

Industrial output up in the first Half of 2009

The total index of production has shown an increase of 10.8 percent in the first half of 2009 compared to an increase of 5.8 percent in the same period of 2008. The increase in

the total index is as a result of significant growths in the copper mining output and electricity generation.

MINING

There are three sub-categories under mining, namely, Coal, Non-ferrous Ores and Stone Quarrying. Overall, mining recorded an

increase of 17.0 percent in the first half of 2009 compared to an increase of 10.5 percent in the first half of 2008.

Quarterly Production of Copper, Cobalt and Coal in metric tonnes for 2008 and the first half of 2009 (Metric tonnes)

Source: CSO Index of Industrial Production

Note: () negative

Coal output increases significantly

After about two and half years of negative production in this sub-sector, there was a significant amount of coal produced in the second quarter of 2009. The coal industry significantly increased by 1006.9 percent in the first half of 2009 compared to a decline of 60.5 percent in the first half of 2008. The

increase in coal output was as a result of the resumption of production at one of the major coal mines. Actual coal production increased by 981.4 percent from a production of 3,493.0 metric tonnes in the first six months of 2008 to 34,280 metric tonnes in the first six months of 2009.

Non-Ferrous Ore increases

The non-ferrous ore mining sector has shown an increase of 21.5 percent in the first half of 2009 in comparison to the same period in 2008. The increase in output is mainly attributed to increased production from the newly opened mines. The actual copper production increased by 22.2 percent, from

275,810.5 metric tonnes in the first half of 2008 to 336,980.3 metric tonnes in the first half of 2009. Cobalt production also increased by 21.5 percent from 1,975.4 metric tonnes in the first half of 2008 to 2,400.4 metric tonnes in the same period of 2009.

Stone quarrying increases

The Stone quarrying sector showed an increase of 8.6 percent in the period January to June 2009 compared to the same period

in 2008. This is owing to increased production of sand and crushed stones.

MANUFACTURING

The total manufacturing index showed an increase of 2.2 percent in the first half of 2009 compared to an increase of 3.5 percent in the first half of 2008. The slowdown in the

increase is mainly as a result of negative growths in the textile and fabricated metal product industries.

Food, Beverages and Tobacco

There was a 4.4 percent increase in Food, Beverages and Tobacco sub-sector in the first half of 2009 compared with the first half of 2008. This increase in the index is attributed to, among others, increase in production of

wheat flour and flour products like bread. An increase in the manufacturing of sugar and maize grain mill product also contributed to this increase.

Textiles, Clothing and Leather industry continues to decline.

In comparison to a decline of 11.0 percent in the first six months of 2008, the Textiles, Clothing and Leather sub-sector further receded by 18.9 percent in production in the

first Six months of 2009. The decline is as a result of reduced production of textile products and wearing apparels.

Wood and Wood Products

This sub-sector grew by 6.6 percent in the first half of 2009 compared to the same period in 2008. This is attributed to increased production of wooden products such as

panel doors, domestic furniture, school desks, etc. A growth in the output of sawmills has also been noted.

Paper and Paper Products

Overall, output in this sub-sector registered an increase of 8.8 percent from January to June 2009 compared to an increase of 24.5 percent in the same period of 2008. This is as

a result of growth in production of printed material, paper, tissue, corrugated boards and others.

Chemicals, Rubber and Plastics

The Chemicals, Rubber and Plastics sub-sector increased production by 1.5 percent in the first half of 2009 compared to an increase of 9.7 percent in the first half of 2008. The

marginal growth was as a result of reduced production of pharmaceutical products and chemical fertilizers.

Non-metallic Mineral Products

Output for the non-metallic mineral products sub-sector increased by 9.0 percent in the first half of 2009 compared to the first half of 2008.

The increase was mainly due to increased production of cement and lime.

Basic Metal Industries

The Basic Metal Industrial sector increased its output marginally by 0.1 percent in the first half of 2009 in comparison with the same period in 2008. The increase is mainly due to

increased production of iron/steel castings and the manufacturing of iron mill balls. The mill balls are mainly used in the crushing of mineral ores in the mining industry.

Fabricated Metal Products and Others

The current output in the fabricated metal products sub-sector experienced a decline of 4.8 percent in the first half of 2009 compared to the first half of 2008. This is attributed to the

decrease in production of fabricated metal products such as door frames, vent ducting, wheelbarrows and pipes.

ELECTRICITY

Electricity output increased significantly by 12.2 percent in the first half of 2009 compared to a decrease of 6.3 percent in the same period of 2008. The increase in the

electricity output is mainly as a result of increased electricity generation at Kafue Gorge power plant.

Quarterly Generation of Electricity for 2008 and the first half of 2009 (KWh)

2008						2009			% change

LAYMAN AND STATISTICS

Raw Materials: These are goods that are not subjected to any form of transformation in their production. Residuals, wastes and scrap are also included under this category.

Intermediate Products: These are products that undergo a further degree of value addition. Included in this category are parts (as far as they are separately identified as such in the Harmonized System).

Consumer Goods: These are goods at the last stage of production and are ready for consumption or use. Also included under this category is food and live animals (except pure-bred breeding animals).

Capital Goods: This category of goods includes livestock (pure-bred breeding live animals) and durable industrial production goods such as machinery.

FISIM: Financial Intermediation Services Indirectly Measured. In the System of National Accounts, it is an estimate of the value of services provided by financial intermediaries for which no explicit charges are made. These services are paid for as part of the margin between rates applied to savers (deposits) and borrowers (loans).

GDP Revision Policy: The Central Statistical Office produces three estimates of GDP for a particular year. The first estimates are preliminary and are mostly based on data of the first half of the year. The second estimates, called Revised Estimates, are based on data up to the third quarter of the year. The final estimates of GDP are produced based on data for all the four quarters.

Nominal and Real GDP: Nominal GDP measures the value of output during a given year using the prices prevailing during that year. Over time, the general level of prices rises due to inflation, leading to an increase in nominal GDP even if the volume of goods and services produced is unchanged.

Real GDP measures the value of output by valuing the goods and services adjusted for inflation. For year-over-year GDP growth, "real GDP" is usually used as it gives a more accurate view of the economy.
