

# Central Statistical Office 

Volume 63 Website: www.zamstats.gov.zm
June, 2008

## Foreword

WBranch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to inc rease utilisation of statistic al products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various puposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly public ation is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistic al information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

Ms. Efreda Chulu
Director of Census and Statistics
26th J une, 2008

Serving Your Data Needs

## Inside this Issue

- The higher price of Sugar pushes June Inflation to 12.1 percent
- Maize grain prices continue to dec line
- May 2008 Records Trade Surplus
- Throwing in Pits: Most Common Method of Garbage Disposal!!
- Contraceptive Use Increases
- Forty-one percent of land under maize expected not to be harvested
- Layman \& Statistics
- Selected SocioEconomic Indicators

## INFLATION

## The higher price of Sugar pushes June Inflation to $1 \mathbf{1 2 . 1}$ percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI), was rec orded at 12.1 percent as at J une 2008. This rate is 1.2 percentage points higher than the May rate of 10.9 percent. Compared with the same period last year, the annual rate of inflation increased by 1.0 percentage point,
from 11.1 percent in June 2007 to 12.1 percent in J une 2008.

The June 2008 inflation rate of 12.1 percent means that prices as measured by the all items Consumer Price Index (CPI) increased by an average of 12.1 percent between J une 2007 and J une 2008.

## Changes in annual inflation rates for CPI Main Groups

Between May 2008 and June 2008, the annual inflation rates increased for food, beverages and tobacco, other goods and services, and declined for clothing and footwear, rent and household energy,
fumiture and household goods, medical care, transport and communication, recreation and education main groups.

## Contributions of different Items to overall inflation

The increase of 1.2 percentage points in the a nnual inflation rate from 10.9 percent in May 2008 to 12.1 perc ent in J une 2008 is a ttributed to the increase in the cost of food. The rise in prices of sugar alone accounted for 1.0 percentage point out of the total increase of 1.2 percentage points.

Of the total 12.1 percent a nnual inflation in June 2008, food products accounted for 7.5 percentage points while non-food products in the Consumer Price Index (CPI) accounted for a total of 4.6 percentage points.

## The Annual Food Inflation Rate

The annual food inflation rate was recorded at 15.6 percent in June 2008, compared to 11.7 percent in May 2008. Contributing most to food inflation were increases in the cost of sugar, breakfast meal, other cereals and cereal products, meat, dried kapenta, fresh vegetables, fresh fruits, tubers, cooking oil,
milk and milk products, table salt and other processed food products. Partially offsetting these increases were declines in the cost of maize grain, roller meal, dried beans and shelled groundnuts.

## The Annual Non-food inflation Rate

The annual non-food inflation rate was recorded at 8.8 percent in June 2008 , compared to 10.1 percent in May 2008.

# INTERNATIONAL MERCHANDIZE TRADE 

## May 2008 Records Trade Surplus

During the month of May 2008, Zambia recorded a Trade Surplus valued at K120.5 billion. This means that the country exported
more in May 2008 than it imported in value terms.

| Months | Imports (cif) | Domestic Exports (fob) | Re-Exports (fob) | Total Exports (fob) | Trade Balance |

## Exports by Standard International Trade Classification (SITC) May and April 2008

The total value of exports in May 2008 was K1, 442.6 billion compared to K1, 873.1 billion in April 2008. The most prominent exports were manufactured goods classified chiefly by material; accounting for 84.3 percent in May 2008 and 65.7 percent in April 2008, of which refined copper was the most significant export item. Other important exports were
crude materials (excluding fuels) such as copper ores and concentrates; cobalt ores and concentrates; food and live animals; and machinery and transport equipment which collectively accounted for 11.1 and 31.4 percent in May and April 2008, respectively.

## Zambia's Major Exports Classified by Harmonized Coding System (HS), May 2008

Zambia's major export product in May 2008 was copper and articles thereof accounting for 76.9 percent of Zambia's total export eamings. Other export products worth noting, though on a smaller scale were: other base metals such as cobalt which are copper related (5.6 percent); ores, slag and ash (4.1
percent); tobacco and manufactured tobacco substitutes (1.7 percent) and edible vegetables and certain roots and tubers (1.3 percent).These five product categories collectively accounted for 89.6 percent of Zambia's total export eamings for the month of May 2008.

## Zambia's Major Export Destinations by Products in May 2008

The five major destinations of Zambia's exports during the month of May 2008 were Switzerland ( 50.0 percent), Egypt (12.7 percent), South Africa ( 10.5 percent), Democratic Republic of Congo ( 5.3 percent) and China ( 2.8 percent). These five countries collectively accounted for 81.3 percent of Za mbia's total export eamings.

Zambia's major export products to Switzerland were cathodes and sections of cathodes of refined copper, and plates, sheets and strip, of refined copper, uncoiled accounting for 69.6 and 25.0 percent, respectively. Other products worth noting are Other Articles of cobalt, not else were specified ( 4.1 percent) and Copper ores and concentrates ( 0.8 percent).

The major export products to Egypt were cathodes and sections of cathodes of refined copper; and plates, sheets and strips, of refined copper, uncoiled accounting for 58.1 and 41.9 percent, respectively.

The major export products to South Africa were Wire of refined copper with maximum cross-sectional dimension $\quad>6 \mathrm{~mm} \quad$ (33.6 percent); copper ores and concentrates (26.6 percent); plates, sheets and strip, of refined copper, uncoiled ( 9.9 percent); and Electric conductors, nes, for a voltage $>1000$ V (9.9 percent). Other notable products included mixtures of vegetables, frozen (5.6 percent) and Cotton, not carded orcombed (4.2 percent).

Zambia's major export products to Congo (DR) were Portland cement (10.1 percent), wheat or muslin flour (10.1 Percent), gas oils (9.1 percent) and sulphuric acid (7.7 percent). Other notable exports were motor spint (4.4 percent) and maize (com) flour (3.8 percent).

The major export products to China were Cathodes and sections of cathodes of refined copper; and cobalt ores and concentrates accounting for 69.0 and 10.5 percent of exports to that country, respectively.

## Export Marlet Shares by Regional Groupings, April and May 2008

The Common Market for Eastem and Southem Africa (COMESA) region was the largest market for Zambia's exports accounting for 21.2 percent in May 2008 and 13.8 percent in April 2008. Within COMESA, Egypt was the dominant destination in May and April 2008 accounting for 60.1 and 52.2 percent, respectively. The second was Congo (DR) accounting for 25.1 percent in May 2008 and 25.6 percent in April 2008. Other notable markets were Malawi, Kenya and Zmbabwe, collectively accounting for 13.7 percent in May and 21.6 percent in April 2008.

The Southem African Development Community (SADC) grouping of countries was the second largest market for Zambia's exports accounting for 19.2 percent in May 2008 and 10.9 percent in April 2008. Within SADC , the dominant market in May 2008 was South Africa with 54.7 percent followed by Congo (DR) with 27.7 percent. In April 2008, the scenario was the same with South Africa a nd Congo (DR) a c counting for 38.5 and 32.6 percent, respectively. Other key markets were Zmbabwe, Tanzania and Malawi.

The Asian regional grouping was the third largest market for Zambia's exports accounting for 10.7 and 12.0 percent in May and April 2008, respectively. Within the Asian region, the dominant market in May was China with 26.4 percent followed by Korea with 18.8 percent. In April 2008, Korea dominated with 27.1 percent followed by Thailand with 19.1 percent. Other notable markets include Kuwait and United Arab Emirates.

The European Union (EU) was the fourth largest market for Zambia's exports accounting for 6.1 and 5.1 percent of Zambia's total exports in May and April 2008, respectively. Within the EU market, the Netherlands was the dominant market in both May and April 2008 accounting for 42.5 and 51.0 percent, respectively. Other notable markets were United Kingdom, Belgium, Gemany and Italy collectively accounting for 56.9 and 46.8 percent in May and April 2008, respec tively.

## Zambia's Major Imports by Standard International Trade Classification (SITC) for April and May 2008

The total value of imports in May 2008 was valued at K 1,322.1 billion compared to K $1,850.6$ billion in April 2008. The most prominent imports were machinery and transport equipment, which accounted for 32.6 and 27.3 percent in May and April 2008, respectively. Other notable imports in May 2008 were mineral fuels, lubricants and related materials; and manufactured goods
classified chiefly by material and chemicals. These collectively accounted for 50.2 percent. In April 2008, other notable imports were crude materials, (excl fuels); mineral fuels, lubricants and related materials; and manufactured goods classified chiefly by material which collectively accounted for 53.0 percent.

## Zambia's Major Import Sources by Products, May 2008

The major source of Zambia's imports in May 2008 was South Africa accounting for 45.9 percent of the total value of imports. The major import products were gas oils, sulphur of all kinds, and other fertilizers, nes. Other products included other medicaments of mixed or unmixed products, parts of machinery of $84.26,84.29$ \& 84.30 and structures \& parts of structures, nes of iron.
vehicles, electrical machinery equipment parts and a rtic les of iron and steel collectively accounting for 37.6 percent.

The second main source of Zambia's imports in May 2008 was Kuwait accounting for 16.0 percent. The major import products were petroleum oils and oils obtained from bituminous materials.

Other notable sources of Zambia's imports were Congo (DR), United Kingdom and China collectively accounting for 10.9 percent of Zambia's total imports in May 2008.

## Import Market Shares by Regional Groupings, April and May 2008

The Southem African Development Community (SADC) grouping of countries was the largest source of Zambia's imports accounting for 55.1 and 62.9 percent in May and April 2008, respectively. Within the SADC region, South Africa was the major source of Zambia's imports accounting for 83.3 and 52.0 percent in May and April 2008, respectively.

The Asian market was the second largest source of Zambia's imports accounting for 28.6 and 22.4 percent in May and April 2008, respectively. Within the Asian market, Kuwait dominated with 55.9 and 58.2 percent in May a nd April 2008, respec tively. Other key market sources were China, India, United Arab Emirates and J apan.

The European Union (EU) was the third largest source of Zambia's imports with 10.1 percent
in May and 9.7 percent in April 2008. Within the EU, the dominant source in both months was United Kingdom accounting for 32.1 and 28.4 percent in May and April 2008, respectively. The other key markets were Gemany, Finland, Sweden and France.

The Common Market for Eastem and Southem Africa (COMESA) region was the fourth largest source of Zambia's total imports accounting for 9.3 and 30.6 percent in May and April 2008, respectively. Within COMESA, Congo (DR) dominated as the main source in May and April 2008 accounting for 48.5 and 86.3 percent, respectively. This was followed by Kenya with 22.9 percent in May while Zmbabwe followed with 5.7 percent in April 2008. Other notable sources were Malawi, Egypt and Swaziland.

## LIVING CONDITIONS

## Throwing in Pits: Most Common Method of Garbage Disposal!

During the 2006 Living Conditions Monitoring Survey (LCMS), information on the main methods of garbage disposal was collected. The methods investigated were refuse collection, throwing in a pit, buming and dumping.

The results showed that more than half of the households in Za mbia ( 57.2 percent) disposed of garbage by throwing in a pit. Dumping was the second most common method of garbage disposal used by 33.6 percent of households. Refuse collection was only used by 7.3 percent of households. The least used method of garbage disposal was buming.

Percent Distribution of Households by main type of Garbage Disposal, Rural/ Urban and Province

| Location | Type of Garbage Disposal |  |  |  |  |  | Total Number of Households |

Source: 2006 Living Conditions Monitoring Survey (V)

Analysis by residence showed that 60.8 percent of households in urban areas and 55.3 of those in rural areas reported throwing in a pit. Furthemore, 17.5 percent of households in urban areas reported using refuse collection compared to 1.9 percent of those in rural areas.

However, dumping was more common in rural areas at 40.5 percent than in urban a reas at 20.6 percent.

At provincial level, Lusaka Province recorded the highest proportion of households that used refuse collection method at 19.8 percent followed by Copperbelt Province with 18.7 percent. Westem Province recorded
the lowest proportion of households that used refuse collection method at 1.0 percent.

Luapula Province recorded the highest proportion of households that disposed of their garbage in a pit at 76.3 percent followed by Northem Province with 75.3 percent. Westem Province recorded the lowest proportion of households that disposed of theirgarbage in a pit.

Westem Province recorded the highest proportion of households that dumped refuse at 65.9 percent while the Copperbelt Province recorded the lowest at 17.2 percent.

## Radio, Cell Phone and Television, most owned ICT assets!

The 2006 Living Conditions Monitoring Survey (LCMS IV) collected information on Information Communic ation and Technology facilities (IC TS). These included radios, television, video player, land phone, cellular phone, satellite dish/decoder, computer and Intemet connection. The results indicate that the most owned assets were radio ( 55.6 percent), cell phone ( 24.2 percent) and Television (24.1 percent) while the least owned asset was the intemet connection with 0.1 percent.

Analysis by rural/urban shows that, ownership of a radio, cell phone and television was more in urban areas than in rural areas. The proportion of households that owned a radio in urban areas was 65.8 percent compared to 50.1
percent in rural areas while that of those who owned a cell phone was 53 and 8.8 percent in urban and rural areas, respectively. The proportion of households that owned a television was 54.6 percent in urban areas compared to 7.8 percent in rural a reas.

The survey also revealed that there has been an increase in the proportion of households that own a cell phone while those that own land telephone line declined. The proportion of households that own a cell phone increased from 10.8 percent in 2004 to 24.2 percent in 2006. The proportions of households that own land telephone line declined from 5.2 percent to 1.2 percent during the same period.

Percentage Distribution of ICTAssets Owned by Residence, Zambia, 2004 and 2006

| ICTAssets | All Zambia |  | Rural Areas |  | Urban Areas |  |

Source: 2006 Living conditions monitoring survey

A nalysis of ICT assets by sex of household head shows that male-headed households own more ICT facilities than female-headed households. About sixty-two percent ( 62 percent) of male headed households and 35.5 percent of female headed households own a radio. The results
also indicate that more male headed households (26 percent) owned a cell phone than female headed households (18.4 percent). The proportion of male headed household that own a television was more ( 25.8 percent) than female headed households (18.4 percent).

Percentage Distribution of Household ICTAssets owned by Sex of Head of Household, 2006

| Assets | All Zambia | Male Head | 61.6 |
| :--- | :---: | :---: | :---: |
| Radio | 55.6 | 26.0 |  |

## DEMOGRAPHIY

## Contraceptive Use Increases

The 2007 Zambia Demographic Health Survey results reveal that contraceptive use has continued to increase. Overtime the usage has increased from 15.2 percent in 1992 to 25.9 percent in 1996 and from 34.2 percent in 2001/2 to 40.8 percent in 2007. The results further reveal that modem methods of contraceptives has increased overtime while
that of traditional methods has decreased. Modem methods include female sterilisation (tubal-ligation), pill, IUD, injectables implants, male and female condoms, and Lactational Amenomoea Method (LAM). Traditional methods include periodic abstinence, withdrawal, and folk methods.

The 2007 results also show that the pill was the most commonly used contraceptive method a mong the currently mamied females with 11 percent. This was followed by injectables with

9 percent. Female condoms, IUDs and implants were the least common contraceptive methodsused.

Analysis by residence shows that there were more currently mamied women using contraceptives in urban areas (48.4 percent)
compared to those in rural areas (36.7 percent).

Percentage Distribution of Curently Married Women by Contraceptive use and Residence.

## AGRICULTURE

## Forty-one percent of land under maize expected not to be harvested

According to the results of the Crop Forecasting Survey for 2007/2008 Agricultural Season, out of the 916,738 hectares of land planted under maize, only 539,873 hectares is
expected to be harvested. This means that 41.2 percent of the area that was planted would not be harvested.

Maize Production during the 2007/8 Agricultural Season

| Province | AREA PLANIED <br> ( Ha ) | AREA HARVESTED (Ha) | PERCENTAGE (Area Not Hanvested) | PRODUCTION (Mt) | Yield Rate 2007/08 |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2007/08 | 2007/08 |  | 2007/08 |  |
| Central | 166,513 | 97,847 | 41.24 | 443,504 | 2.7 |

| Total | 916,738 | 539,873 | 41.24 | 1,211,566 | 1.3 |

Source: Crop Forecasting Survey - 2007/2008

Analysis by province shows that while Southem Province had the largest area planted under maize, 72.6 percent of this would not be harvested. The percentage of area not to be harvested is also expected to be high in Westem Province ( 61.2 percent) and Lusaka Province ( 50.9 percent).

The survey also collected information on the reasons that would lead to part of the area under maize not to be harvested. The results show that the most prominent reasons in all the provinces were water logging/floods and
lack of fertilizer. According to the results, Southem Province was the hardest hit by water logging/floods with 96.8 percent of households reporting that they were affected. Westem (81.5 percent), Lusaka ( 80.3 percent) and Central ( 70.3 percent) were the other provinces that were greatly affected by water logging/floods. Households that were mostly affected by lack of fertilizer were reported in Northem (60.4 percent), Luapula ( 55.0 percent) and Northwestem (53.9 percent).

Reasons indic ated by households for not harvesting part of the planted area under maize by province,2007/ 2008 agric ultural season.

| Province | Water Logging/ Floods | Wilting due to drought | Animal/bird destruction | Field not weeded | Pests and diseases | Theft | Other | Lack of fertilizer | Total |

## LAYMAN \& STATISTICS

Domestic Exports: These are goods originating from the exporting countries.
Re-exports: This refers to goods imported into the country and then exported in the same form or after minor improvements. For example, blending, packing and repairing.

Trade Surplus: this is a situation were a country is exporting more than it is importing.
SITC: Stands for Standard Intemational Trade Classification. It is a trade statistical nomentriture mainly used in trade sta tistic a l a nalysis.

The Agric ulture Marketing Season in Zambia starts from the $1^{\text {st }}$ of May and ends on $30^{\text {th }}$ April of the following year.
