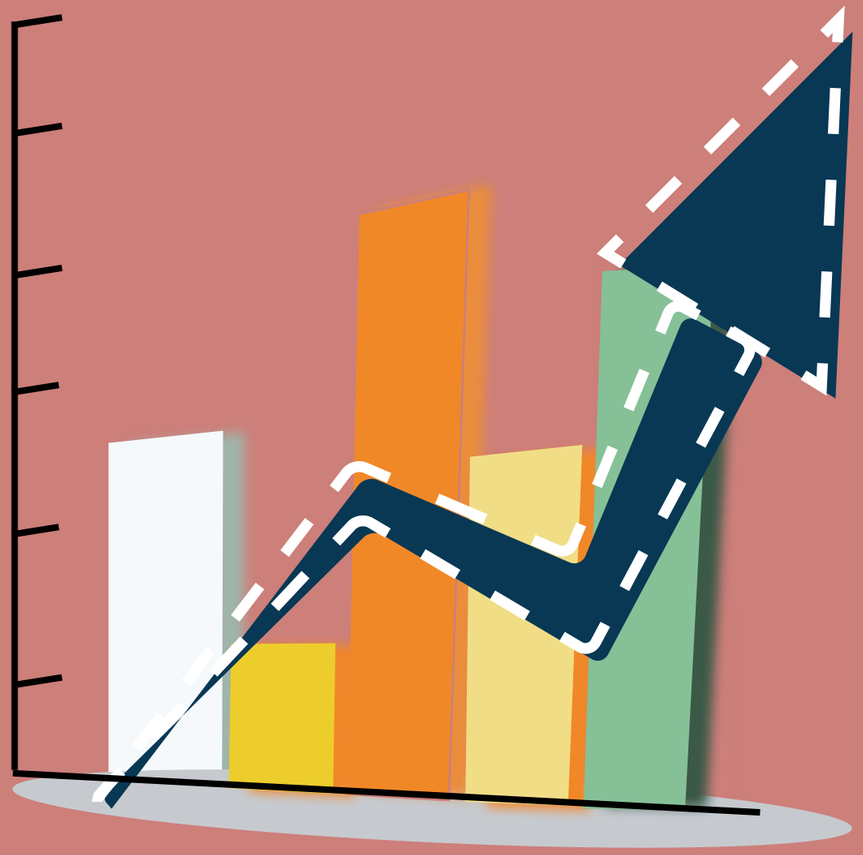
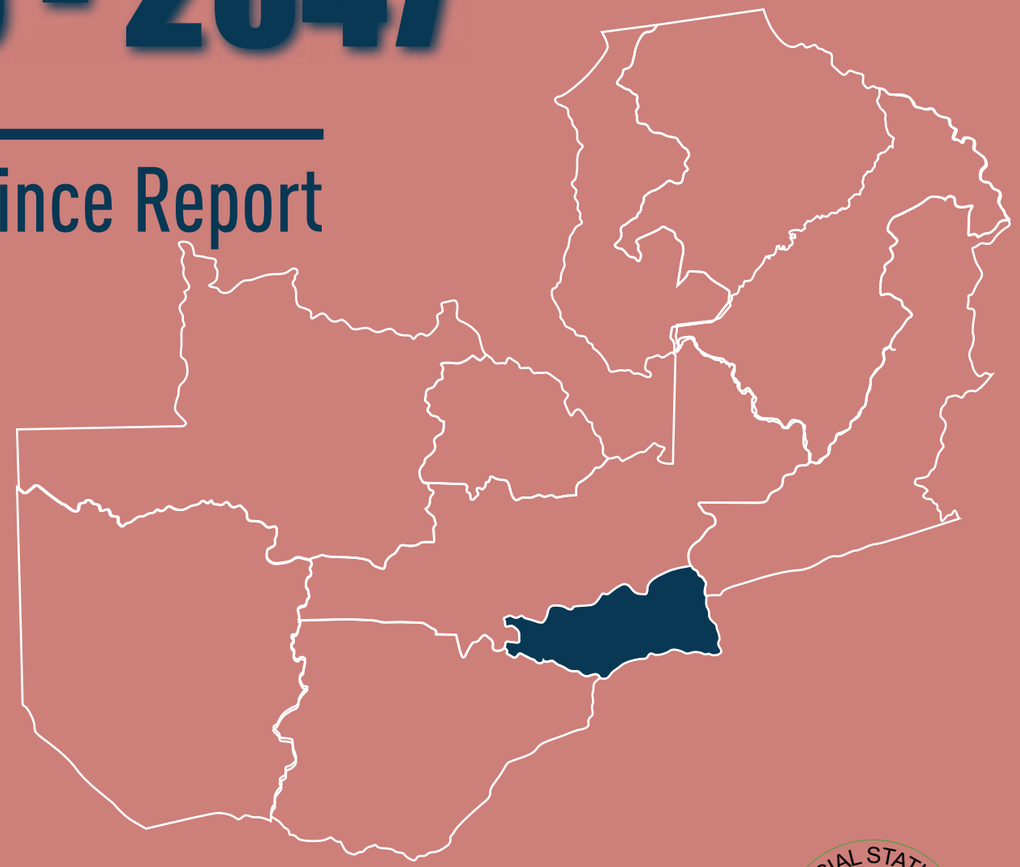
Lusaka Province Report





OFFICIAL STATISTICS OF ZAMBIA
Republic of Zambia

Republic of Zambia

ZAMBIA STATISTICS AGENCY
"Quality Statistics for Development"

Foreword

In accordance with the Statistics Act No. 13 of 2018 under section 7(2)(h) the Zambia Statistics Agency (ZamStats) is mandated to conduct a Census of Population and Housing (CPH) every 10 years. One significant output of the CPH is the production of the population projections. This report forms part of the series of outputs from the 2022 Census of Population and Housing. With technical input and support from the United States (US) Census Bureau, ZamStats produced national, provincial and district level population and demographic projections covering the period 2023-2047. Furthermore, Constituency level projections were produced for the period 2023-2033.

I would like to acknowledge the support of the Government of the Republic of Zambia (GRZ), the cooperating partners in particular, The University of Zambia - Department of Demography, Population Sciences, Monitoring and Evaluation and the United Nations Population Fund (UNFPA) for supporting the production of this important output of the 2022 CPH. I would also like to acknowledge Dr. Maria Aysa Lastra and Dr. Fabian Romero from the US Census Bureau for their technical input.

The report provides insights into the Lusaka Province's future demographic landscape vital for informing policymakers, researchers, and the public about potential changes in population and demographic profile of the province. I hope these population and demographic estimates will be useful among the different stakeholders and users during this intercensal period and beyond.

Sheila S. Mudenda
Statistician General

Chapter 1: Background

1.0 Census of Population and Housing Undertaking

Zambia conducted her first E-census in 2022. This was the sixth National Census of Population and Housing conducted in Zambia since independence in 1964. So far, the country has conducted censuses in 1969, 1980, 1990, 2000 and 2010. The 2022 Census of Population and Housing was carried out from 18th August to 21st September, 2022.

The Census was launched by **His Excellency, the President of the Republic of Zambia Mr. Hakainde Hichilema** on 17th August, 2022. The census enumeration started on the 18th of August 2022 with Census enumerators going out visiting all buildings in Zambia whether completed, incomplete, abandoned, habitable and inhabitable for the purpose of identifying characteristics of all buildings and households. All persons who lived in the buildings as well as those that lived in open spaces as households were counted. Persons who were present at any time at the household during the reference period (18th August to 7th September) were counted directly as Usual Household Members present at the Housing Unit/Dwelling. Those that visited the household and stayed throughout the reference period were counted as Visitors of the Household. While those who were absent the entire enumeration period were enumerated by proxy, that is, as Usual Household Members Absent from the Housing Unit/ Dwelling. Detailed personal information was only collected for Usual Household Members present and Visitors found at the Housing Unit/Dwelling during the reference period, while for Usual Household Members Absent, only Age, Sex, Relationship to Household Head and Residence Status were collected from the main respondent for the Household.

1.1.1 Improvements during the 2022 Census

The 2022 Census employed the use of digital and satellite imagery mapping and listing of all structures and households, and the use of Computer Assisted Person Interviewing (CAPI). All materials for trainings and field work were loaded on the tablets thus evading the cost of printing large volume of documents. Another very important improvement in the 2022 Census was the capturing of GPS coordinates for all households. This information is very important in relating to the location of households and their social and economic facilities. This information also improved the census coverage by identifying omissions and validating coverage.

The overall objective of the census mapping and listing exercise was to provide an updated digital geospatial database for enumeration areas that can be used as a basis for the census planning process during the pre-enumeration phase, census data collection and, for development of sampling frames for surveys and dissemination of census data/results during the Post-enumeration phase.

The specific objectives were:

- To delineate enumeration areas (EAs) in the country to facilitate the smooth counting of people during the enumeration period and essentially to establish that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting;
- Re-delineate enumeration areas (EAs) into manageable sizes in terms of households' population to be enumerated during the census period;
- Provide the basis to estimate resources required at each administrative level such as personnel, materials and transport; and
- Ensure that EA maps easily guide the enumerators on the households that they should cover during the census period.

1.1.2 Legal Basis for the Census

A Census is the primary source of information about the population of a country. The Zambia Statistics Agency is mandated through the Statistics Act No.13 of 2018 of Laws of Zambia, under section 7(2)(h) to conduct the census of population and housing every ten years. Further in accordance with section 22 of the Act, Statutory Instrument (SI) No. 92 of 2021, the national census of population and housing was approved by the Minister of Finance and National Planning, Dr. Situmbeko Musokotwane.

1.1.3 Data Confidentiality

All the information collected during the 2022 Census of Population and Housing was treated as strictly confidential. Extensive confidentiality processes were made to ensure that anonymity of data providers was ascertained at all times. The data collected will not be shared with any third parties if it may lead to the direct or indirect identification of the respondents. All the non-civil service census staff took an oath of secrecy before being engaged in any data collection or data handling. Mechanisms were put in place to report any possible violations of census procedures and/ or violation of confidentiality.

1.1.4 Census Objectives

The main objectives of the 2022 Census were:

- To provide accurate and reliable information on the size, composition and distribution of the population of Zambia at all Ward, Constituency, District and Provincial levels;
- To provide information on the demographic and socio-economic characteristics of the population of Zambia;
- To provide an accurate sampling frame for future inter-censal household and population-based surveys;
- To generate statistics on small areas and population groups; and
- To provide a benchmark for research and analysis, particularly for population projections.

1.1.5 Pre-enumeration Phase

The pre-enumeration phase can be categorized into five main parts; Formation of the Census administrative structures, Mapping and Listing, Questionnaire Adaptation, Pilot Census and Publicity campaigns.

1.1.6 Census questionnaires

The 2022 Census had two types of questionnaires; the Household questionnaire and the Institutional questionnaire. The household questionnaire was used to capture both individual and household characteristics, whereas, the Institutional questionnaire was used to capture populations residing in collective living quarters.

The content of the 2022 Census questionnaire generally remained the same as that of the previous censuses. However, there were a few changes made on certain topics and addition of new topics. Some changes included disability data collected using the six Washington Group questions which focuses on Activity Limitation, Nationality was changed to Citizenship, the question on Children born in the last 12 months was changed to Date of birth of the last child born alive. Among the added topics and questions were; Date of arrival in the country, Birth registration, Death registration and certification, Emigration of household members and Ownership of ICT materials.

1.1.7 Data Collection Phase

Enumerators were assigned an EA each. During enumeration, data collectors used electronic EA maps prepared by the Geographic Information System (GIS) Unit to identify households and conduct interviews. The maps contained geo-referenced households from the Mapping and Listing exercise conducted from 2019 to 2020. Households whose markers were not appearing on the maps were added and interviewed.

In vast EAs where enumerators had to move long distances, bicycles were used to move around these EAs to cover households. Supervisors on the other hand mostly used motor bikes to navigate the areas, collect data from enumerators' tablets and send data to the central server at the head office.

A census dashboard was set up for data quality control as enumeration was in progress. It assisted with assessing the coverage of areas as well as monitoring several questionnaire content indicators such as population size, fertility rate, sex ratio, average household size, response rate, among others. Furthermore, spot checks and re-interviews were conducted by census supervisors to ensure quality data was collected.

The 2022 CPH used both the de facto and de jure method of enumeration. The midnight of 8th September 2022 was the reference date for the 2022 CPH or the census reference moment. The three-week period (18th August– 7th September) was taken as the census reference period. During this period, all persons residing in Zambia, other than diplomats, were enumerated regardless of their residence status. Those who were outside the country and were not expected to be back within 6 months were not enumerated.

1.1.8 Post Enumeration Phase

The GIS, using the satellite imagery validated the enumeration area coverage by the data collectors. Where households were missed, data collectors had to go back to ensure complete enumeration. Households falling outside the boundaries were realigned. Apart from GIS enumeration area coverage validation, the post enumeration phase also involved data cleaning and processing for the questionnaire content. During this process data was checked for errors, completeness, duplicates, consistency and also its validity.
